## **TIMEX TWEG21701**

# **TIMEX Analog Watch TWEG21701 User Manual**

Model: TWEG21701

## **1. PRODUCT OVERVIEW**

This manual provides instructions for the TIMEX Analog Watch, Model TWEG21701. This timepiece features a blue round dial, silver stainless steel bracelet band, and is designed for everyday wear.

## 2. SETUP

### 2.1 Setting the Time

1. Locate the crown on the right side of the watch case.
2. Gently pull the crown outwards to the time-setting position.
3. Rotate the crown clockwise or counter-clockwise to adjust the hour and minute hands to the correct time.
4. Once the time is set, push the crown back into its original position against the watch case.

Side view of the watch, highlighting the crown used for time adjustment.

## 2.2 Adjusting the Bracelet

The stainless steel bracelet can be adjusted for a comfortable fit. This typically involves removing or adding links. For precise adjustment, it is recommended to visit a professional jeweler or watch repair service.

Close-up of the watch bracelet and clasp mechanism.

## 3. OPERATING INSTRUCTIONS

### 3.1 Timekeeping

The watch operates using a reliable Quartz movement, providing accurate time display through its analog hands.

### 3.2 Water Resistance

This watch is water resistant up to 50 meters (5 ATM). This means it is suitable for everyday use and can withstand splashes, rain, and brief immersion in water. It is **not** suitable for swimming, diving, or showering, as prolonged exposure to water pressure or hot water can compromise the seals.

## 4. MAINTENANCE

### 4.1 Cleaning

To maintain the appearance of your watch, wipe the case and bracelet regularly with a soft, dry cloth. For stubborn dirt, a slightly damp cloth can be used, followed by immediate drying.

### 4.2 Battery Replacement

The watch is powered by a pre-installed watch battery. When the watch stops running, it indicates the battery needs replacement. It is recommended to have the battery replaced by a qualified watch technician to ensure proper sealing and maintain water resistance.

### 4.3 General Care

- Avoid exposing the watch to extreme temperatures (hot or cold).
- Keep the watch away from strong magnetic fields, which can affect accuracy.
- Protect the watch from strong impacts or shocks.
- Ensure the crown is always pushed in fully to maintain water resistance.

The watch features a scratch-resistant crystal for enhanced durability.

## 5. TROUBLESHOOTING

## 5.1 Watch Not Running

- Check if the crown is fully pushed in. The watch will not operate if the crown is in the time-setting position.
- The battery may be depleted. Refer to Section 4.2 for battery replacement.

## 5.2 Condensation Inside the Watch

If you notice condensation (fogging) inside the watch crystal, it indicates that moisture has entered the watch. This can damage the movement. Immediately take the watch to an authorized service center for inspection and repair.

## 6. SPECIFICATIONS

Rear view of the watch, displaying the model number and water resistance rating on the case back.

Feature	Specification
Model Number	TWEG21701
Movement Type	Quartz

Case Diameter	43 mm
Band Material	Stainless Steel
