Attaching with the Shoulder Clip:

Follow these steps to attach the camera using the shoulder clip:

1. Separate the two parts of the clip.
2. Insert the body camera into the 'outside' clip.
3. Place the 'inside' clip under your clothing.
4. Adjust the screw to set the desired recording angle.

Adjustable 45° Angle Clips

Long press the screw to adjust the angle, get the best direction of camera

5. OPERATING INSTRUCTIONS

5.1 Power On/Off

- **Power On:** Press and hold the Power On/Off button (9) until the screen illuminates.
- **Power Off:** Press and hold the Power On/Off button (9) until the device shuts down.

5.2 Video Recording

The camera supports 1296P HD video resolution with a 160° wide-angle lens.

- **Start Recording:** Press the Video button (3) once to begin video recording. A red indicator light will typically flash.
- **Stop Recording:** Press the Video button (3) again to stop recording.

High Quality Resolution

Image: The camera's display indicating 1296P Full HD video recording capability.

5.3 Photo Capture

- **Take Photo:** Press the Photo button (7) once to capture a still image.

5.4 Audio Recording

- **Start Audio Recording:** Press the Audio button (8) once to begin audio-only recording.
- **Stop Audio Recording:** Press the Audio button (8) again to stop audio recording.

5.5 Night Vision

The camera features automatic infrared night vision with 4 infrared lamps, capable of capturing clear footage up to 10 meters (32 feet) in low-light conditions.

- **Automatic Activation:** Night vision activates automatically in low light.
- **Manual Activation:** You can also press the Night Vision button (4) to manually toggle infrared night vision.

Auto Infrared Night Vision

Equipped with 4 infrared Lamp beads, easily capture clear footage up to 32 feet away in pitch-black darkness

Image: Demonstration of the camera's automatic infrared night vision capability.

5.6 Loop Recording

The camera includes 32GB of internal memory. When the memory capacity is reached, the camera automatically overwrites the oldest files to continue recording.

Loop recording

Overwrites the oldest file, saves memory space

Image: Explanation of loop recording and the camera's 32GB internal storage.

5.7 Playback and File Transfer

- **On-Device Playback:** Use the camera's 2-inch display and navigation buttons to review recorded videos and photos.
- **Computer Playback/Transfer:** Connect the camera to a computer using the USB cable. The camera will appear as a removable disk, allowing you to transfer files.

6. MAINTENANCE

- **Cleaning:** Use a soft, dry cloth to clean the camera body. For the lens, use a specialized lens cleaning cloth. Do not use harsh chemicals or abrasive materials.
- **Storage:** Store the camera in a cool, dry place away from direct sunlight and extreme temperatures.
- **Battery Care:** To prolong battery life, avoid fully discharging the battery frequently. Charge the camera regularly, even if not in use for extended periods.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Camera does not power on.	Low battery or faulty battery.	Charge the camera for at least 3 hours. If the issue persists, contact support.
Cannot record video/photo.	Memory full or recording error.	Ensure loop recording is enabled or transfer files to free up space. Restart the camera.
Poor video quality at night.	Night vision not active or insufficient ambient light for IR.	Ensure night vision is enabled (auto or manual). Ensure no obstructions block the IR lamps.
Camera is unresponsive.	Software glitch.	Press and hold the Power On/Off button for 10-15 seconds to force a restart.
