### 3. SETUP INSTRUCTIONS

---

Follow these steps to properly set up your adjustable bed frame. It is recommended that two people assemble the bed frame due to its weight and size.

- 1. Unpack the Box:** Carefully open the shipping box. It is recommended that two people work together to lift the bed frame out of the box.
- 2. Prepare the Frame:** Lay the folded bed frame on a clean, flat surface.
- 3. Install Legs:** Attach the six adjustable bed legs by rotating the end cap at the bottom of each leg clockwise to adjust to the desired height (from 0 to 11 cm). Securely screw each leg into the designated points on the bed frame.
- 4. Connect Power:** Connect the power cord to the power supply unit, then plug the power supply into a wall outlet.
- 5. Flip the Bed:** With the help of another person, carefully flip the bed frame over so it rests on its legs.
- 6. Install Mattress Retainer Bar:** Locate the holes at the foot of the bed and insert the mattress retainer bar to prevent the mattress from shifting.
- 7. Place Mattress:** Carefully place your mattress on the adjustable bed frame. The frame is compatible with most mattress types including memory foam, latex, gel, and hybrid mattresses.

## 5. MAINTENANCE

---

Regular maintenance ensures the longevity and optimal performance of your adjustable bed frame.

- **Cleaning:** Wipe the frame with a damp cloth. Avoid harsh chemicals or abrasive cleaners.
- **Motor Inspection:** Periodically check the motor and electrical connections for any signs of wear or damage. Ensure all cables are securely connected and not pinched.
- **Leg Stability:** Ensure all bed legs are securely tightened and at the correct height.
- **Mattress Retainer Bar:** Verify the retainer bar is firmly in place to prevent mattress movement.

## 6. TROUBLESHOOTING

---

If you encounter any issues with your adjustable bed frame, refer to the following common troubleshooting tips:

- **Bed Not Responding to Remote:**
  - Check if the remote control batteries need replacement.
  - Ensure the power cord is securely plugged into both the power supply and the wall outlet.
  - Verify that the remote is paired with the bed frame according to the pairing instructions (if applicable, refer to a separate remote pairing guide).
- **Motor Noise:**
  - A slight hum from the motor is normal during operation.
  - If the noise is excessive or unusual, check for any obstructions under the bed or loose connections.
- **Uneven Movement:**
  - Ensure the bed frame is on a level surface.
  - Check that all legs are adjusted to the same height.
- **Mattress Sliding:**
  - Confirm the mattress retainer bar is correctly installed at the foot of the bed.

If the issue persists, please contact customer support for further assistance.
