

OUPINKE L3183

OUPINKE L3183 Women's Automatic Watch Instruction Manual

Model: L3183

INTRODUCTION

This manual provides essential information for the proper use, care, and maintenance of your OUPINKE L3183 Women's Automatic Watch. This timepiece features an automatic mechanical movement, diamond accents, a skeleton dial design, a durable ceramic and stainless steel band, and sapphire crystal. Please read these instructions carefully to ensure optimal performance and longevity of your watch.

SETUP

1. Unboxing

Your OUPINKE L3183 watch comes presented in a protective gift box. Carefully remove the watch and any accompanying accessories from the packaging.

Image: The OUPINKE L3183 watch and a matching bracelet displayed within its red gift box.

2. Initial Winding

The L3183 is an automatic mechanical watch. It is powered by the motion of your wrist. If the watch has stopped or its power reserve is low, it may require manual winding to start. To manually wind, rotate the crown clockwise approximately 20-30 times while it is in its normal, pushed-in position. This will build up an initial power reserve.

3. Setting the Time

1. Pull the crown out to the first position.
2. Rotate the crown to set the hour and minute hands to the correct time.
3. Once the time is set, push the crown back into its normal position.

4. Adjusting the Strap

The watch features a ceramic and stainless steel strap with a push-button hidden clasp. If the strap requires adjustment (e.g., link removal or addition), it is recommended to seek assistance from a professional watchmaker to avoid damage.

DESIGN 03

DELICATE LUGS

The strap is made of high-quality ceramics
With solid stainless steel,
comfortable to wear

DESIGN 04

BUTTERFLY DOUBLE SNAP

Clasp fish scale design, equipped
with high-quality spring
Durable and long life

OPERATING THE WATCH

1. Automatic Movement

Your OUPINKE L3183 watch is equipped with an imported automatic mechanical movement. This movement self-winds through the natural motion of your arm while wearing the watch. Regular daily wear will keep the watch wound. If the watch is not worn for an extended period, it may stop and require manual winding as described in the Setup section.

2. Luminous Display

The watch hands feature a luminous coating, allowing for time readability in low-light conditions after exposure to light.

3. Water Resistance

The OUPINKE L3183 watch is water-resistant to 50 meters (164 feet). This means it can withstand splashes, rain, and brief immersion in water, such as during hand washing. It is **not** suitable for showering, swimming, diving, or any activities involving prolonged water exposure or high-pressure water.

MAINTENANCE

1. Cleaning

Wipe the watch case and strap regularly with a soft, dry cloth to remove dust and smudges. For the ceramic parts, a slightly damp cloth can be used, followed by a dry cloth. Avoid using harsh chemicals or abrasive materials.

2. Storage

When not wearing the watch, store it in a cool, dry place away from direct sunlight and extreme temperatures. The original gift box can serve as an ideal storage solution.

3. General Care

- Avoid exposing the watch to strong magnetic fields, as this can affect the accuracy of the mechanical movement.
- Do not expose the watch to sudden temperature changes.
- Ensure the crown is always fully pushed in to maintain water resistance.
- The sapphire crystal lens is highly scratch-resistant, but not entirely scratch-proof. Avoid unnecessary impact.

TROUBLESHOOTING

1. Watch Not Running

If the watch has stopped, it may have run out of power reserve. Manually wind the watch by rotating the crown clockwise 20-30 times. Wear the watch regularly to keep the automatic movement charged.

2. Inaccurate Time

Minor deviations in timekeeping are normal for mechanical watches. However, if the watch is consistently inaccurate, ensure it has sufficient power reserve. Exposure to strong magnetic fields can also affect accuracy; keep the watch away from magnets. If issues persist, contact customer support.

3. Condensation or Water Inside

If you notice condensation under the crystal or water ingress, immediately stop using the watch and contact customer support. Do not attempt to open the watch yourself.

SPECIFICATIONS

Model Number	TYG-OU-L3183GM-MF
Movement	Automatic Mechanical
Case Material	Rose Gold Tone
Band Material	Ceramic and Stainless Steel
Crystal	Sapphire (Mohs 9 hardness)
Water Resistance	50 meters (164 feet)
