2. SETUP AND OPERATING INSTRUCTIONS

2.1 Dosage

The recommended dosage is 5-10ml of floor cleaner concentrate per 300ml of water. This translates to a 1:20 ratio (1 part cleaner to 20 parts water). For example, mix 0.5 fl oz of cleaner with 10 fl oz of water.

Image 2.1: Recommended dosage and safety lock feature.

2.2 Application

1. Open the clean water tank of your robot mop or wet/dry vacuum.
2. Carefully measure the appropriate amount of WoldoClean concentrate based on the tank capacity and recommended dosage.
3. Pour the measured concentrate into the clean water tank.
4. Fill the remainder of the tank with clean water according to your device's instructions.
5. Close the tank securely and place it back into your robot mop.
6. Start your robot mop's cleaning cycle as usual.

This cleaner is suitable for all water-resistant hard floors, ensuring effective cleaning across various surfaces.

Wipe with water afterwards

DOSAGE

1:20	1 Cleaner : 20 Water
-------------	-----------------------------

Example: Mix 0.5 fl oz of the cleaner with 10 fl oz of water
Also check the manufacturer's instructions for the correct dosage

Image 2.3: Highlights the non-foaming formula and broad compatibility with robot mops.

3. MAINTENANCE

The non-foaming formula of WoldoClean concentrate contributes to easier maintenance of your robot mop. It helps prevent sediment buildup in the dirty water tank, simplifying the cleaning process for the tank itself.

4. TROUBLESHOOTING

- **Streaking:** Do not exceed the recommended dosage. Using too much concentrate can lead to streaking on your floors. Always adhere to the 1:20 cleaner to water ratio.
- **Thick Sticky Stains:** For heavily soiled areas or thick sticky stains, pre-treatment may be necessary before running your robot mop.

5. SAFETY INFORMATION

CAUTION: Keep out of reach of children. In case of contact with eyes, rinse immediately with plenty of water and seek medical advice. If swallowed, seek medical advice immediately and show this container or label.
