8. Maintenance

8.1 Cleaning Your TV

To maintain the clarity and longevity of your TV screen, gently wipe it with a soft, dry microfiber cloth. For stubborn smudges, lightly dampen the cloth with water or a screen-cleaning solution specifically designed for electronics. Avoid using harsh chemicals, abrasive cleaners, or spraying liquid directly onto the screen.

8.2 Software Updates

Your JVC Roku TV automatically receives software updates over the internet. Ensure your TV is connected to a stable Wi-Fi network to receive these updates, which provide new features, performance improvements, and security patches. You can manually check for updates in the Roku settings menu under System > Software Update.

9. Troubleshooting

If you encounter issues with your JVC Roku TV, try the following common troubleshooting steps:

Problem	Possible Solution
No Power	Ensure the power cord is securely plugged into both the TV and a working electrical outlet. Try a different outlet.
No Picture / Black Screen	Check that the correct input source is selected. Verify all HDMI or AV cables are securely connected. Try restarting the TV by unplugging it for 30 seconds and plugging it back in.
No Sound	Check the TV volume and ensure it's not muted. Verify external audio devices (soundbar, receiver) are properly connected and powered on. Check audio settings on the TV.
Network Connection Issues	Ensure your Wi-Fi router is on and functioning. Restart your router. Go to Roku settings > Network > Check connection to diagnose and reconnect.
Remote Not Responding	Replace the batteries in the remote. Ensure there are no obstructions between the remote and the TV. For Roku remotes, try re-pairing if it's a voice remote.
