## HONITURE G20 Robot Vacuum Cleaner Accessory Set

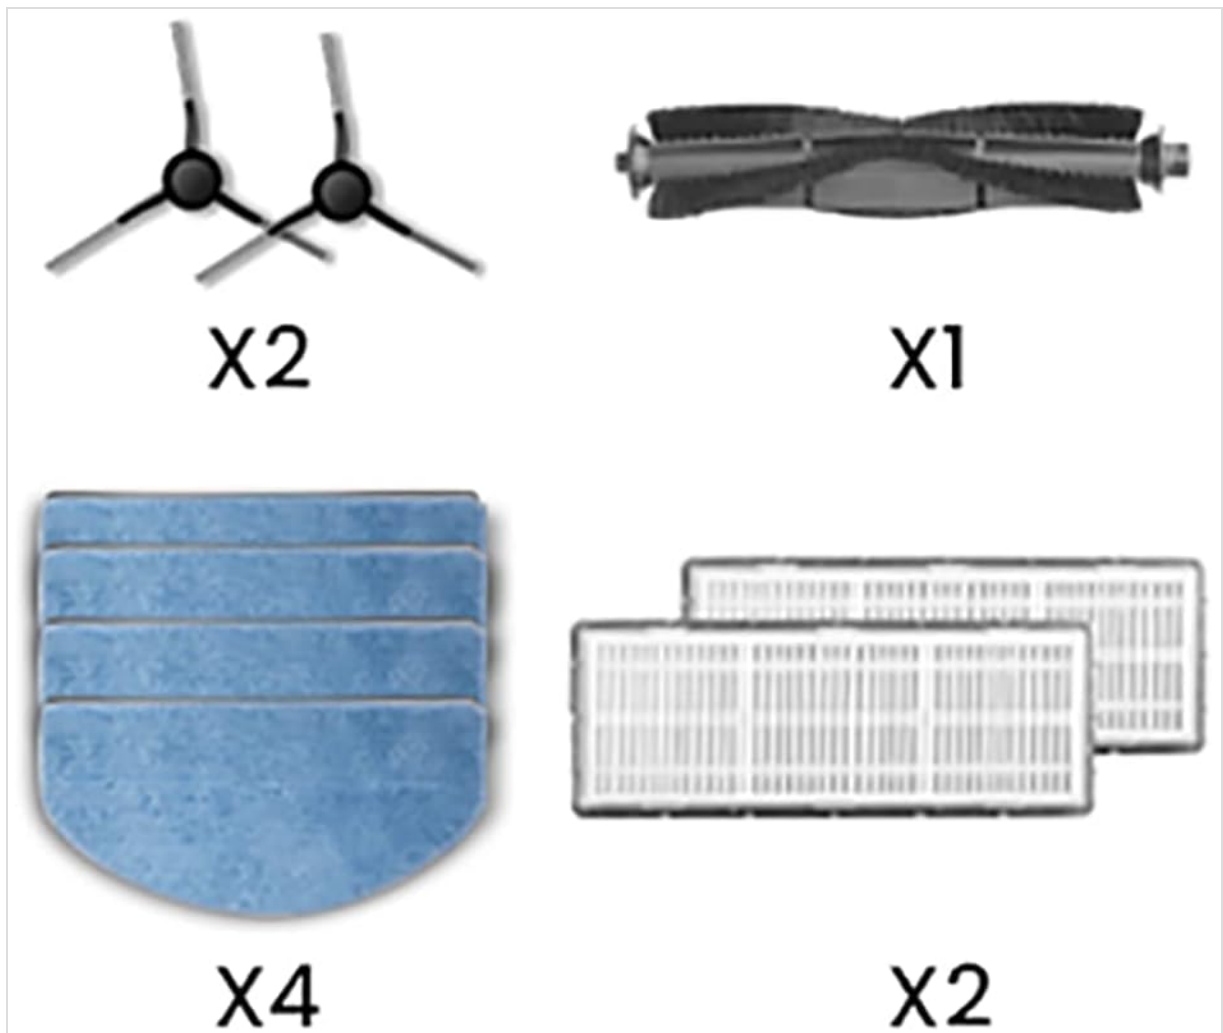

# HONITURE G20 Robot Vacuum Cleaner Accessory Set - Instruction Manual

## INTRODUCTION

This instruction manual provides detailed guidance for the installation, maintenance, and replacement of accessories for your HONITURE G20 Robot Vacuum Cleaner. Regular replacement of these parts ensures optimal performance, maintains cleaning efficiency, and extends the lifespan of your robot vacuum.

## INSTALLATION GUIDE

### Accessory Overview

The HONITURE G20 Robot Vacuum Cleaner Accessory Set includes: 2 Side Brushes, 1 Main Rolling Brush, 4 Mop Cloths, and 2 HEPA Filters.

### Installing Side Brushes

To install the side brushes, gently pull the old brush upwards to remove it. Align the new brush with the corresponding slot and press down firmly until it clicks into place. Ensure both brushes are securely attached.

### Installing Main Rolling Brush

Flip the robot vacuum over. Locate the main brush cover and unclip it. Remove the old main brush. Insert the new main brush, ensuring the ends align with the slots. Close the cover and clip it securely.

### Attaching Mop Cloths

Slide the mop cloth into the designated grooves on the water tank or mop module until it is securely fastened. Ensure the cloth is spread evenly across the module for effective mopping.

### Replacing HEPA Filters

Open the dustbin of your robot vacuum. Remove the old HEPA filter by pulling it out. Insert the new HEPA filter into the filter compartment, ensuring it fits snugly. Close the dustbin securely.

## MAINTENANCE AND CARE

Regular cleaning and timely replacement of accessories are crucial for maintaining your robot vacuum's

performance.

## Cleaning Side Brushes

**Frequency:** Weekly. Remove any tangled hair, dust, or debris from the side brushes. You can use a small brush or your fingers to clear them.

## Cleaning Main Rolling Brush

**Frequency:** Weekly. Remove the main brush and use the cleaning tool provided with your robot vacuum to cut and remove tangled hair and debris. Ensure the brush is free of obstructions.

## Cleaning Mop Cloths

**Frequency:** After each use. Remove the mop cloth from the module, rinse it thoroughly with water, and allow it to air dry completely before reattaching.

## Cleaning HEPA Filters

**Frequency:** Bi-weekly. Gently tap the filter against a trash can to remove accumulated dust and debris. *Do not wash the HEPA filter with water*, as this can damage it.

## Recommended Replacement Schedule

Accessory	Recommended Replacement
Side Brushes	Every 3-6 months
Main Rolling Brush	Every 6-12 months
Mop Cloths	Every 1-3 months (depending on usage)
HEPA Filters	Every 2-3 months

*Note: Replacement frequency may vary based on usage habits and home environment.*

## TROUBLESHOOTING

If you encounter issues related to your accessories, consider the following:

### Brushes Not Spinning

- Check for tangled hair or debris obstructing the brushes. Clean them thoroughly.
- Ensure the brushes are correctly installed and securely clicked into place.

### Reduced Suction Power

- Check and clean the HEPA filter. A clogged filter can significantly reduce suction.
- Ensure the dustbin is empty and properly seated in the robot vacuum.

### Mop Not Cleaning Effectively

- Ensure the mop cloth is clean and properly attached to the module.
- Check the water tank for sufficient water if your model uses a wet mopping function.

## PRODUCT SPECIFICATIONS

**Brand:** HONITURE
