## CARE AND MAINTENANCE

- **Cleaning:** The plush fabric covering can be hand washed. For general cleaning, use a vacuum cleaner to remove loose fur and dust. Spot clean any soiled areas with a mild detergent and damp cloth, then air dry.
- **Inspection:** Periodically check all screws and connections to ensure they remain tight. Re-tighten if necessary.
- **Sisal Posts:** The sisal scratching posts are designed for durability. If they become heavily worn, consider replacing the sisal rope or the entire post if available from the manufacturer.
- **Toy Replacement:** The fuzzy dangling ball toy is replaceable. If it becomes damaged or lost, contact Yaheetech for replacement options.

## TROUBLESHOOTING

- **Instability:** If the cat tree feels wobbly, ensure all screws are tightened. Verify the anti-tipping strap is securely anchored to the wall. Ensure the base is on a flat, stable surface.
- **Cat Not Using Tree:** Introduce your cat to the tree gradually. Place treats or familiar toys on different levels. Use catnip to attract them. Some cats prefer higher perches, while others prefer enclosed

spaces.

- **Damaged Components:** If any part of the cat tree is damaged, discontinue use immediately to prevent injury to your pet. Contact customer support for replacement parts.
