2. WHAT'S INCLUDED

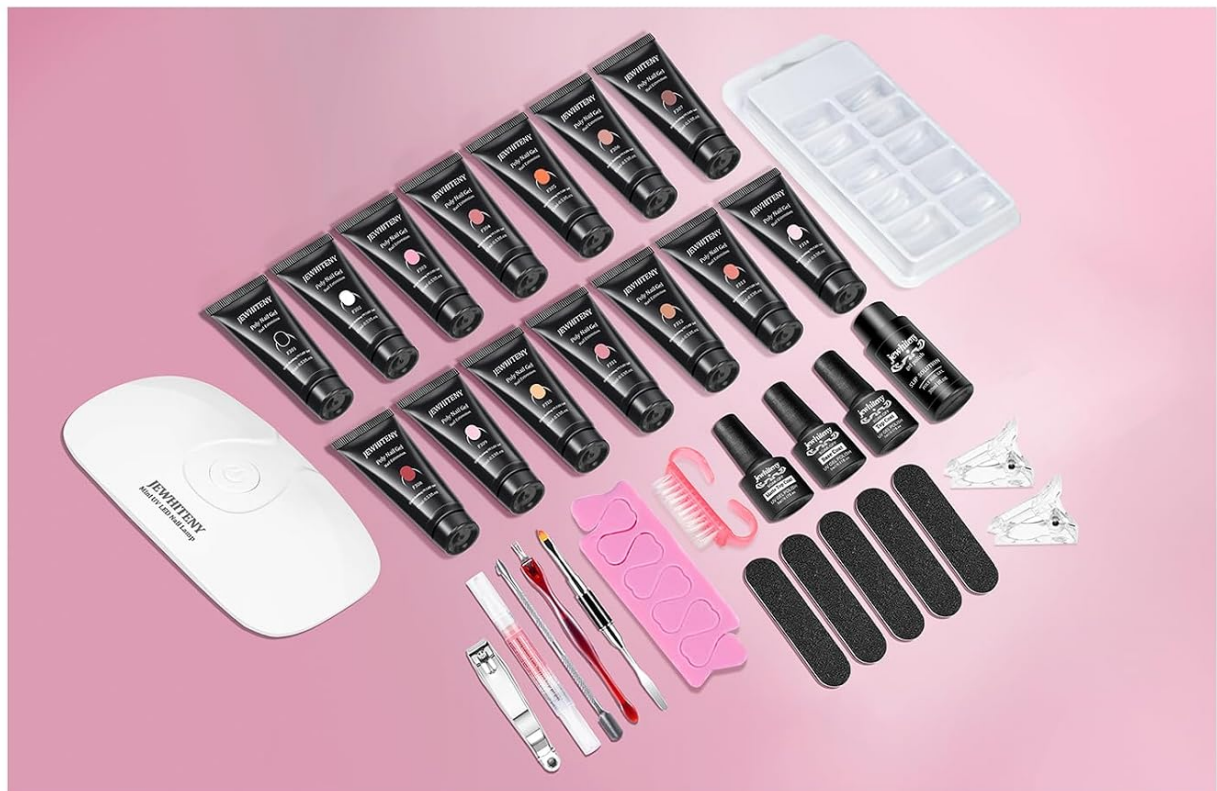

Your JEWHTENY Poly Extension Gel Nail Kit includes the following items:

- 14 x 15ml Poly Nail Extension Gel (various colors)
- 1 x 6W Mini Nail Lamp
- 1 x 30ml Slip Solution
- 100 pcs Curved Dual Forms (10 sizes, 10 pcs per size)
- 1 x Dual Nail Brush and Spatula
- 1 x 5ml Top Coat
- 1 x 5ml Base Coat
- 1 x 5ml Matte Top Coat
- 1 x Cuticle Oil
- 1 x Cuticle Fork

- 1 x Cuticle Pusher
- 2 x Nail Separators
- 5 x Nail File
- 2 x Nail Tips Clips
- 1 x Nail Tweezers
- 1 x Nail Dust Brush

All Must-Haves

For Poly Nail Beginners

- 1*6W Mini Nail Lamp
- 14*15ml Poly Nail Gel
- 1*30ml Slip Solution
- 100pcs Curved Dual Forms (10 Sizes,10pcs Per Size)
- 1*Dual nail brushand spatula
- 1*5ml Top Coat
- 1*5ml Base Coat
- 1*5ml Matte top coat
- 1*Cuticle Oil
- 1*Cuticle Fork
- 1*Cuticle Pusher
- 2*Nail Separators
- 5*Nail File
- 2*Nail Tips clips
- 1*Nail Tweezer
- 1*Nail Dust Brusl

3. SAFETY INFORMATION

This product is intended for external use only. Avoid contact with eyes and mouth. In case of contact, rinse thoroughly with water. Keep out of reach of children. Discontinue use if irritation or allergic reaction occurs. Ensure proper ventilation during use. The poly gel is non-toxic and safe when used as directed.

4. NAIL PREPARATION

Proper nail preparation is crucial for long-lasting results. Follow these steps:

1. **Clean Nails:** Ensure your nails are clean and dry, free from any oils or old polish.
2. **Trim and File:** Clip nails to your desired length. Trim, file, and buff your natural nails to create a clean, dry surface.
3. **Push Cuticles:** Gently push back your cuticles using the cuticle pusher.
4. **Apply Base Coat:** Apply a thin layer of the included base coat to your natural nails.
5. **Cure Base Coat:** Cure the base coat under the mini nail lamp for 60 seconds.

Glossy and Matte

Top Coat

Matte Top Coat

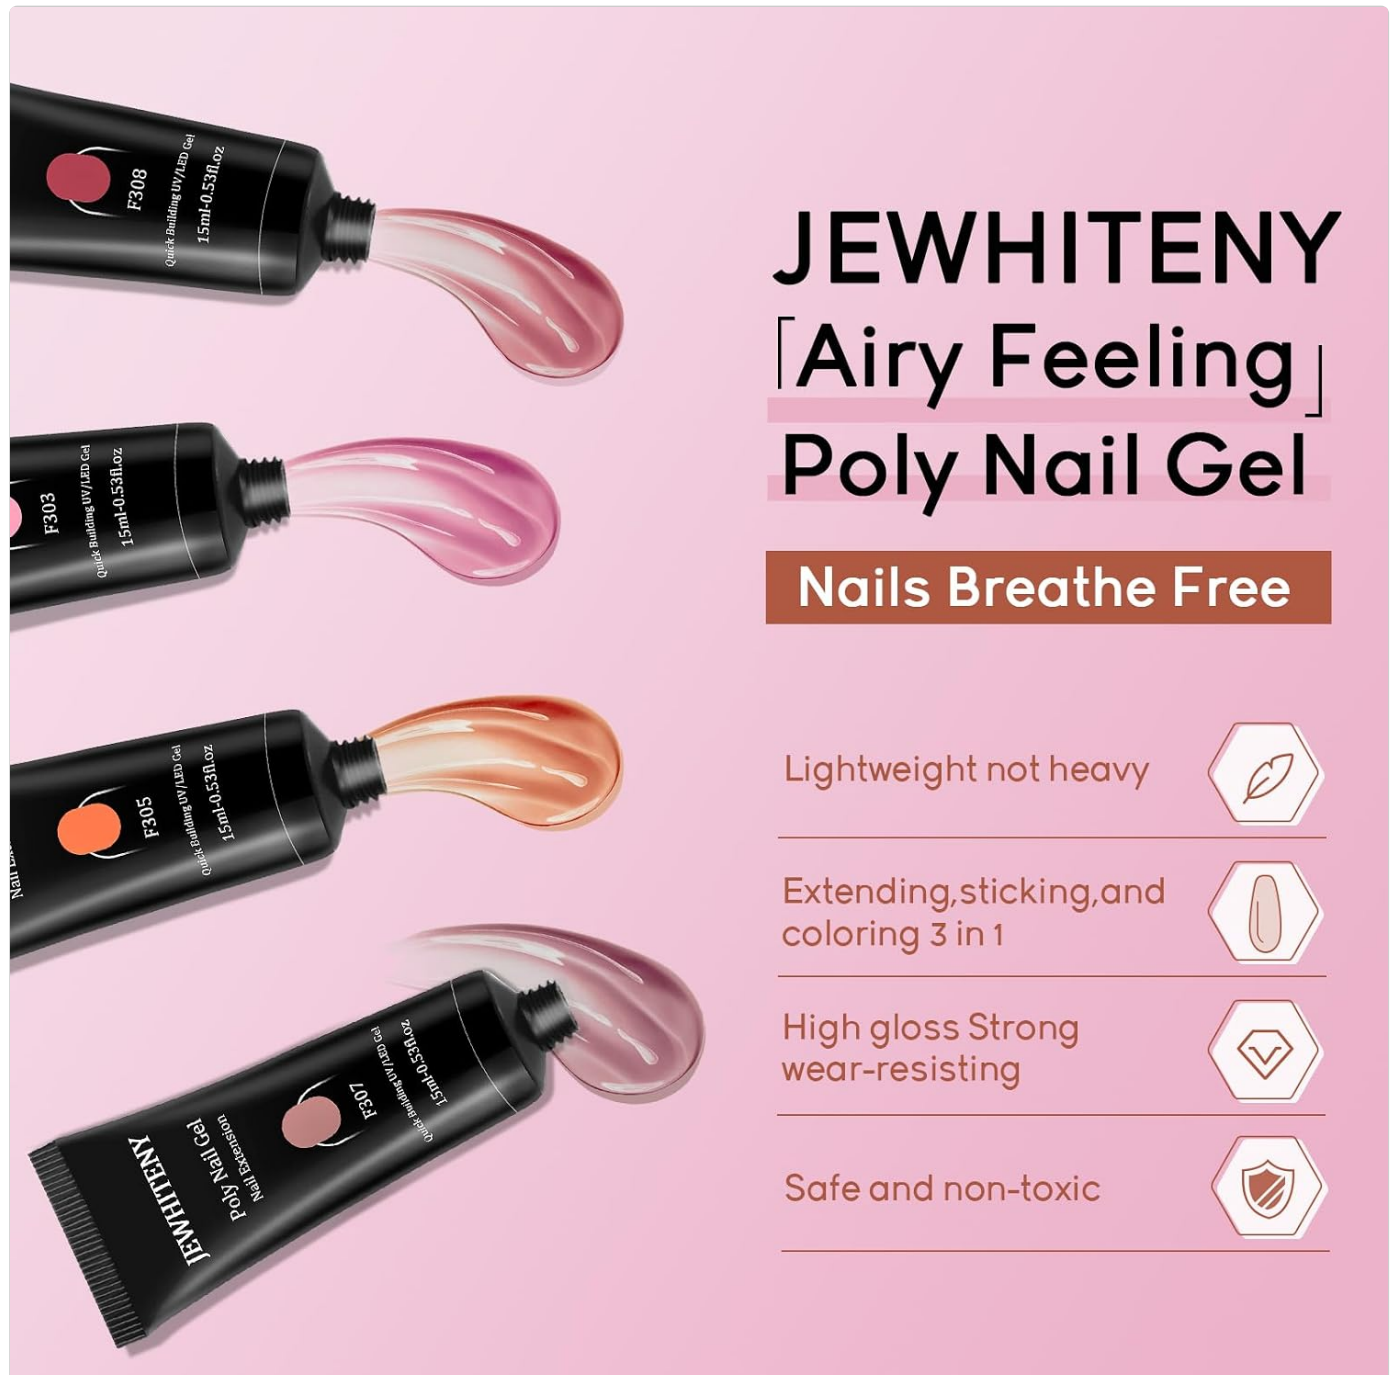

Figure 3: The kit includes both glossy and matte top coats for varied finishes.

5. POLY GEL APPLICATION

Follow these steps for applying the poly gel using the dual forms:

1. **Select Dual Form:** Choose a dual form that fits your natural nail size.

2. **Apply Poly Gel to Form:** Squeeze an appropriate amount of poly gel onto the dual form.
3. **Shape the Gel:** Dip the nail art pen into the slip solution. Use the pen to gently shape the poly gel within the dual form, spreading it evenly to your desired length and thickness. Ensure the edges are thin to prevent bulkiness.
4. **Apply to Nail:** Place the dual form onto your prepared natural nail, starting from the cuticle area and pressing gently towards the free edge. Ensure there are no air bubbles.
5. **Secure with Clip:** Use a nail tip clip to hold the dual form securely in place while curing.
6. **Clean Excess:** If any poly gel squeezes out from under the form, use the brush dipped in slip solution to clean it before curing.

The advertisement features four tubes of Jewhiteny Poly Nail Gel in different colors: F308 (pink), F303 (purple), F305 (orange), and F307 (dark pink). Each tube is shown with a dollop of gel squeezed out of its nozzle. The tubes are labeled 'Quick Building UV/LED Gel 15ml-0.53fl.oz.' and 'Poly Nail Gel Nail Extension'. The background is a solid light pink.

JEWHITENY

「Airy Feeling」 Poly Nail Gel

Nails Breathe Free

- Lightweight not heavy 
- Extending, sticking, and coloring 3 in 1 
- High gloss Strong wear-resisting 
- Safe and non-toxic 

Figure 4: JEWHITENY Poly Nail Gel is designed to be lightweight, extend, stick, and color in one, offering high gloss and strong wear resistance.

Poly Gel Preheating Method (for winter use)

In colder temperatures, poly gel can become difficult to squeeze. To make it more pliable:

1. Prepare a cup of hot water at 50-60°C (122-140°F).
2. Ensure the lid of the poly gel tube is closed.

3. Immerse the poly gel tube into the hot water for approximately two minutes to ensure adequate heating.
4. Once preheated, start squeezing the poly gel from the bottom of the tube.

How to get

Warm reminder: In winter, if you feel difficult in squeezing poly gel, you can use 50-60°C hot water to preheat the poly gel for two minutes first.

Clip nails to desired length

Trim, file and buff nails for a clean, dry surface

Apply a thin layer of base coat and cure for 30-60s

Squeeze an appropriate amount of poly gel onto the dual nail forms

Simply shape the polygel with a nail art pen dipped in slip solution

Stick it to nails gently

Secure with retaining clips

Use a nail art pen dipped in slip solution to further shape the poly gel

Cure both the front and back for 90-120s

After baking and drying, twist left and right to remove the nail molds

Apply a thin layer of top coat and cure for 30-60s

Done

Figure 5: Visual guide for preheating poly gel in warm water during colder conditions.

6. CURING THE POLY GEL

The mini nail lamp is essential for curing the poly gel. Ensure your nails are properly positioned under the light.

- Cure the poly gel under the 6W mini nail lamp for 90-120 seconds. For longer or thicker nails, an additional curing cycle may be beneficial.
- After curing, gently twist the dual form left and right to remove it from the nail.

Foldable Mini Lamp

Carry it along and have fun doing nail arts whenever and wherever.

Foldable rack
Space-saving and portable

6LEDs dual light source
360 degree illumination

Convenient carrying
From light to thin in one hand

90s timer
Easy button contro

Figure 6: The compact and portable 6W mini UV LED nail lamp for curing.

7. SHAPING AND FINISHING

Once the poly gel is cured and the dual form is removed, you can refine the shape:

1. **File and Shape:** Use the included nail files to shape the extension to your desired form and smooth any rough edges.
2. **Clean Dust:** Use the nail dust brush to remove any filing dust.
3. **Apply Top Coat:** Apply a thin layer of either the glossy or matte top coat.
4. **Cure Top Coat:** Cure the top coat under the mini nail lamp for 60 seconds.
5. **Apply Cuticle Oil:** Finish by applying cuticle oil to moisturize your cuticles.

POLY GEL PREHEATING METHOD

Q:When do I need to operate this step?

A: When you feel that it takes a lot of force to squeeze the poly gel out of the poly gel bottle. You can make the process of squeezing poly gel easier with this step.

1 Prepare a cup of hot water at 50-60 degrees Celsius.

2 Check to make sure the lid of the bottle of poly gel is in a closed position.

3 Immerse the bottle of poly gel into hot water so that the bottle stays below the surface of the water to ensure adequate heating and keep it for about two minutes.

4 The preheating step of the poly nail gel has been completed, start squeezing the poly nail gel from the bottom of the bottle, easily take out the right amount of poly gel, then you can start the pleasant nail art journey.

Q:How do I make my manicure last longer?

A: Careful nail preparation before creating beautiful extensions will ensure that your extensions last longer. Please follow the instructions for the nail preparation process, (filing, buffering, and cleaning) and then use the base coat included in our kit to complete the nail preparation process.

Figure 7: A visual summary of the poly gel nail application process from preparation to finish.

8. MAINTENANCE FOR LONG-LASTING NAILS

To ensure your poly gel nails last for an extended period (up to a month or longer):

- Always ensure thorough nail preparation, including sanding, buffing, and cleaning.
- Apply a base coat correctly to enhance durability and adhesion.
- Avoid using your nails as tools to prevent chipping or breakage.
- Regularly apply cuticle oil to keep your cuticles and natural nails healthy.
- For refills, gently file down the existing poly gel and apply new gel to the growth area, blending it smoothly.

9. TROUBLESHOOTING

Problem	Possible Cause	Solution
---------	----------------	----------

Problem	Possible Cause	Solution
Poly gel is difficult to squeeze from the tube.	Cold temperatures make the gel thicker.	Preheat the poly gel tube in 50-60°C hot water for two minutes before use.
Nail extensions lift or do not last long.	Improper nail preparation or insufficient base coat application.	Ensure nails are thoroughly filed, buffed, and cleaned. Apply a thin, even layer of base coat and cure properly.
Poly gel runs onto cuticles or sidewalls.	Excessive gel applied or incorrect placement of dual form.	Use a smaller bead of poly gel. When placing the dual form, start slightly away from the cuticle and press down, allowing the gel to spread. Clean any overflow with a slip solution-dipped brush before curing.
Poly gel feels soft or sticky after curing.	Insufficient curing time or lamp power.	Ensure adequate curing time (90-120 seconds). For thicker applications, cure for an additional cycle. Ensure the lamp is functioning correctly.

10. SPECIFICATIONS

- **Brand:** JEWHITENY
- **Model Number:** 14 poly gel with mini lamp
- **ASIN:** B0B8X6D7CV
- **Material:** Resin, Plastic
- **Included Components:** Base Coat, Gel Nail polish, Top Coat, Poly Nail Gel, Mini Lamp, Nail Tools
- **Package Dimensions:** 7.52 x 5.47 x 3.27 inches
- **Item Weight:** 1.15 Pounds
