FORSINING GMT1235-3

FORSINING Square Mechanical Watch User Manual

Model: GMT1235-3

INTRODUCTION

Thank you for choosing the FORSINING Square Mechanical Watch. This timepiece combines classic design with an automatic mechanical movement, offering both style and functionality. This manual provides essential information for the proper setup, operation, and maintenance of your watch to ensure its longevity and accurate performance.

PRODUCT OVERVIEW

The FORSINING Square Mechanical Watch features a distinctive skeleton dial, allowing you to observe the intricate workings of its automatic movement. It is designed with a durable stainless steel case and a comfortable genuine leather strap.

Key Features:

- Automatic Mechanical Movement: Self-winds with natural wrist motion.
- Transparent Skeleton Dial: Showcases the internal gears and springs.
- Luminous Hands: For improved visibility in low-light conditions.
- Durable Construction: Stainless steel case and mineral glass dial window.
- Genuine Leather Strap: Provides comfort and classic style.
- Daily Water Resistance: Suitable for splashes and brief immersion (30 meters).

SETUP

1. Initial Winding

As an automatic mechanical watch, it does not require a battery. For the first use, or if the watch has not been worn for an extended period and has stopped, it needs to be manually wound. To do this, ensure the crown is in its normal operating position (pushed in). Rotate the crown clockwise approximately 20-30 times until you feel a slight resistance. This will build up enough power reserve to start the watch.

2. Setting the Time

1. Pull the crown gently outwards to the first click position.
2. Rotate the crown clockwise or counter-clockwise to set the hour and minute hands to the correct time.
3. Once the time is set, push the crown back into its original position to secure it and start the watch movement.

OPERATING THE WATCH

Automatic Movement

Your FORSINING watch is powered by an automatic mechanical movement. This means it is wound by the motion of your wrist while wearing it. Regular daily wear (approximately 8-10 hours) is usually sufficient to keep the watch running. If the watch is not worn for more than 24-36 hours, it may stop and require manual winding as described in the 'Initial Winding' section.

Wearing the Watch

Adjust the genuine leather strap to fit comfortably on your wrist. The watch should be snug enough not to slide freely, but not so tight as to restrict circulation. Proper fit ensures optimal winding of the automatic movement.

Luminous Hands

The watch hands feature a luminous coating that absorbs light and glows in the dark, allowing for time reading in low-light conditions. Exposure to bright light will enhance the luminosity.

MAINTENANCE

Water Resistance

This watch is rated for 30 meters (3 ATM) of water resistance. This means it is suitable for daily use and can withstand splashes, rain, and brief immersion in water. It is **not** suitable for swimming, diving, showering, or any activities involving prolonged water exposure or high-pressure water. Always ensure the crown is fully pushed in to maintain water resistance.

FORSINING

Montre mécanique décontractée et tendance Forsining avec cadran noir, index à grands chiffres, sous-cadran, bracelet en cuir de luxe de marque haut de gamme, montres-bracelets avec boîte

Cleaning

- **Case and Crystal:** Wipe gently with a soft, dry, lint-free cloth. For stubborn dirt, a slightly damp cloth can be used, followed by immediate drying.
- **Leather Strap:** Avoid prolonged exposure to water, direct sunlight, and harsh chemicals, as these can damage the leather. Clean with a dry or slightly damp soft cloth. Allow to air dry completely if it gets wet.

CUIR VÉRITABLE

Design en cuir véritable de haute qualité

Storage

When not wearing the watch, store it in a cool, dry place, away from direct sunlight and extreme temperatures. The included gift box is ideal for storage.

Avoid Magnetic Fields

Mechanical watches can be affected by strong magnetic fields, which may cause them to run inaccurately. Keep your watch away from strong magnets found in speakers, refrigerators, mobile phones, and other electronic devices.

TROUBLESHOOTING

- **Watch Stops Running:** This is common for automatic watches if not worn regularly. Manually wind the watch (20-30

clockwise turns of the crown) and wear it for several hours. If it still does not run, ensure the crown is fully pushed in.

- **Time Inaccuracy:** Mechanical watches may have slight variations in accuracy. If the watch is consistently running too fast or too slow, it might be due to magnetic interference or a need for professional adjustment. Keep it away from strong magnetic sources.
- **Condensation Inside Dial:** If you notice moisture or condensation under the crystal, it indicates a breach in water resistance. Stop using the watch immediately and contact customer support.

SPECIFICATIONS

Brand: Forsining

Model :GMT1235-3

Diamètre : 42*42 mm

Épaisseur : 15 mm

Longueur totale : 24 cm

Largeur du bracelet : 22 mm

Matériau du boîtier : Acier inoxydable

Matériau du bracelet : Cuir véritable
