Safety Information

Always read all instructions before using this appliance. Basic safety precautions should always be followed to reduce the risk of fire, electric shock, and injury to persons, including the following:

- Do not touch hot surfaces. Use handles or knobs.
- To protect against electrical shock, do not immerse cord, plugs, or the appliance in water or other liquid.
- Close supervision is necessary when any appliance is used by or near children.
- Unplug from outlet when not in use and before cleaning. Allow to cool before putting on or taking off parts.
- Do not operate any appliance with a damaged cord or plug or after the appliance malfunctions or has been damaged in any manner.
- The use of accessory attachments not recommended by the appliance manufacturer may cause injuries.
- Do not use outdoors.
- Do not let cord hang over edge of table or counter, or touch hot surfaces.
- Do not place on or near a hot gas or electric burner, or in a heated oven.
- Extreme caution must be used when moving an appliance containing hot oil or other hot liquids.
- Always attach plug to appliance first, then plug cord into the wall outlet. To disconnect, turn any control to "off", then remove plug from wall outlet.
- Do not use appliance for other than intended use.

SETUP AND FIRST USE

Before using your Chefman TurboFry Air Fryer for the first time, ensure all packaging materials are removed. Wash the removable basket and tray with warm, soapy water. Wipe the main unit with a damp cloth. Place the air fryer on a stable, heat-resistant surface, away from walls or other appliances to allow for proper air circulation.

Air Frying Made Easy

5 Quart Large Capacity and 60 Minute Easy-Set Timer

OPERATING INSTRUCTIONS

The Chefman TurboFry Air Fryer features simple, intuitive controls for effortless cooking.

Temperature Control

Adjust the temperature using the dial located on the top of the unit. The temperature range is from 200°F to 400°F, allowing for versatile cooking options for various foods.

Easy Set Timer

The simplified 60-minute timer design quick starts your air frying

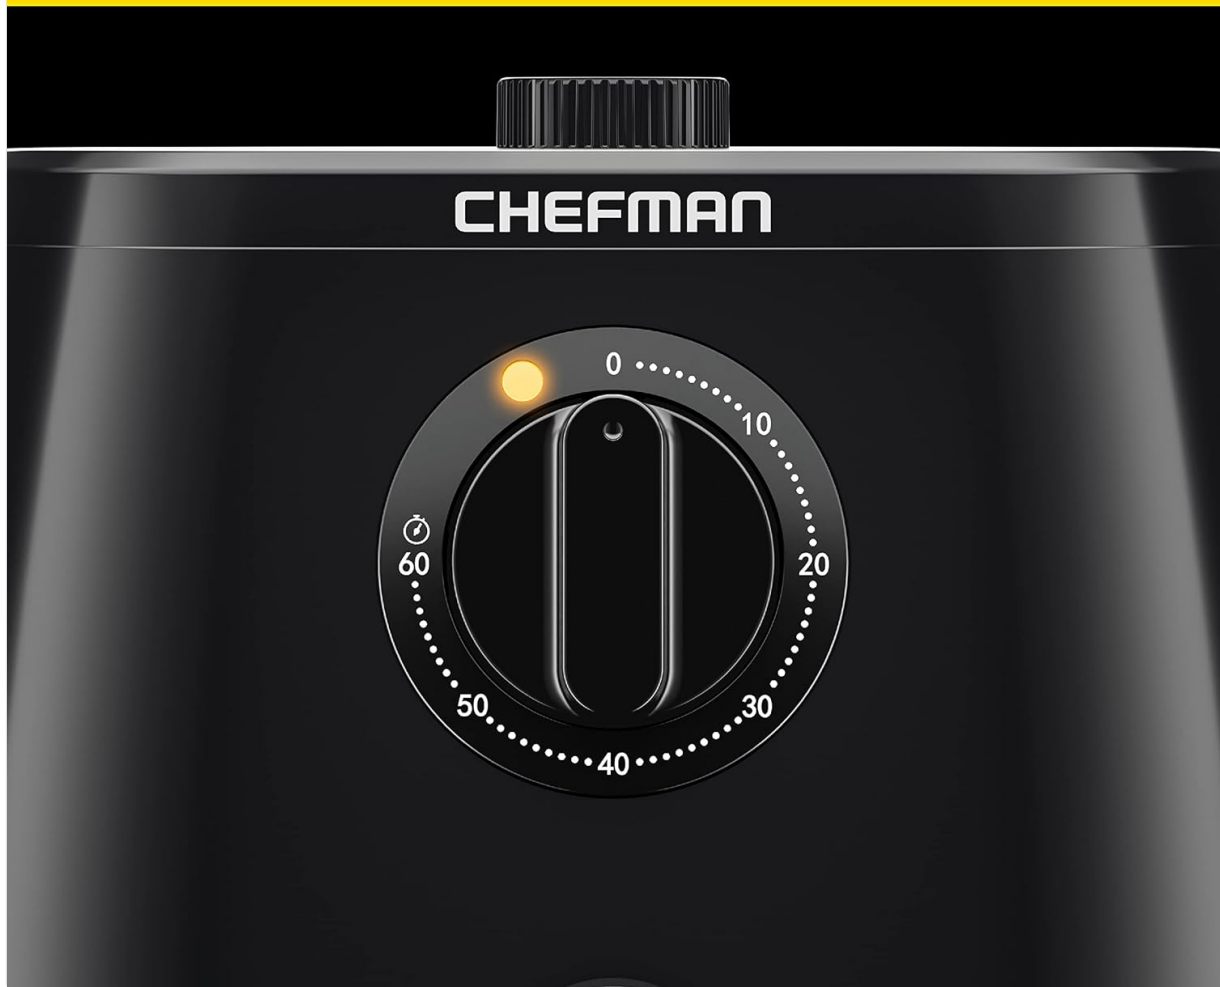

Image: A detailed view of the air fryer's control panel, highlighting the 60-minute timer dial for precise cooking duration.

Timer Function

Set the desired cooking time using the 60-minute easy-set timer dial on the front. The air fryer will automatically shut off once the timer completes, ensuring your food is cooked perfectly and safely.

Cooking Capacity

The large 5-quart capacity and square basket design maximize cooking space, making it ideal for family-sized meals. You can cook a variety of items, from a whole chicken to a batch of crispy fries.

Cook the Whole Bird

The spacious 5 quart family-sized capacity is perfect for making healthy weeknight dinners and desserts

TROUBLESHOOTING

If you encounter any issues with your Chefman TurboFry Air Fryer, please refer to the following common troubleshooting tips:

- **Appliance not turning on:** Ensure the power cord is securely plugged into a working electrical outlet. Check if the timer is set to the desired cooking duration.
- **Food not cooking evenly:** Shake the basket halfway through the cooking process for items like fries or nuggets. Ensure not to overcrowd the basket; cook in smaller batches if necessary.
- **White smoke coming from the appliance:** This may indicate that fat from fatty foods is dripping into the bottom pan. Clean the pan after each use. Excessive oil residue can also cause smoke.
- **Food not crispy:** Ensure the temperature is set correctly for the food type. A light coating of oil can help achieve crispiness.

For more detailed troubleshooting or persistent issues, please contact Chefman customer support.

SPECIFICATIONS

Brand	Chefman
Model Name	Chefman 5 Quart Air Fryer, Glossy Finish
Model Number	RJ38-5LM-V3
Capacity	5 Quarts
