## Philips Hue 578773

# Philips Hue Wall Tap Dial Light Switch (Model 578773) Instruction Manual

Your guide to setting up and using your Philips Hue Wall Tap Dial Light Switch.

## INTRODUCTION

---

The Philips Hue Wall Tap Dial Light Switch is a versatile accessory designed to enhance your smart lighting experience. It can be mounted on a wall, used as a portable remote, or attached to magnetic surfaces. This manual provides detailed instructions for its setup, operation, and maintenance.

## SETUP

---

### What's in the Box

- One Philips Hue Wall Tap Dial Switch (Black)
- One CR2032 Battery (pre-installed)

## Requirements

A Philips Hue Bridge is required to unlock the full functionality of the Wall Tap Dial Switch, including automations, remote control, and a stable connection. The Hue Bridge also enables integration with Matter and other smart home systems.

## Installation Steps

1. **Install your lighting:** Ensure your Philips Hue lights are installed and powered on.
2. **Connect the Philips Hue Bridge:** Plug in your Hue Bridge and connect it to your Wi-Fi router.
3. **Download the Philips Hue App:** Download the official Philips Hue app from your device's app store.

4. **Pair the Tap Dial Switch:** Open the Philips Hue app and follow the on-screen instructions to add your new Tap Dial Switch.
5. **Mounting Options:**
  - **Wall Mount:** Use the adhesive backing on the wall plate to secure the switch to a desired wall location.
  - **Magnetic Surface:** The dial itself is magnetic and can be attached to metal surfaces like refrigerators or magnetic cabinets.
  - **Portable Remote:** The dial can be easily removed from its wall plate to be used as a handheld remote control.

## OPERATING INSTRUCTIONS

### Button Functionality

The Tap Dial Switch features four programmable buttons. Each button can be assigned to activate specific light scenes or control lights in different rooms or zones within your Philips Hue system.

- **Custom Scenes:** Program each button to set a unique scene, such as "Relax," "Concentrate," or "Nightlight."
- **Room/Zone Control:** Assign buttons to control lights in specific areas of your home. For example, one button for the living room and another for the kitchen.
- **24-Hour Scenes:** Utilize features like Natural Light, which adjusts light color and brightness throughout the day.

# Set and adjust light scenes instantly

*Image: A user interacting with the Tap Dial Switch to instantly set and adjust light scenes in a room.*

## Dimming and Brightening

The central dial allows for precise control over light intensity:

- **Slow Rotation:** Turn the dial slowly to dim or brighten lights in small increments.
- **Fast Rotation:** Turn the dial quickly for rapid adjustments to light brightness.

# Rotate to dim and brighten easily

## **Controlling Multiple Rooms or Zones**

The Philips Hue app allows you to configure the Tap Dial Switch to manage lighting across various rooms or predefined zones. This enables centralized control over different areas of your home with a single device.

## MAINTENANCE

### Battery Replacement

The Philips Hue Wall Tap Dial Switch is powered by a CR2032 coin cell battery. When the battery is low, the switch may become unresponsive or exhibit inconsistent behavior. To replace the battery:

1. Gently remove the dial from its wall plate or magnetic surface.
2. Locate the battery compartment on the back of the dial.
3. Open the compartment and replace the old CR2032 battery with a new one, ensuring correct polarity.
4. Close the compartment and reattach the dial.

### Cleaning

To clean the switch, wipe it with a soft, dry cloth. Avoid using abrasive cleaners or solvents, as these can damage the finish.

## TROUBLESHOOTING

- **Switch is unresponsive:**

- Check the battery. Replace the CR2032 battery if it is low or depleted.
- Ensure the switch is within range of your Philips Hue Bridge.
- Verify that the Hue Bridge is powered on and connected to your network.

- **Lights do not respond to button presses:**

- Confirm that the lights are powered on and connected to the Hue Bridge.
- Check the Philips Hue app to ensure the switch is properly paired and configured to control the desired lights/scenes.
- Restart the Philips Hue app and the Hue Bridge.

- **Dimming function is erratic:**

- This could indicate a low battery. Try replacing the CR2032 battery.
- Ensure there are no obstructions interfering with the signal between the switch and the Hue Bridge.

- **Switch detached from wall plate:**

- The dial is designed to be removable for use as a remote. To reattach, simply align it with the wall plate and it will snap magnetically into place.
- If the wall plate itself is detaching, ensure the adhesive backing is clean and applied to a smooth, dry surface.

## SPECIFICATIONS

Feature	Detail
Brand	Philips Hue
Model Number	578773
Item Weight	4.2 ounces
Product Dimensions	2.36 x 2.36 x 0.79 inches
Color	Black
Power Source	CR2032 Coin Cell Battery
Connectivity Protocol	ZigBee
Control Method	App
Operation Mode	OFF-NONE-ON
Actuator Type	Rotary
International Protection Rating	IP20
