3. SETUP AND INSTALLATION

Follow these steps for proper assembly and wall-mounting of your coat rack. It is recommended to have a drill, screwdriver, and level for installation.

3.1. Assembly

1. **Attach Side Supports:** Connect the two vertical bamboo side supports to the main horizontal bamboo back panel using the provided screws from the accessory kit. Ensure they are securely fastened but do not overtighten, as bamboo can be prone to cracking.
2. **Install Top Shelf:** Place the bamboo top shelf onto the assembled frame, aligning the pre-drilled holes. Secure it with the appropriate screws. Again, tighten firmly but avoid overtightening.
3. **Attach Hooks:** Position each of the five double metal hooks onto the lower horizontal bamboo panel, aligning them with the pre-drilled holes. Secure each hook with two small screws.

3.2. Wall Mounting

1. **Marking:** Choose your desired installation location on the wall. Use a level to ensure the rack will be straight. Mark the positions for the mounting screws through the pre-drilled holes on the top side supports of the rack.
2. **Drilling:** Drill pilot holes at the marked locations. If installing into drywall, insert the provided wall anchors into the pilot holes. If installing into wood studs, pilot holes may be sufficient.
3. **Secure to Wall:** Hold the assembled coat rack against the wall, aligning the holes with the drilled holes/anchors. Insert the long mounting screws through the rack's side supports and into the wall. Tighten securely until the rack is stable.
