Jambo KL-217

Jambo 16-inch Liquid Motion Lamp (Model KL-217) User Manual

Model: KL-217

INTRODUCTION

Thank you for choosing the Jambo 16-inch Liquid Motion Lamp. This manual provides essential information for the safe and proper use, setup, operation, and maintenance of your lamp. Please read it thoroughly before use and retain it for future reference.

Jambo 16-inch Liquid Motion Lamp with blue base and cap, purple liquid, and orange wax.

The Jambo Liquid Motion Lamp creates a mesmerizing visual display as heated wax slowly rises and falls within a liquid-filled glass vessel. This dynamic effect provides a calming and decorative ambiance for any indoor space.

SAFETY INFORMATION

To ensure safe operation and prevent damage, please observe the following safety precautions:

- **Indoor Use Only:** This lamp is designed for indoor use in dry locations. Do not use it outdoors or in wet environments.
- **Electrical Safety:** Ensure the lamp is connected to a 120-volt power outlet. Do not overload electrical outlets.
- **Heat Warning:** The lamp and its contents become hot during operation. Do not touch the glass or base while the lamp is on or immediately after turning it off. Allow sufficient time for cooling.
- **Stable Placement:** Place the lamp on a flat, stable, and heat-resistant surface away from edges where it could be easily knocked over.
- **Avoid Shaking:** Do not shake, drop, or move the lamp while it is operating or hot, as this can damage the internal components and cause the liquid to become cloudy.
- **Keep Away from Children and Pets:** Due to the heat generated, keep the lamp out of reach of children and

pets.

- **Ventilation:** Ensure adequate air circulation around the lamp to prevent overheating. Do not cover the lamp.
- **Damaged Cord:** If the power cord is damaged, it must be replaced by the manufacturer or a qualified service agent to avoid hazards.

PACKAGE CONTENTS

Verify that all components are present upon unpacking:

- 1 x Jambo Liquid Motion Lamp Unit (Base, Glass Vessel, Cap)
- 1 x 30-Watt Incandescent Bulb (E17 base)

Components of the Jambo Liquid Motion Lamp, including the glass vessel, base, cap, and bulb.

SETUP

Follow these steps to set up your Jambo Liquid Motion Lamp:

1. **Unpack:** Carefully remove all components from the packaging.
2. **Bulb Installation:** If the bulb is not pre-installed, gently screw the included 30-watt E17 incandescent bulb into

the socket located in the lamp base. Do not overtighten.

3. **Place Glass Vessel:** Carefully place the glass vessel onto the lamp base, ensuring it sits securely.
4. **Attach Cap:** Place the decorative cap onto the top of the glass vessel.
5. **Position Lamp:** Place the assembled lamp on a flat, stable, and heat-resistant surface, away from direct sunlight, extreme temperatures, or drafts.
6. **Connect Power:** Plug the power cord into a standard 120-volt electrical outlet.

READY TO USE

Just plug it in and be amazed by the magical qualities of your Jambo Lamp!

QUALITY COMMITMENT

We are dedicated to exceptional products and customer satisfaction

SETTING THE STANDARD

JAMBO. Proud pioneers of top quality lamps that provide beauty, performance, and durability

The Jambo Liquid Motion Lamp is ready for use after simple assembly and plugging into a power source.

OPERATING INSTRUCTIONS

Operating your Jambo Liquid Motion Lamp is straightforward:

1. **Turn On:** Locate the rotary switch on the power cord or base (depending on model) and turn it to the 'ON' position. The bulb will illuminate.
2. **Warm-up Time:** For the first use, or after extended periods of inactivity, the lamp may take 2-4 hours to fully warm up and for the wax to begin flowing smoothly. This is normal.
3. **Wax Movement:** Once warmed, the wax will begin to soften, rise, and fall in captivating patterns. The lamp operates best at room temperature (20-25°C / 68-77°F).

4. **Operating Duration:** For optimal performance and longevity, it is recommended to operate the lamp for no more than 8-10 hours at a time. Allow it to cool down completely before restarting.
5. **Turn Off:** To turn off the lamp, rotate the switch to the 'OFF' position and unplug it from the power outlet when not in use for extended periods.

The Jambo Liquid Motion Lamp creating a calming ambiance in a room.

The Jumbo Liquid Motion Lamp as a decorative accent in a modern living space.

MAINTENANCE

Proper care will ensure the longevity and performance of your lamp:

- **Cleaning:** Ensure the lamp is unplugged and completely cool before cleaning. Wipe the exterior of the glass and base with a soft, damp cloth. Do not use abrasive cleaners or immerse any part of the lamp in water.
- **Bulb Replacement:** If the bulb burns out, unplug the lamp and allow it to cool. Carefully remove the old bulb and replace it with a new 30-watt, E17 base incandescent bulb. Ensure the replacement bulb matches the original specifications.
- **Storage:** If storing the lamp for an extended period, ensure it is clean, dry, and stored upright in a cool, dark place.
- **Do Not Open:** Never attempt to open the sealed glass vessel or tamper with its contents. This will void any warranty and can be dangerous.

TROUBLESHOOTING

If you encounter issues with your Jumbo Liquid Motion Lamp, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Lamp does not turn on.	No power, faulty bulb, or loose connection.	Check if the lamp is properly plugged in. Ensure the power outlet is functional. Verify the rotary switch is in the 'ON' position. Replace the bulb if it is burnt out.
Wax is not moving or moving slowly.	Insufficient warm-up time, cold room temperature, or incorrect bulb wattage.	Allow 2-4 hours for the lamp to fully warm up. Ensure the room temperature is between 20-25°C (68-77°F). Confirm the bulb is a 30-watt E17 incandescent type.
Liquid is cloudy.	Initial cloudiness, lamp shaken, or improper storage.	Initial cloudiness often clears after several hours of continuous operation. Avoid shaking or dropping the lamp. If cloudiness persists after multiple uses, contact customer support.
Wax is stuck at the top or bottom.	Not fully warmed up, lamp tilted, or excessive heat/cold.	Ensure the lamp has had sufficient warm-up time. Verify the lamp is placed on a level surface. Avoid placing the lamp near heat sources or in very cold areas.

SPECIFICATIONS

Key technical specifications for the Jambo 16-inch Liquid Motion Lamp (Model KL-217):

Feature	Detail
Model Number	KL-217
Dimensions (D x W x H)	11.4 cm x 11.4 cm x 39.4 cm (approx. 4.5 x 4.5 x 15.5 inches)
