Lefitus I50 Lefitus

Lefitus Smart Watch User Manual

Model: I50 Lefitus

INTRODUCTION

This manual provides comprehensive instructions for setting up, operating, and maintaining your Lefitus Smart Watch. Designed for women, this smartwatch offers Bluetooth call functionality, 24-hour heart rate and sleep monitoring, IP68 waterproofing, over 120 sports modes, and a wide variety of customizable watch faces. Please read this manual thoroughly to ensure optimal performance and longevity of your device.

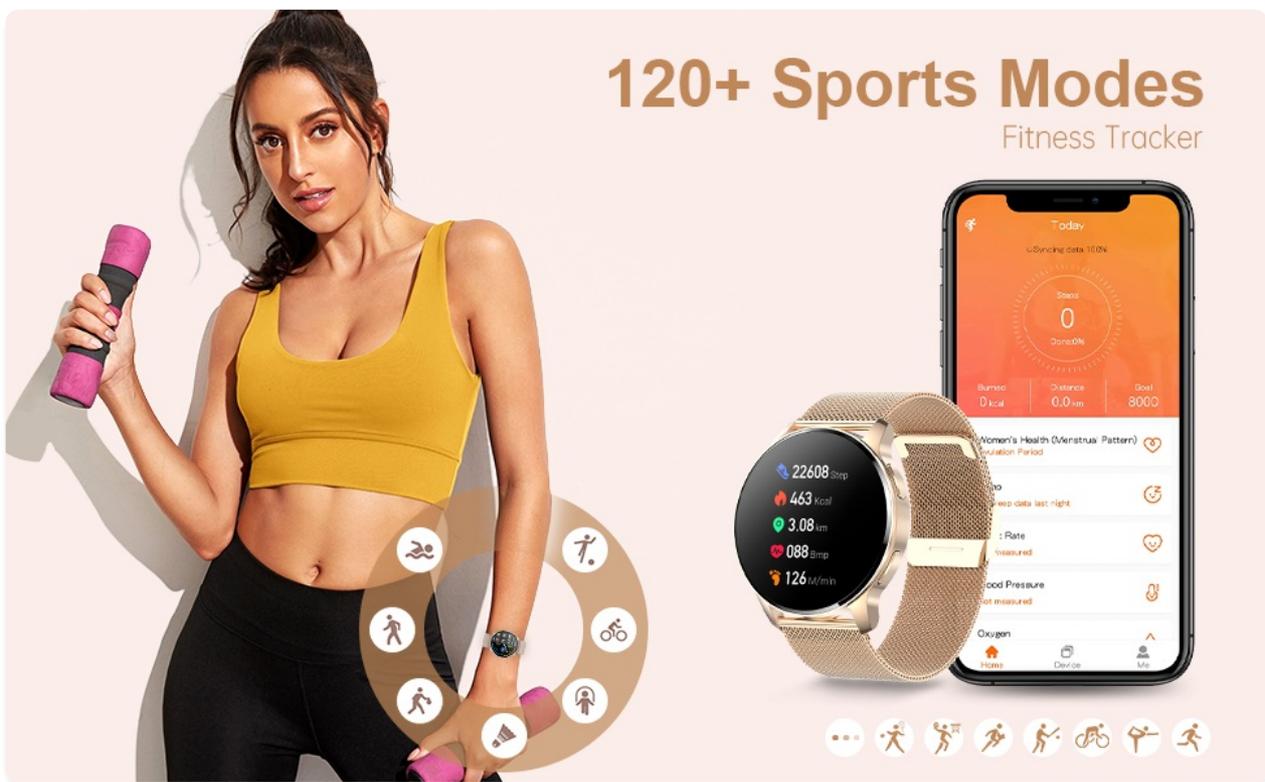

The Lefitus Smart Watch, featuring a round display and a comfortable pink band.

WHAT'S IN THE BOX

Upon opening your Lefitus Smart Watch package, you should find the following items:

- Smart Watch (main unit)
- Watch Band (typically one pre-attached, and additional bands if specified)
- Charging Cable
- User Manual
- Connection Card

An overview of the items included in the Lefitus Smart Watch package.

SETUP GUIDE

1. Charging the Smart Watch

Before initial use, fully charge your smartwatch. Connect the magnetic charging cable to the charging points on the back of the watch and plug the USB end into a compatible power source (e.g., computer USB port, USB wall adapter).

2. Downloading the Companion App

To unlock all features and synchronize data, download the "FitCloudPro" app on your smartphone. You can find it on the Google Play Store (for Android) or the Apple App Store (for iOS).

3. Pairing with Your Smartphone (Two-Step Bluetooth Connection)

The Lefitus Smart Watch requires a two-step Bluetooth connection for full functionality, including call making and receiving.

1. Step A: Initial Device Pairing (for data sync and basic notifications)

- Turn on the Bluetooth function on your mobile phone.
- Open the "FitCloudPro" App.
- In the App, navigate to "Device" and click "Add Device".
- Select "i50" (or the corresponding model name) from the list to bind the watch.

2. Step B: Bluetooth Call Function Pairing (for calls and audio playback)

- On your watch, open the drop-down menu and light up the "Call" function icon (usually a phone icon).
- On your phone, go to Bluetooth settings.

- c. Find "Watch Call" (or similar name) in the list of available devices and click to connect it.
- d. Once connected, you can use the watch to answer/make calls anytime.

Turn on your mobile phone Bluetooth, connect our smart watch to the "FitCloudPro" App.

1. Turn on the "Bluetooth" function of your phone.

2. Open "Google Play" or the "App Store".

3. Search for the "FitCloudPro" App and download it.

4. Open the App, click "Device", find "I50" and bind it.

TIPS to enable the answer/call function

1. Open the drop-down menu of the watch, and light up the "Call" function icon.

2. Open the phone "Settings" and turn on the "Bluetooth" function.

3. Find "Watch Call" and click to connect it.

4. Once connected, you could use the watch to answer/make calls anytime.

An illustration of the primary functions available on your Lefitus Smart Watch.

Bluetooth Call and Message Reminders

With its advanced Bluetooth chipset, your Lefitus Smart Watch allows you to make and receive phone calls directly from your wrist. This is particularly convenient when your phone is not easily accessible. You can also play music from your smartphone through the watch's speaker. Additionally, the watch displays alerts from SMS and various social media applications such as Facebook, Twitter, WhatsApp, Skype, and Instagram.

The smartwatch displays incoming calls and message notifications from your connected phone.

AI Voice Assistant

Utilize the integrated AI voice assistant for hands-free control. Simply tap the voice ball icon on your watch and speak commands to make calls, play music, ask about the weather, or navigate. This feature enhances convenience by allowing you to interact with your phone without physically holding it.

AI VOICE ASSISTANT

Using the latest technology to add Ai voice assistant, you can quickly make calls, play music, ask the weather, or navigate and other functions by shouting "Siri". It truly realizes technology to free your hands!

Please play a piece of music

How is the weather in New York today?

Call Mr. Chen

Send a message to Mary

Health Monitoring

The smartwatch is equipped with an optical heart rate sensor and intelligent algorithms to provide daily physical health monitoring. It supports 24-hour heart rate, blood oxygen (SpO2), and sleep quality monitoring. All measurement records can be viewed in the FitCloudPro App, helping you understand your health status and make informed adjustments to your lifestyle.

- **Heart Rate Monitoring:** Continuously tracks your heart rate throughout the day.
- **Blood Oxygen Monitoring:** Measures your blood oxygen saturation levels.
- **Sleep Monitoring:** Analyzes your sleep patterns, including deep sleep, light sleep, and awake times.
- **Menstrual Cycle Reminders:** Provides timely reminders for women's health tracking.

Fitness Tracking and Sports Modes

The Lefitus Smart Watch accurately records all-day activities such as steps taken, distance covered, and calories burned. It supports over 120 sports modes, including walking, running, yoga, cycling, basketball, climbing, and soccer. This extensive range helps you track your workouts and develop healthy exercise habits. All collected data can be synchronized to your phone for detailed analysis, aiding in scientific exercise planning and achieving your fitness goals.

200+ Online Watchface

Custom Dial Watchface
Love every minute and second of life

The smartwatch offers a wide array of sports modes to track various physical activities.

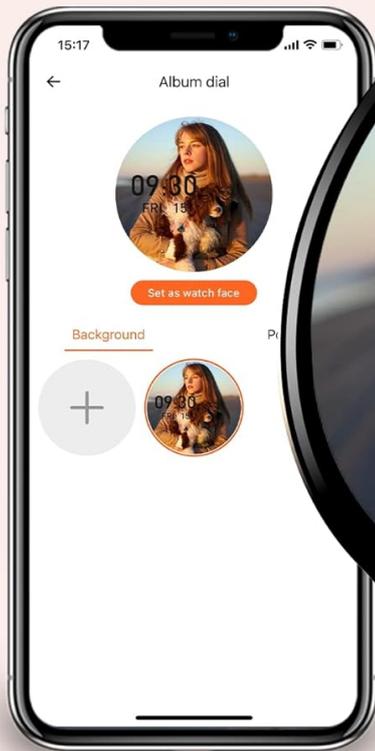

Customizable Watch Faces

Personalize your smartwatch with a variety of watch faces. The 1.32-inch round screen with its gold metal frame provides a clear display. The watch includes 4 default dials, and the FitCloudPro App offers over 200 free dials. You can also upload your favorite picture or photo to create a truly personalized watch face that reflects your style.

Additional Practical Functions

The Lefitus Smart Watch includes several other useful features to enhance your daily experience:

- **Music Control:** Control music playback on your smartphone directly from your watch.
- **Camera Control:** Use your watch as a remote shutter for your phone's camera.
- **Find Phone:** Locate your misplaced phone by triggering an alarm from your watch.
- **Sedentary Reminders:** Get alerts to move after periods of inactivity.
- **Alarm Clock:** Set alarms to wake you up or remind you of important tasks.
- **Stopwatch:** A precise stopwatch for timing activities.
- **Weather:** View real-time weather updates.
- **Flashlight:** A convenient screen-based flashlight function.

WATERPROOFING (IP68)

The Lefitus Smart Watch is rated IP68 waterproof, meaning it is resistant to dust and can withstand immersion in water up to 1.5 meters for up to 30 minutes. This makes it suitable for daily activities such as hand washing, rain, and light splashes. However, it is not recommended for hot showers, saunas, or diving, as steam and high water pressure can compromise the seal.

The watch is designed to be resistant to water and dust for daily use.

MAINTENANCE

To ensure the longevity and optimal performance of your Lefitus Smart Watch, follow these maintenance guidelines:

- **Cleaning:** Regularly clean the watch and band with a soft, dry cloth. If necessary, use a slightly damp cloth and mild soap, then dry thoroughly. Avoid harsh chemicals or abrasive materials.
- **Charging:** Use only the provided charging cable. Ensure the charging contacts on the watch and cable are clean and dry before charging.
- **Storage:** Store the watch in a cool, dry place when not in use. Avoid extreme temperatures.
- **Avoid Impact:** Protect the watch from strong impacts or drops, which can damage the screen or internal components.
- **Water Exposure:** While IP68 rated, prolonged exposure to water, especially hot water or chemicals (like chlorine), should be avoided. Dry the watch thoroughly after any water exposure.

TROUBLESHOOTING

If you encounter issues with your Lefitus Smart Watch, refer to the following common solutions:

- **Watch not turning on:** Ensure the watch is fully charged. If it still doesn't turn on, try pressing and holding the power button for 10-15 seconds.
- **Cannot pair with phone:**
 - Ensure Bluetooth is enabled on your phone and the watch.
 - Make sure the FitCloudPro app is installed and running.
 - Forget the device in your phone's Bluetooth settings and try pairing again from the app.
 - Ensure both the watch and phone are within close proximity.
 - Remember the two-step Bluetooth connection process for calls.
- **Notifications not received:**

- Check notification permissions for the FitCloudPro app in your phone's settings.
- Ensure the app is running in the background and not being closed by battery optimization settings.
- Verify that notifications are enabled within the FitCloudPro app for specific applications.

- **Inaccurate health data:**

- Ensure the watch is worn snugly on your wrist, about one finger's width from your wrist bone.
- Keep the sensor clean and free from debris.
- Note that environmental factors and individual physiology can affect accuracy.

- **Short battery life:**

- Reduce screen brightness.
- Limit continuous heart rate monitoring or frequent use of power-intensive features.
- Turn off unnecessary notifications.

If problems persist, contact Lefitus customer support for further assistance.
