2. COMPATIBILITY

This USB receiver is specifically designed for the following Vssoplor wireless keyboard and mouse models:

- ASIN: B07JJGCSHR
- ASIN: B07TTFV3YZ
- ASIN: B07VJXFFJW
- ASIN: B086JLBGYV
- ASIN: B0B71HMJ6Y

Important: This receiver is **not** compatible with other keyboard or mouse models, including Vssoplor products not listed above. Please verify your device's ASIN before attempting to pair.

3. SETUP AND PAIRING INSTRUCTIONS

Follow these steps carefully to pair your Vssoplor wireless keyboard and mouse with the USB receiver. It is recommended to pair the keyboard first, then the mouse.

3.1. Pairing the Keyboard

1. Ensure your Vssoplor keyboard is powered on.
2. Press and hold the **ESC** key and the **Q** key simultaneously on the keyboard to enter pairing mode. The indicator light on the keyboard will begin flashing.
3. Insert the USB receiver into an available USB port on your computer.
4. Place the keyboard as close as possible to the USB receiver.
5. Wait for a short period until the indicator light on the keyboard stops flashing. This indicates successful pairing.

3.2. Pairing the Mouse

1. Ensure your Vssoplor mouse is powered on.
2. Press and hold the **middle scroll wheel button** and the **right-click button** simultaneously.
3. Continue holding these buttons for approximately 2 seconds to enter pairing mode.
4. Place the mouse as close as possible to the USB receiver.
5. Release the buttons once the mouse pairs.

Turn on the keyboard switch, Hold ESC+Q to enter Pairing Mode. You will see the indicator light flashing. Insert the usb receiver to your computer, place keyboard as close as you can and wait for a bit or until the light stop flashing. And there we paired the keyboard.

Hold down the mid wheel and right click button and turn on the mouse switch simultaneously, wait for 2 seconds to enter pairing mode. Place mouse as close as you can to pair. Now release the button.

P.S: If this doesn't work, please turn off all wireless device around you and try the entire process again. Remember to pair the keyboard first, then the mouse.

4. TROUBLESHOOTING

- **Pairing Failure:** If the pairing process does not succeed, turn off all other wireless devices in the vicinity (e.g., Wi-Fi routers, Bluetooth devices, other wireless peripherals) to minimize interference. Then, repeat the entire pairing process, ensuring the keyboard is paired first, followed by the mouse.
- **No Response After Pairing:** Ensure the keyboard and mouse have fresh batteries or are fully charged. Verify the USB receiver is securely inserted into a functional USB port on your computer. Try a different USB port if necessary.
- **Intermittent Connection:** Move the keyboard and mouse closer to the USB receiver. Obstructions between the devices and the receiver can weaken the signal.
- **Incorrect Device Recognition:** Confirm that your keyboard and mouse are among the compatible Vssoplor models listed in Section 2. This receiver is not universal.
