# FK Irons EXO Modular Rotary Tattoo Machine Pen - User Manual

Model: 00801-00-BLK-3.2

## PRODUCT OVERVIEW

---

The FK Irons EXO is a versatile modular rotary tattoo machine designed for professional use. It offers the flexibility to switch between a traditional RCA connection and a wireless battery-operated setup, providing artists with enhanced freedom and control.

Detail of the EXO machine's grip, designed for comfort during extended use.

### Key Features:

- **Modular Design:** Easily switch between RCA and wireless PowerBolt battery connection.
- **Powerful Motor:** Equipped with a 9W brushless motor for consistent performance.
- **Ergonomic Grip:** Features a large 40mm grip for enhanced comfort during long sessions.
- **Versatile Application:** Ideal for bold lining work, color packing, and solid color applications.
- **Reduced Skin Trauma:** Designed to saturate ink efficiently, minimizing trauma to the skin.

### SAFETY INFORMATION

---

This product is intended for professional tattoo use only. Adherence to proper sterilization and safety protocols is paramount to prevent injury and infection.

- For external use only.
- Ensure the work area and all equipment are thoroughly sterilized before beginning any tattoo procedure.

- Always follow local and national health and safety guidelines for tattooing.

## SETUP

The FK Irons EXO offers flexible setup options, allowing you to choose between a traditional wired connection or a wireless battery setup.

Exploded view of the FK Irons EXO components, showing the RCA module, PowerBolt battery, and the main body/grip.

Diagram illustrating the two primary setup configurations: wireless with PowerBolt and traditional with RCA adapter.

## Assembly Instructions:

1. **Prepare the Machine:** Ensure all components are clean and sterilized before assembly.
2. **Choose Connection Type:**
  - **For Wireless Operation:** Attach the PowerBolt battery pack (sold separately) to the main body of the machine. Ensure it clicks securely into place.
  - **For Wired Operation:** Attach the RCA module to the main body of the machine. Connect your RCA cable from a compatible power supply to the RCA module.
3. **Attach Grip:** Securely twist the ergonomic grip onto the machine body.
4. **Insert Cartridge Needle:** Insert your desired cartridge needle into the machine. Ensure it is properly seated and locked.
5. **Adjust Needle Depth:** Rotate the grip to adjust the needle depth to your preference. The ratcheted system provides precise control.

## OPERATING INSTRUCTIONS

Operating the FK Irons EXO is straightforward, whether you are using the wireless PowerBolt or a traditional RCA connection.

### PowerBolt Operation (Wireless):

1. **Charge PowerBolt:** Ensure your PowerBolt battery pack is fully charged via its USB-C port before use. A full charge provides up to 10 hours of tattooing.
2. **Power On:** Press and hold the power button on the PowerBolt to turn the machine on. The LED indicator will illuminate.
3. **Adjust Voltage:** Use the up and down arrows on the PowerBolt to adjust the voltage to your desired setting. The LED display indicates the current voltage.
4. **Bluetooth Connectivity:** The PowerBolt can connect via Bluetooth to the Darklab app for additional controls and firmware updates.
5. **Power Off:** Press and hold the power button to turn the machine off when finished.

### RCA Operation (Wired):

1. **Connect Power Supply:** Connect your RCA cable from a compatible tattoo power supply to the RCA module on the machine.
2. **Power On/Adjust:** Control the machine's power and voltage directly from your external power supply.

General Usage Tips:

- The 9-watt brushless motor provides consistent power for various tattooing styles.
- The forward-weighted design aids in applying downward needle pressure, which is beneficial for lining and color packing.
- The machine is designed to take fewer passes to saturate ink, contributing to reduced skin trauma.

### THE SUM OF ITS PARTS

**Ideal for lining, colot packing, and solid color works.**

It takes less passes to saturate ink, reducing skin trauma.

The FK Irons EXO is optimized for efficient ink saturation, reducing the need for multiple passes and minimizing skin trauma.

MAINTENANCE

Proper maintenance ensures the longevity and optimal performance of your FK Irons EXO machine.

- **Cleaning:** After each use, thoroughly clean the exterior of the machine with a suitable disinfectant. Do not immerse the machine in liquids.
- **Sterilization:** Ensure all parts that come into contact with skin or ink are properly sterilized according to professional tattooing standards.
- **Lubrication:** Refer to the official FK Irons website or support documentation for specific lubrication requirements, if any.
- **Storage:** Store the machine in a clean, dry, and safe environment when not in use.
- **PowerBolt Care:** Keep the PowerBolt battery pack charged and avoid extreme temperatures.

TROUBLESHOOTING

This section addresses common issues you might encounter with your FK Irons EXO machine.

Problem	Possible Cause	Solution
Machine not turning on (PowerBolt)	Battery is depleted; PowerBolt not securely attached.	Charge the PowerBolt battery; Ensure PowerBolt is fully seated and clicked into place.

Problem	Possible Cause	Solution
Machine not turning on (RCA)	RCA cable or power supply issue; RCA module not securely attached.	Check RCA cable and power supply connections; Ensure RCA module is fully seated.
Inconsistent needle movement	Needle cartridge not properly seated; Low voltage setting.	Re-seat the needle cartridge; Increase voltage setting on PowerBolt or external power supply.
Machine feels hot during operation	Prolonged continuous use; High voltage setting.	Allow the machine to cool down; Consider reducing voltage if performance is not affected.

If you encounter issues not listed here, please contact FK Irons customer support for assistance.
