Newparts Genuine OEM Headlight Assembly (Passenger Side, Halogen) - Instruction Manual

Model: 1542412 | Brand: Newparts

INTRODUCTION

This manual provides essential instructions for the proper installation, operation, and maintenance of your Newparts Genuine OEM Headlight Assembly. Please read this manual thoroughly before installation and retain it for future reference.

Safety Information

- Always disconnect the vehicle's battery before performing any electrical work.
- Wear appropriate safety gear, including gloves and eye protection.
- Ensure the vehicle is parked on a level surface with the parking brake engaged.
- If you are unsure about any step, consult a qualified automotive technician.

PACKAGE CONTENTS

Upon opening the package, please verify that all components are present and undamaged:

- One (1) Newparts Genuine OEM Headlight Assembly - Passenger Side (Halogen)

INSTALLATION GUIDE

This section outlines the general steps for installing the headlight assembly. Specific vehicle models may have variations. Refer to your vehicle's service manual for detailed instructions. Professional installation is recommended.

Tools Required (Typical)

- Socket Wrench Set
- Screwdriver Set (Phillips and Flathead)
- Plastic Trim Removal Tools
- Gloves

Installation Steps

1. **Prepare the Vehicle:** Park the vehicle on a level surface, engage the parking brake, and turn off the engine. Disconnect the negative terminal of the vehicle's battery.
2. **Access the Headlight:** Depending on your vehicle, you may need to remove the front bumper, fender liner, or other components to access the headlight assembly mounting bolts. Carefully remove any clips, screws, or bolts securing these components.
3. **Disconnect Wiring:** Locate and disconnect the electrical connectors from the existing headlight assembly. This typically includes connectors for the main headlight bulb, turn signal, and any other integrated lights.
4. **Remove Old Headlight:** Unscrew or unbolt the mounting fasteners that secure the old headlight assembly to the vehicle frame. Carefully pull the old assembly out.
5. **Inspect New Headlight:** Before installing, visually inspect the new Newparts headlight assembly for any damage. Ensure all bulbs (if pre-installed) are secure.
6. **Install New Headlight:** Position the new headlight assembly into the opening. Align the mounting points and secure it with the original fasteners. Do not overtighten.
7. **Reconnect Wiring:** Reconnect all electrical connectors to the new headlight assembly. Ensure connections are firm and secure.
8. **Reassemble Vehicle:** Reinstall any bumper, fender liner, or other components that were removed to access the headlight. Secure all clips, screws, and bolts.
9. **Reconnect Battery and Test:** Reconnect the negative terminal of the vehicle's battery. Turn on the vehicle's lights (low beam, high beam, turn signals) to ensure all functions are working correctly. Adjust headlight aim if necessary (refer to your vehicle's service manual for aiming procedures).

OPERATING INSTRUCTIONS

The Newparts Headlight Assembly functions as a direct replacement for your vehicle's original equipment. Its operation is controlled by your vehicle's existing headlight switch and electrical system.

- **Low Beam:** Provides illumination for general driving conditions.
- **High Beam:** Provides maximum illumination for driving in dark areas, when no oncoming traffic is present.
- **Turn Signal:** The integrated amber section functions as the vehicle's turn signal.

Refer to your vehicle's owner's manual for specific instructions on operating your vehicle's lighting system.

CARE AND MAINTENANCE

- **Cleaning:** Clean the headlight lens regularly with a soft cloth and mild automotive soap or a dedicated headlight cleaner. Avoid abrasive cleaners or harsh chemicals that can damage the lens.
- **Inspection:** Periodically inspect the headlight assembly for cracks, moisture intrusion, or loose connections. Address any issues promptly.
- **Bulb Replacement:** If a bulb needs replacement, refer to your vehicle's owner's manual or service manual for the correct bulb type and replacement procedure. Ensure the replacement bulb matches the original specifications (e.g., halogen type).

TROUBLESHOOTING COMMON ISSUES

Issue	Possible Cause	Solution
Headlight not illuminating	Blown bulb, loose electrical connection, faulty fuse, wiring issue.	Check and replace bulb. Verify all electrical connections are secure. Inspect vehicle's fuse box for blown headlight fuse. Consult a technician for wiring issues.
Headlight is dim	Aging bulb, poor electrical connection, dirty lens, voltage issue.	Replace bulb. Clean lens thoroughly. Check electrical connections. Consult a technician for voltage issues.
Moisture inside headlight	Seal compromise, condensation.	Small amounts of condensation may dissipate. If persistent or excessive, inspect seals for damage. Contact seller if issue persists after proper installation.
Turn signal not working	Blown turn signal bulb, faulty flasher relay, wiring issue.	Check and replace turn signal bulb. Inspect flasher relay (if applicable to your vehicle). Consult a technician for wiring issues.
