2. Setup and Assembly

Before beginning assembly, ensure all parts are present and undamaged. Refer to the included parts list and illustrations. Assembly tools are provided.

Assembly Steps:

1. **Prepare Components:** Unpack all components and lay them out on a clean, soft surface to prevent scratches.

Identify each part using the numbered labels.

2. **Assemble X-Design Sides:** Begin by connecting the X-design side panels. These form the core structure and provide stability. Ensure all connections are secure but do not overtighten screws until the entire frame is assembled.
3. **Attach Tabletop:** Carefully place the tabletop onto the assembled X-design frame. Align the pre-drilled holes and secure with the provided screws.
4. **Install Lower Shelf:** Position the lower shelf within the X-design base, aligning it with the designated attachment points. Secure it firmly with screws.
5. **Final Tightening and Finishing:** Once all components are in place, systematically tighten all screws to ensure maximum stability. Apply the included hole stickers over visible screw heads for a clean, seamless appearance.
