# CUCKOO 1-Year Filter Replacement Bundle for Air Purifier Model CAC-R1510FW Instruction Manual

## INTRODUCTION

This instruction manual provides essential information for the CUCKOO 1-Year Filter Replacement Bundle, Model **CACFS-R12M03US**, specifically designed for the CUCKOO Air Purifier Model **CAC-R1510FW**. This bundle is crucial for maintaining optimal air quality and ensuring the continued performance of your air purifier. Regular filter replacement is vital for effective air purification.

It is recommended to replace the entire filter bundle every six months or when the filter indicator light on your air purifier illuminates, whichever comes first. This ensures that your air purifier continues to capture pollutants efficiently.

## PRODUCT COMPONENTS

The CUCKOO 1-Year Filter Replacement Bundle includes the following components:

- **Pre-Filter (1):** This is the initial layer of filtration, designed to capture larger particles such as dust, pet hair, and lint. It helps to extend the lifespan of the subsequent filters.
- **H13 True HEPA Filter (1):** This is the primary filtration layer, capable of capturing up to 99.97% of airborne particles as small as 0.3 microns. This includes allergens, pollen, dust mites, mold spores, and pet dander.
- **Activated Carbon Filters (2):** These filters are specifically designed to absorb odors, volatile organic compounds (VOCs), formaldehyde, and other harmful gases, improving overall air freshness.

## SETUP AND INSTALLATION

Follow these general steps to replace the filters in your CUCKOO Air Purifier Model CAC-R1510FW. Always refer to your air purifier's specific user manual for detailed instructions and safety precautions.

1. **Power Off and Unplug:** Before beginning, ensure the air purifier is turned off and unplugged from the power outlet to prevent electric shock.
2. **Access Filter Compartment:** Locate and open the filter cover or panel on your air purifier. This is typically on the back or side of the unit.
3. **Remove Old Filters:** Carefully remove the used pre-filter, HEPA filter, and carbon filters. Dispose of them according to local regulations.
4. **Install New Filters:** Insert the new filters into the air purifier in the correct order. The typical order is pre-filter first, followed by the HEPA filter, and then the carbon filters. Ensure they are seated securely.
5. **Close Compartment:** Close the filter cover or panel until it clicks into place.
6. **Power On and Reset:** Plug the air purifier back into the power outlet and turn it on. Refer to your air purifier's main

manual for instructions on how to reset the filter life indicator light. This step is crucial for accurate filter monitoring.

## OPERATING PRINCIPLES OF FILTERS

---

The CUCKOO filter bundle works in a multi-stage filtration process to effectively clean the air in your environment:

- **Pre-Filter:** Captures larger airborne particles, preventing them from clogging the more delicate filters and extending their operational life.
- **Activated Carbon Filters:** Utilizes activated carbon to chemically absorb gaseous pollutants, unpleasant odors from cooking, pets, smoke, and harmful volatile organic compounds (VOCs).
- **H13 True HEPA Filter:** Acts as the final and most critical stage, trapping microscopic particles that pass through the previous layers. This includes fine dust, pollen, pet dander, and other allergens, ensuring the output air is significantly cleaner.

## MAINTENANCE

---

Proper maintenance of your filter bundle ensures the longevity and efficiency of your air purifier.

- **Filter Replacement Schedule:** The entire filter bundle (Pre-Filter, H13 True HEPA Filter, and Activated Carbon Filters) should be replaced every **six months** or when the filter indicator light on your CUCKOO Air Purifier Model CAC-R1510FW turns on. This schedule may vary based on air quality and usage.
- **Pre-Filter Cleaning:** The pre-filter can be gently cleaned between replacements using a soft brush or a vacuum cleaner with a brush attachment to remove accumulated dust and debris. *Do not wash the HEPA or Carbon filters with water, as this will damage them.*
- **Storage:** Store new, unused filters in a cool, dry place away from direct sunlight and strong odors to maintain their effectiveness.

## TROUBLESHOOTING

---

If you encounter issues after installing your new filter bundle, consider the following common troubleshooting steps:

- **Reduced Airflow:**
  - Ensure all filters are installed correctly and securely.
  - Check if any packaging material was left on the filters.
  - Verify that the air intake and output vents of the air purifier are not obstructed.
- **Persistent Odors:**
  - If odors persist shortly after replacement, the carbon filters might be saturated due to extremely high levels of pollutants in the environment. Consider more frequent replacement if this is a recurring issue.
  - Ensure the room is adequately ventilated.
- **Filter Indicator Light Remains On:**
  - After replacing the filters, you must manually reset the filter life indicator on your CUCKOO Air Purifier Model CAC-R1510FW. Refer to your air purifier's main user manual for specific instructions on how to perform this reset.

## SPECIFICATIONS

---

<b>Brand</b>	CUCKOO
<b>Model Number (Filter Bundle)</b>	CACFS-R12M03US
<b>Compatible Air Purifier Model</b>	CAC-R1510FW
<b>Material</b>	Carbon Fiber, Paper, Plastic
<b>Included Components</b>	Pre-Filter (1), H13 True HEPA Filter (1), Activated Carbon Filters (2)
<b>Recommended Replacement Interval</b>	Every six months or when filter indicator light turns on
