SETUP

Unpacking

Upon receiving your luggage set, carefully remove all pieces from the packaging. The smaller luggage pieces are nested inside the larger ones for efficient shipping. Inspect each piece for any signs of damage.

Setting the TSA Combination Lock

Your Joyway luggage comes equipped with a TSA-approved combination lock. The original number is set to 0-0-0. To set your personal combination:

1. Ensure the lock is set to the original number (0-0-0).
2. Locate the reset button (c), usually a small, recessed button. Use a pen or a pointed tool to push and hold this button until you hear a "click" sound.

3. While holding the reset button, turn the dials (b) to your desired 3-digit combination.
4. Release the reset button. Your new combination is now set. Remember your combination.
5. To reset the combination in the future, repeat these steps.

OPERATING INSTRUCTIONS

Using the Telescoping Handle

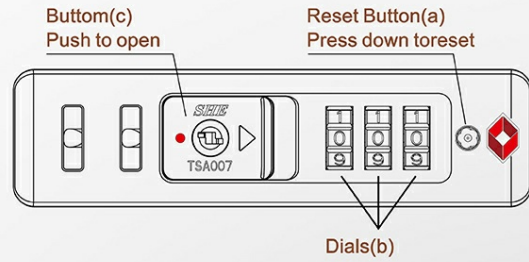

The luggage features a sturdy aluminum 3-step telescoping handle. To extend or retract the handle, press the button located on the top of the handle and pull or push the handle to your desired height. The handle offers three adjustable positions for comfortable maneuvering.

Maneuvering with Spinner Wheels

Each suitcase is equipped with 360° double spinner wheels, allowing for smooth and quiet navigation in any direction. These wheels provide effortless mobility, whether you are pushing, pulling, or rolling the luggage alongside you. The four molded side legs ensure stable standing.

The original number is 0-0-0. To set your personal combination, follow these steps:

1. Put the dials at its original numbers 0-0-0;
2. Press down the reset button (a) with a tool until hear the "click" sound
3. Set your combination by turning the dials (b) ,for example 8-8-8. Then
4. Push the button (c) towards the direction of arrow and the reset button (a) will be back when you hear the "Click" sound. Now you have finished setting your personal combination. Please remember your personal combination by heart. Please repeat the above steps to reset the numbers.

Packing and Interior Features

The interior of each suitcase is designed for organized packing. It features a breathable mesh pocket for smaller items and fixed buckles to secure your belongings during transit. The hardshell design provides ample space for your travel essentials.

MAINTENANCE

Cleaning the Hardshell Exterior

To clean the polypropylene hardshell exterior, wipe it with a soft cloth dampened with mild soap and water. Avoid using abrasive cleaners or solvents, as these can damage the finish. Dry thoroughly with a clean, soft cloth.

Wheel and Zipper Care

- **Wheels:** Periodically check the spinner wheels for any debris or hair that may impede their smooth operation. Clean as needed.
- **Zippers:** The YKK zippers are designed for durability. If a zipper becomes stiff, apply a small amount of zipper lubricant or wax to the teeth.

Storage

When not in use, store the luggage set in a cool, dry place away from direct sunlight. The nesting design allows for compact storage, with smaller pieces fitting inside larger ones.

TROUBLESHOOTING

- **Stiff or Jammed Wheels:** Check for any foreign objects (e.g., lint, hair) caught in the wheel mechanism. Remove any obstructions. If the issue persists, clean the wheel axles with a damp cloth and ensure they are dry.
- **Zipper Not Closing Smoothly:** Ensure the zipper teeth are aligned. If the zipper is stiff, apply a small amount of silicone-based lubricant or a graphite pencil lead along the teeth.
- **TSA Lock Not Opening:** Double-check that you are entering the correct 3-digit combination. If you have forgotten your combination, you will need to reset it following the "Setting the TSA Combination Lock" instructions in the Setup section.
- **Telescoping Handle Sticking:** Ensure no items are obstructing the handle mechanism inside the luggage lining. Gently pull and push the handle while pressing the release button. Avoid forcing the handle.
