5.1 General Cleaning

- Always unplug the oven from the power outlet before cleaning.
- Clean the oven cavity, door, and door seals regularly with a damp cloth and mild detergent.
- Do not use abrasive cleaners, steel wool, or harsh chemicals, as these can damage the surfaces.
- For stubborn food residues, place a bowl of water with lemon slices inside the oven and microwave on high for 5-10 minutes. The steam will loosen the residue, making it easier to wipe away.

5.2 Turntable and Grill Grate

The glass turntable and metal grill grates can be removed for cleaning. Wash them in warm, soapy water or in a dishwasher. Ensure they are completely dry before placing them back in the oven.

5.3 Exterior Cleaning

Wipe the exterior surfaces with a soft, damp cloth. For stainless steel parts, use a specialized stainless steel cleaner if necessary, wiping in the direction of the grain.

6. TROUBLESHOOTING

Problem	Possible Cause	Solution
Oven does not start.	Power cord not plugged in; Door not closed properly; Fuse blown or circuit breaker tripped.	Ensure plug is firmly in outlet; Close door securely; Check household fuse/circuit breaker.
Food not cooking evenly.	Food not stirred or turned; Turntable not rotating.	Stir or turn food halfway through cooking; Ensure turntable and roller ring are correctly placed and clean.
Excessive steam inside oven.	High moisture content in food.	This is normal for some foods. Wipe interior after use.
Oven light not working.	Light bulb needs replacement.	Contact qualified service personnel for bulb replacement. Do not attempt to replace yourself.

If the problem persists after attempting these solutions, please contact Severin customer support.
