3. SETUP

3.1 Initial Charging of the Power Bank

Before first use, it is recommended to fully charge your Kuulaa Portable Charger. Use the provided USB charging cable to connect the power bank's input port (usually a USB-C port) to a compatible USB power adapter (not included) or a computer's USB port.

- Connect the small end of the charging cable to the **IN/OUT** port on the side of the power bank.
- Connect the other end of the charging cable to a USB power source.
- The LCD digital display will show the charging progress, indicating the battery percentage.
- Once the display shows 100%, the power bank is fully charged and ready for use.

6. TROUBLESHOOTING

If you encounter issues with your Kuulaa Portable Charger, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Power bank not charging.	Charging cable is faulty or not properly connected. Power source is not working.	Ensure the charging cable is securely connected to both the power bank and the power source. Try a different USB cable or power adapter.
Device not charging from power bank.	Power bank battery is low. Device charging port is dirty or damaged. Incompatible device.	Check the power bank's digital display for battery level and recharge if necessary. Ensure the built-in USB-C plug is fully inserted into your device. Verify your device is USB-C compatible.
Slow charging.	Device not supporting fast charging. Power bank battery is low.	Ensure your device supports PD20W fast charging. Fully charge the power bank before use.
Digital display not working.	Power bank is completely discharged. Internal malfunction.	Try charging the power bank for a few minutes. If it still doesn't light up, contact customer support.

If the problem persists after trying these solutions, please contact Kuulaa customer support for further assistance.
