AAWireless AAW002

AAWireless - Wireless Android Auto Dongle User Manual

Model: AAW002

PRODUCT OVERVIEW

The AAWireless Wireless Android Auto Dongle provides a seamless, cable-free experience for using Android Auto in your vehicle. This device eliminates the need for a wired connection, allowing your smartphone to connect automatically to your car's infotainment system via Bluetooth and Wi-Fi.

Connects Automatically

Made in Europe

Image: The AAWireless dongle plugged into a car's USB port, ready for connection.

2. **Initial Bluetooth Pairing:** On your smartphone, enable Bluetooth and search for the AAWireless device (e.g., "AndroidAuto-AAW..."). Pair your phone with the dongle. This step is typically only required for the very first setup.

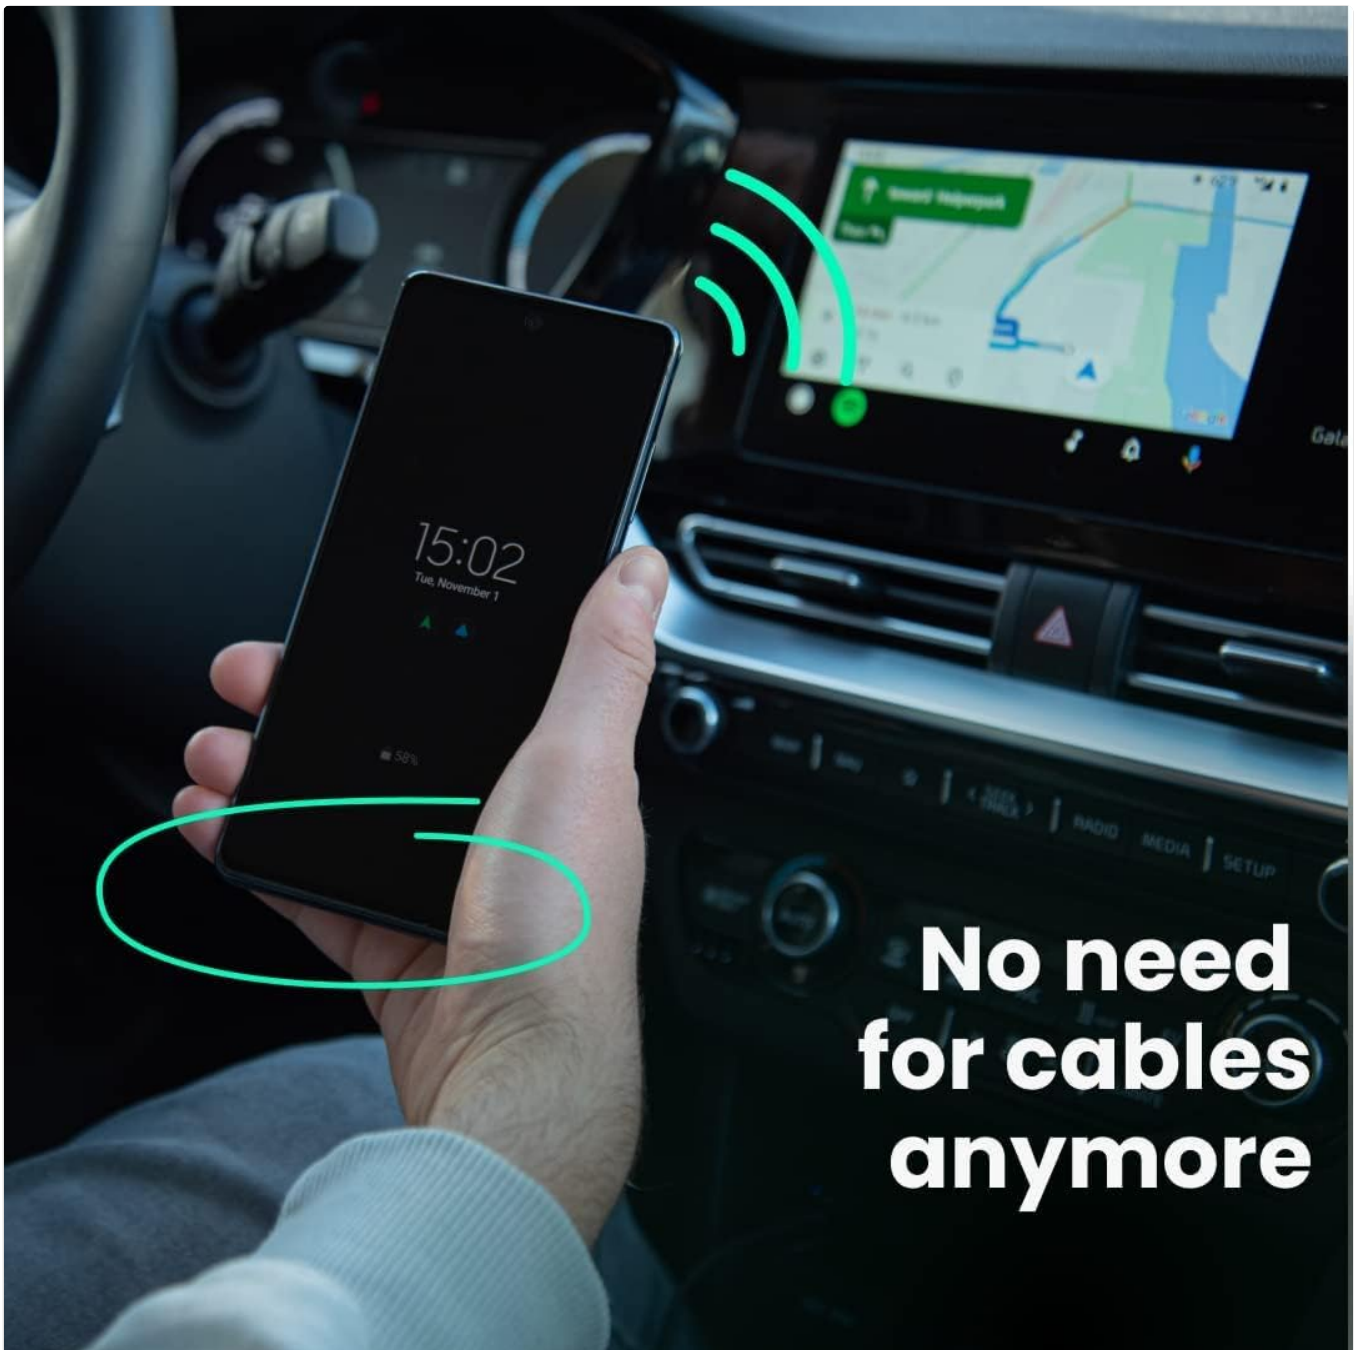

Image: A smartphone screen showing a wireless connection to the car's Android Auto display, illustrating the cable-free experience.

3. **Automatic Connection:** Once paired, your phone will automatically connect to Android Auto wirelessly whenever you start your car. The dongle establishes a Wi-Fi connection for data transfer after the initial Bluetooth handshake.

**Connects
automatically and is
completely wireless**

Image: A hand holding the AAWireless dongle in a car, with the car's display showing Android Auto, emphasizing automatic wireless connection.

Note: Ensure your vehicle or aftermarket head unit supports wired Android Auto for the AAWireless dongle to function. Your smartphone must be Android compatible with an active data plan and running Android 11 or higher.

OPERATING INSTRUCTIONS

After successful setup, operating your AAWireless dongle is straightforward:

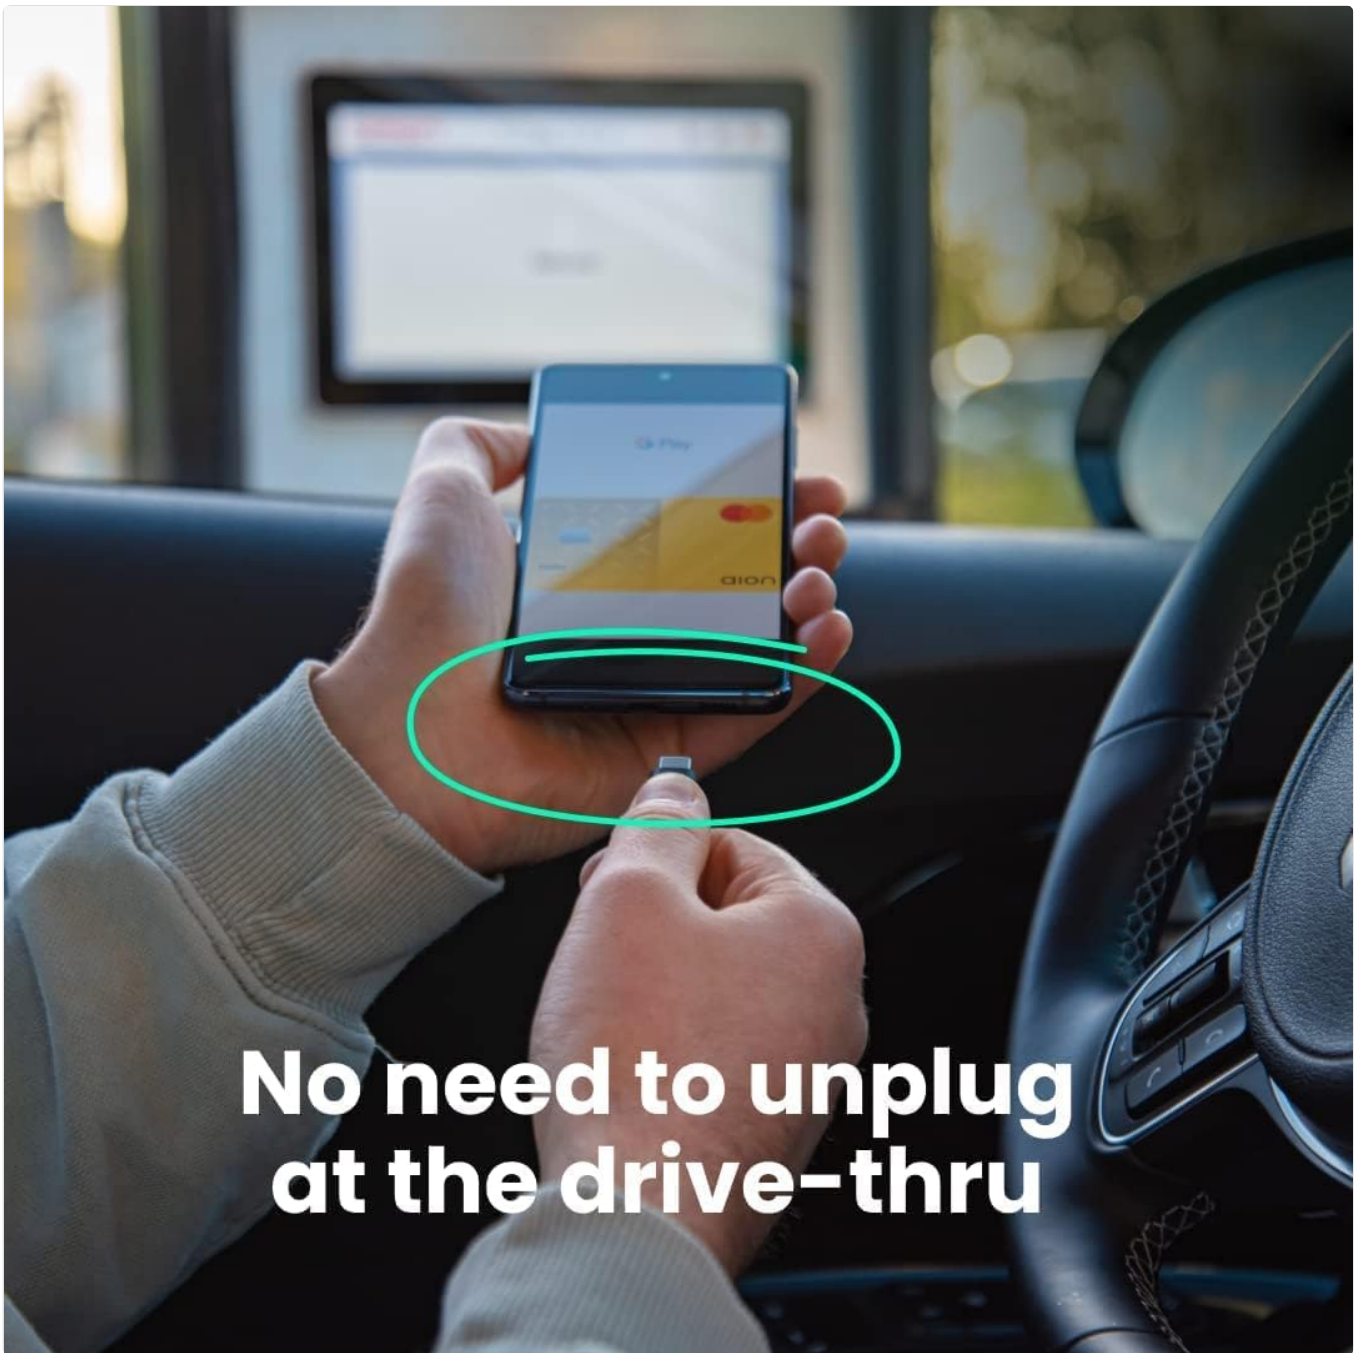

- **Automatic Start:** The dongle will automatically activate Android Auto on your car's display when you start the vehicle and your paired phone is nearby.

Call.
Stream.
Navigate.
**Completely
wireless!**

Image: A car's infotainment screen displaying various Android Auto applications like navigation, calls, and music streaming, all operating wirelessly.

- **Using Android Auto:** Interact with Android Auto as you normally would, using your car's touchscreen, steering wheel controls, or voice commands. All functions, including navigation, music streaming, and calls, will operate wirelessly.

No need to unplug at the drive-thru

Image: A person in a car holding their smartphone, demonstrating that there is no need to plug or unplug the phone, even during short stops like a drive-thru.

- **Phone Placement:** With wireless connectivity, you can keep your phone in your pocket, bag, or any convenient location within the vehicle.

Keep your phone wherever you want

COMPANION APP

The AAWireless companion app provides additional features and control over your device:

- **Customization:** Adjust settings and preferences for your Android Auto experience.
- **Firmware Updates:** Keep your AAWireless device up-to-date with the latest firmware for optimal performance and compatibility.
- **Troubleshooting:** Access tools and information to help resolve common issues.
- **Connection Management:** Manage paired devices and connection settings.

Free companion app

The companion app is available for free download on your smartphone's app store.

MAINTENANCE

The AAWireless dongle requires minimal maintenance:

- **Cleaning:** Wipe the device with a soft, dry cloth to remove dust. Do not use liquid cleaners or abrasive materials.
- **Storage:** Store the device in a cool, dry place when not in use.
- **Firmware Updates:** Regularly check for and install firmware updates via the companion app to ensure optimal performance and compatibility.

TROUBLESHOOTING

If you encounter issues with your AAWireless dongle, consider the following steps:

- **No Connection:**
 - Ensure the dongle is securely plugged into the car's USB port.
 - Verify that your car's head unit supports wired Android Auto.
 - Check if Bluetooth is enabled on your phone and it is paired with the AAWireless device.
 - Restart your phone and/or your car's infotainment system.
- **Intermittent Connection:**
 - Ensure there are no other strong Wi-Fi or Bluetooth signals interfering.
 - Update the dongle's firmware using the companion app.
 - Try a different USB cable if available, though the provided one is recommended.
- **Audio Issues:**
 - Check your car's audio source settings.
 - Ensure your phone's volume is up.
- **Companion App Issues:**
 - Ensure your phone has an active internet connection.
 - Update the app to the latest version.
- **Resetting the Device:** If issues persist, locate the small 'RESET' button on the dongle (often recessed, requiring a paperclip to press) and press it briefly to factory reset the device. You will need to re-pair it after a reset.

For more detailed troubleshooting, refer to the official AAWireless support resources or the companion app.
