6.2 Cleaning the Filtration System

The vacuum features a Triple Filtration System with a HEPA filter. Regular cleaning is essential for optimal performance:

1. After emptying the dust cup, carefully remove the HEPA filter.
2. Tap the filter gently to dislodge any trapped dust and debris.
3. If necessary, rinse the filter under running water. Ensure it is completely dry before reinserting it into the vacuum.

Triple filtration system

Effectively filters pet hair and dust, expelling clean air.

7. TROUBLESHOOTING

If you encounter any issues with your Brigii Pet Hair Vacuum, please refer to the following common solutions:

- **No Power:** Ensure the battery is fully charged. Connect the USB-C cable and charge for 4 hours.
- **Reduced Suction:** Check if the dust cup is full and empty it. Clean the HEPA filter as described in the Maintenance section. Ensure all attachments are securely fitted.
- **Unusual Noise:** Check for any blockages in the nozzle or attachments. Ensure the dust cup and filter are correctly assembled.
