## MAINTENANCE AND CARE

Proper care will help maintain the finish and functionality of your KUZOR faucet for years to come.

- Cleaning:** Clean the faucet regularly with a soft, damp cloth and mild soap. Avoid abrasive cleaners, harsh chemicals, or scouring pads, as these can damage the matte black finish.
- Mineral Deposits:** For stubborn mineral deposits, use a solution of equal parts white vinegar and water. Apply with a soft cloth, let it sit for a few minutes, then rinse thoroughly with clean water and dry.
- Aerator Maintenance:** Periodically unscrew the aerator from the spout and clean any debris or mineral buildup to maintain optimal water flow.
- Avoid Damage:** Do not use tools to tighten the aerator or other parts that are designed for hand-tightening, as

this can cause damage.
