

BRITA OB46/OB03

Brita Large 10-Cup Water Filter Pitcher with SmartLight Indicator (Model OB46/OB03) Instruction Manual

1. INTRODUCTION

This manual provides essential information for the proper setup, operation, and maintenance of your Brita Large 10-Cup Water Filter Pitcher. Designed to provide cleaner, great-tasting tap water, this pitcher features a SmartLight indicator for convenient filter tracking and is made without BPA.

Image 1.1: Brita Large 10-Cup Water Filter Pitcher with included filter and packaging.

2. SETUP

1. **Unpack Components:** Remove all parts from the packaging: pitcher, lid, and filter.
2. **Wash Pitcher:** Hand-wash the pitcher and lid with mild detergent and rinse thoroughly. Do not wash the filter in a dishwasher.
3. **Prepare Filter:** Submerge the new Brita Standard filter in cold water for 15 seconds to remove loose carbon particles and air bubbles.
4. **Insert Filter:** Align the groove on the filter with the ridge in the pitcher's reservoir. Press the filter firmly into the reservoir until it clicks into place.
5. **Initial Filtration:** Fill the reservoir with cold tap water. Discard the first two pitchers of filtered water or use them for plants. This primes the filter.

How Brita Original™ Filter Works

Ion-Exchange Resin •

Helps to reduce impurities in your water

Activated carbon •

Reduces Chlorine (improves taste & odor)

Built-in mesh screens •

Prevent black flecks

Image 2.1: Proper insertion of the Brita Standard filter into the pitcher's reservoir.

3. OPERATING INSTRUCTIONS

1. **Filling the Pitcher:** Open the easy-fill lid. Place the pitcher under a cold water tap and fill the reservoir. The water will filter through to the main pitcher compartment.
2. **Filtering Process:** Allow the water to pass through the filter completely before pouring. This ensures optimal filtration.
3. **Pouring Water:** Once filtered, simply tilt the pitcher to pour clean water from the spout.

Save More with Brita Original™

Zero Water
\$18.30
per month*

Bottled
\$29.17
per month*

Brita
Original™
\$5.26
per month*

* Calculated based on the list price on Amazon as of 9/25/24 for pitchers and replacement filters. Bottled water is calculated based on the avg cost of a 16.9fl oz. single use plastic water bottle via IRI for 52 weeks ended 6/16/24. Assumes average household usage of 11 cups per day, or 240 gallons per year.

4. MAINTENANCE

4.1 Cleaning

Regular cleaning of your Brita pitcher is recommended. Hand-wash all parts (except the filter) with mild soap and water. Rinse thoroughly. The pitcher is not dishwasher safe.

4.2 Filter Replacement

For best results, replace your Brita Standard water filter every 40 gallons or approximately every 2 months. The SmartLight indicator on the lid will help you track filter life.

Brita Original™ Filter Reduces Contaminants*

- Chlorine
- Mercury
- Cadmium
- Copper
- Zinc

*See performance data sheet on Brita™ website for details.
Substances reduced may not be in all users' water

5. SMARTLIGHT INDICATOR

The Brita SmartLight indicator on the lid provides a visual cue for when to change your filter:

- **Green Light:** Filter is in good condition.
- **Yellow Light:** Filter needs to be changed soon. Prepare a new filter.
- **Red Light:** Filter needs to be changed. Replace the filter immediately for optimal performance.

To reset the SmartLight indicator after replacing the filter, press and hold the reset button on the lid for 5 seconds until the green light flashes.

Certifications Matter

All Brita™ products are certified by the **Water Quality Association**

All Brita™ filters are put through rigorous testing to meet **NSF/ANSI standards**: the industry gold standard

Brita Elite™ is **certified to remove 99% of lead** and meet NSF/ANSI Standards 53, 42 and 401.

*See performance data sheet on Brita™ website for details

6. TROUBLESHOOTING

- **Slow Filtration:** Ensure the filter is properly seated. If the issue persists, the filter may be clogged and require replacement.
- **Water Taste/Odor:** If the filtered water still has an undesirable taste or odor, ensure the filter was properly primed (discarding the first two pitchers). If the problem continues, replace the filter.
- **SmartLight Indicator Not Working:** Check if the battery is depleted. Some models have replaceable batteries. If not, contact customer support.
- **Water Leaks:** Verify that all components, especially the filter and lid, are correctly assembled and securely in place.

7. SPECIFICATIONS

Feature	Detail
Product Dimensions	10.95"L x 10.83"W x 6.06"H

Weight	2.23 Pounds
Model Number	OB46/OB03
Capacity	10 Cups
Material	BPA-Free Plastic
Special Feature	SmartLight Change Filter Indicator
Supported Water TDS Level Maximum	600 PPM
