SETUP AND INSTALLATION

The Veise RZ02A deadbolt is designed for easy installation with a screwdriver. It is compatible with all American standard left and right-handed doors.

1. Door Compatibility Check

Before installation, ensure your door meets the following specifications:

- **Door Thickness:** 1-3/8" to 2" (35mm-50mm)
- **Hole Diameter:** 2-1/8" (54mm)
- **Backset:** 2-3/8" or 2-3/4" (60mm or 70mm)
- **Minimum Distance:** 2-1/8" (41mm) from door edge to center of bore hole
- Compatible with single cylinder deadbolts. Not compatible with mortise/integrated locks.

Check The Door Size Before Purchase

This image illustrates the necessary door measurements and types of latch holes (chiseled or not chiseled) for proper installation. It also shows compatibility with both left-handed and right-handed doors.

2. Installation Process

Follow the detailed installation instructions included in your package. The process typically involves:

1. Installing the latch into the door edge.

2. Mounting the exterior keypad assembly.
3. Installing the interior mounting plate.
4. Connecting the cable and installing the interior assembly.
5. Testing the lock's functionality.

Easy Install & Program

This image demonstrates the ease of installation, requiring only a screwdriver. The lock automatically identifies door handing (left or right) during setup.

Usage tips for different members

People with clear fingerprints are recommended to use **fingerprint** unlocking.

The senior, children and users with indistinct fingerprints are recommended to use a **passcode or key**.

5. Auto-Lock and One-Touch Locking

- **Auto-Lock:** The deadbolt can be set to automatically lock after 10-99 seconds once the door is closed.
- **One-Touch Locking:** Press and hold any key for 2 seconds to manually lock the door from the outside.

This image illustrates the auto-lock feature, which automatically secures the door after a set period, providing convenience when hands are full.

The auto-lock feature provides enhanced security by automatically locking the door within 10-99 seconds after it closes.

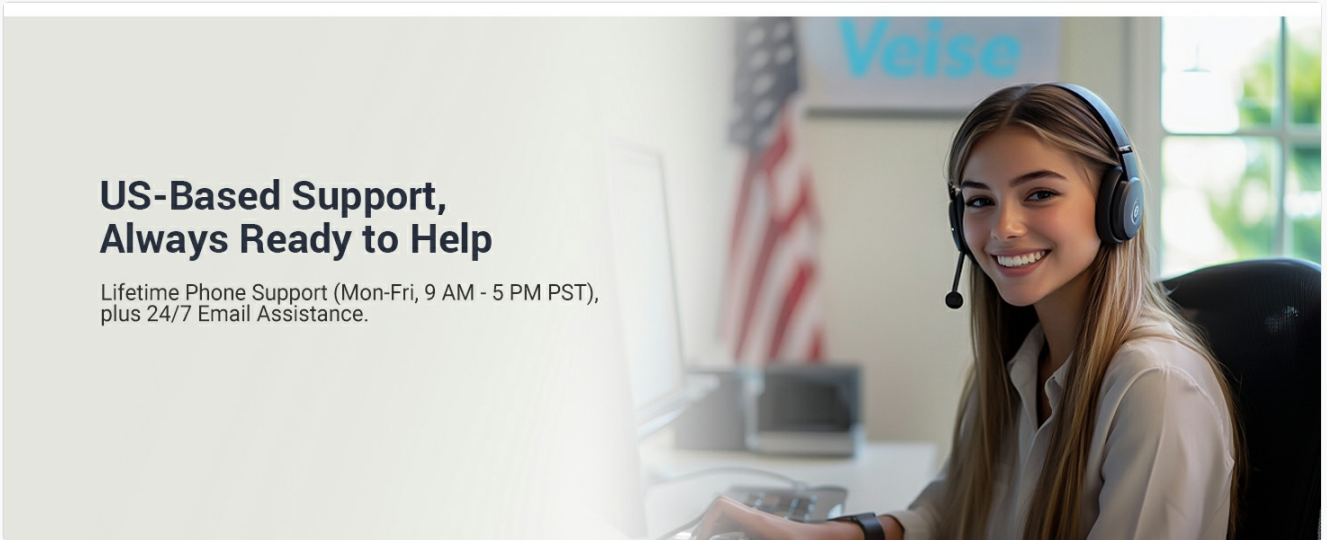

One-touch locking allows for quick manual locking by pressing any key for 2 seconds.

6. Security Features

- **Wrong Code Protection:** After 10 incorrect code attempts, the lock will enter a 3-minute lock-up period.
- **Vacation Mode:** Activates an alert if anyone attempts to unlock the door from either outdoor or indoor, providing an extra layer of security when you are away.
- **Mute Mode:** Disables keypad beeping sounds for quiet operation.

The lock features wrong code protection, initiating a 3-minute lock-up after 10 incorrect attempts.

Silent mode eliminates keypad beeping sounds for discreet operation.

Vacation mode provides an alert if any attempt is made to unlock the door, enhancing security while you are away.

7. Usage Tips for Different Members

This image provides recommendations for different users: fingerprint unlocking for clear prints, passcode or key for seniors/children/indistinct prints, one-time codes for visitors, and notes that no app/Wi-Fi is required, making it user-friendly for all ages.

MAINTENANCE

1. Battery Replacement

The Veise RZ02A deadbolt is powered by four AA batteries (not included). It features a low battery alert to notify you when replacement is needed. Battery life can last up to one year under normal usage.

This image highlights the low battery alert and backlit keypad, indicating an approximate one-year battery life with 4 AA batteries (not included).

2. Cleaning

Clean the lock's exterior with a soft, damp cloth. Avoid abrasive cleaners or solvents that could damage the finish or electronic components.

TROUBLESHOOTING

- **Lock not responding:** Check battery levels. Replace batteries if the low battery alert is active or if the keypad

is unresponsive.

- **Fingerprint not recognized:** Ensure your finger is clean and dry. Re-register your fingerprint if recognition issues persist.
- **Keypad not working:** Verify battery power. If the lock is in a 3-minute lock-up due to too many incorrect attempts, wait for the timer to expire.
- **Auto-lock not engaging:** Check the auto-lock settings in your programming instructions to ensure it is enabled and the delay time is set correctly.
- **Lock mechanism stiff:** Ensure the latch and strike plate are properly aligned and lubricated if necessary. Avoid over-tightening mounting screws.
