5. INSTALLATION

Important: Turn off power to your HVAC system at the circuit breaker before beginning installation.

1. **Remove Old Thermostat:** Carefully remove your existing thermostat from the wall. Take a picture of the wiring connections for reference.
2. **Label Wires:** Label each wire with the corresponding terminal letter from your old thermostat.

3. **Mount Base Plate:** Detach the front panel of the Klima KL6300W thermostat from its base plate. Mount the base plate to the wall using the provided screws and anchors. Ensure the base plate is level.
4. **Connect Wires:** Connect the labeled wires to the corresponding terminals on the Klima KL6300W base plate. Refer to your HVAC system's wiring diagram if unsure. This thermostat is designed for 24V systems.
5. **Attach Thermostat:** Securely attach the front panel of the Klima KL6300W thermostat to the mounted base plate.
6. **Restore Power:** Turn the power back on at the circuit breaker.

Upon successful installation, the thermostat display should power on.

6. OPERATING INSTRUCTIONS

6.1 Basic Operation

The thermostat features a touch-sensitive display. The main screen shows the current temperature, set temperature, and operating mode.

- **Adjusting Temperature:** Use the up/down arrows on the display to increase or decrease the desired temperature.
- **Changing Mode:** Press the mode button (often represented by a snowflake for cool, sun for heat, or fan icon) to cycle through available modes (e.g., Heat, Cool, Auto, Off, Fan).
- **Fan Control:** Press the fan button to select fan operation (e.g., Auto, On).

6.2 Wi-Fi Setup and App Control

To enable remote control and smart features, connect your thermostat to your home Wi-Fi network and install the companion mobile application.

1. **Download App:** Search for the "Klima Smart Thermostat" app on the [Google Play Store](#) or [Apple App Store](#).
2. **Create Account:** Open the app and follow the on-screen instructions to create a user account.
3. **Add Device:** In the app, select "Add Device" or a similar option.
4. **Thermostat Pairing Mode:** Follow the app's instructions to put your thermostat into Wi-Fi pairing mode. This usually involves pressing and holding a specific button on the thermostat until a Wi-Fi icon flashes.
5. **Connect to Wi-Fi:** Select your home Wi-Fi network in the app and enter the password.
6. **Complete Setup:** Once connected, you can name your thermostat and configure settings through the app.

The mobile app allows you to adjust temperature, change modes, set schedules, and monitor your HVAC system from anywhere.
