# Solo Stove Yukon 27 Inch Smokeless Fire Pit User Manual

Model: YUKON 2.0

Brand: Solo Stove

## 1. INTRODUCTION

The Solo Stove Yukon 27 Inch Smokeless Fire Pit is designed to provide a cozy, smoke-free outdoor fire experience. Its innovative airflow design efficiently burns off smoke, ensuring a comfortable environment free from smoke and lingering odors. Crafted from premium 304 stainless steel, the Yukon 2.0 offers durability and performance for years of enjoyment. This manual provides essential information for the safe and effective use and maintenance of your fire pit.

## 2. PRODUCT COMPONENTS

The Solo Stove Yukon 2.0 includes the following components:

- **Yukon Fire Pit:** The main stainless steel fire pit body.
- **Removable Base Plate:** Supports the wood and allows ash to fall through.
- **Removable Ash Pan:** Collects ash for easy disposal.
- **Yukon Stand:** Elevates the fire pit to reduce heat transfer to surfaces.

### 3. SETUP AND PLACEMENT

The Solo Stove Yukon 2.0 is designed for easy setup and portability.

1. **Assembly:** Place the Yukon Stand on a stable, non-combustible surface. Position the Yukon Fire Pit securely on top of the stand. Ensure the removable base plate and ash pan are correctly seated inside the fire pit.
2. **Placement:** Choose a flat, level outdoor area away from flammable structures, overhanging trees, or other combustible materials. The Yukon Stand helps reduce heat stress on sensitive surfaces like wooden decks or grass, but always exercise caution.
3. **Portability:** Weighing just over 43 pounds, the fire pit is portable for various outdoor activities. A travel bag (often sold separately) can facilitate transport for camping trips or beach gatherings.

## 4. OPERATING INSTRUCTIONS

---

Follow these steps for a successful and enjoyable fire:

1. **Fuel:** Use only dry, seasoned firewood. Avoid using accelerants.
2. **Loading Wood:** Stack wood inside the fire pit, ensuring the top of the wood remains below the upper air vents. This is crucial for the smokeless operation.
3. **Lighting:** Light the fire using kindling. The fire pit lights easily with standard fire-starting techniques.
4. **Smokeless Operation:** Once the fire is established and hot, the innovative 360-degree airflow design will draw air through the bottom vents, heat it between the double walls, and then release it through the top vents. This secondary burn process re-burns smoke particles, resulting in a significantly reduced smoke output.
5. **Heat Output:** The fire pit generates substantial heat, primarily upwards. For enhanced sideways heat distribution, a heat deflector accessory (sold separately) may be used.

## 5. MAINTENANCE AND CARE

---

Proper maintenance ensures the longevity and performance of your Solo Stove Yukon 2.0.

- **Ash Removal:** The removable ash pan and base plate simplify cleanup. Once the fire is completely out and cooled, lift the base plate and ash pan to easily dispose of residual ash.
- **Cleaning:** Wipe down the exterior with a damp cloth. Avoid abrasive cleaners that could scratch the stainless steel finish.
- **Storage:** Store the fire pit in a dry, covered area when not in use. A protective cover (sold separately) is recommended to shield it from elements and prolong its aesthetic appeal.
- **Discoloration:** Over time, the stainless steel may develop a unique patina or discoloration due to heat exposure. This is a normal characteristic of stainless steel fire pits and does not affect performance.

## Full Assortment of Accessories

### Shield

Keep pops and embers from escaping with the tool built for safe burns.

### Heat Deflector

Solo Stove's signature heat redirected for more fireside warmth.

### Lid

## 6. TROUBLESHOOTING

- **Initial Smoke:** Some smoke may be present during the initial startup phase until the fire reaches optimal temperature and the secondary burn engages. This is normal.
- **Insufficient Heat:** Ensure you are using dry, seasoned wood. Wet or green wood will produce more smoke and less heat. For wider heat distribution, consider a heat deflector accessory.
- **Excessive Smoke:** Verify that wood is not stacked above the upper air vents. Overfilling the fire pit can impede proper airflow and increase smoke.
- **Hot Exterior:** The exterior of the fire pit can become very hot during use. Always maintain a safe distance and ensure children and pets are kept away.

## 7. SAFETY INFORMATION

- **Fire Alert:** Keep children and pets away from the fire pit when in use and until it has completely cooled down.
- Always use the fire pit on a stable, non-combustible surface.
- Do not use the fire pit indoors or in enclosed spaces.

- Never leave a burning fire unattended.
- Keep a fire extinguisher or water source nearby.
- Allow the fire pit to cool completely before attempting to clean or move it.
