Orbit B-hyve Smart Hose Faucet Timer

Orbit B-hyve Smart Hose Faucet Timer with Wi-Fi Hub User Manual

Model: B-hyve Smart Hose Faucet Timer

INTRODUCTION

The Orbit B-hyve Smart Hose Faucet Timer with Wi-Fi Hub provides advanced control over your outdoor watering. This system allows you to manage your hose faucet watering from anywhere using your smart device, ensuring your plants receive optimal hydration while conserving water. The included Wi-Fi hub connects your timers to the internet, enabling remote programming, weather-based adjustments, and real-time monitoring.

PACKAGE CONTENTS

- 2 x B-hyve Smart Hose Faucet Timers
- 1 x B-hyve Wi-Fi Hub
- User Manual (this document)

SETUP AND INSTALLATION

1. Wi-Fi Hub Setup

Plug the B-hyve Wi-Fi Hub into an indoor electrical outlet within range of your home's Wi-Fi router. Ensure it is placed in a central location to maximize signal strength to your hose faucet timers.

2. Timer Installation

Thread the B-hyve Smart Hose Faucet Timer onto any standard outdoor hose faucet. Hand-tighten until snug. Do not overtighten. Ensure the timer is oriented vertically for optimal performance.

3. App Download and Pairing

Download the free B-hyve app from the Apple App Store (iOS) or Google Play Store (Android). Create an account and follow the in-app instructions to add your Wi-Fi Hub and then your Smart Hose Faucet Timers. The app will guide you through the pairing process.

OPERATION

Manual Watering

To manually water without using the app, press the 'on/off' button on the front of the timer. Press once to turn on, and press again to turn off. The timer will run for a default duration, which can be adjusted in the app.

App Control and Scheduling

The B-hyve app provides complete control over your watering schedule. You can set custom watering programs, including start times, durations, and days of the week. The app allows you to make changes from anywhere with an internet connection.

Image: The B-hyve system offers comprehensive control via the app.

Smart Watering with Weather Sense

Utilize the Weather Sense technology for optimized watering. Based on local weather feeds, soil type, slope, and sun exposure, the timer automatically adjusts watering schedules to deliver the precise amount of water needed, preventing overwatering and conserving resources.

Water Usage Tracking (Know the Flow)

The built-in flow meter allows you to monitor and track water usage directly within the B-hyve app. This feature helps

you understand your water consumption and identify potential leaks or inefficiencies.

ADVANCED FEATURES

Expandable System

The B-hyve system is designed to be expandable. You can add additional B-hyve Smart Hose Faucet Timers (sold separately) to create multiple watering zones in your yard, all managed from the same B-hyve app and Wi-Fi Hub. These timers network together to boost signal strength.

Image: The B-hyve system supports multiple timers for expanded coverage.

For Use In North America Only

Please note that the software and updates for this model are specifically approved for use in North America. International versions of Orbit B-hyve products are available for other regions.

Maintenance

- **Cleaning:** Periodically wipe down the exterior of the timer and hub with a damp cloth. Do not submerge the timer or hub in water.

- **Battery Replacement:** The hose faucet timer uses standard batteries (type not specified in provided data, typically AA or AAA). Replace batteries when the low battery indicator appears in the app or on the device.

- **Winterization:** Before the first frost, disconnect the timer from the faucet and store it indoors in a dry, protected area to prevent freezing damage.

Troubleshooting

Problem	Possible Cause	Solution
Timer not watering	Low batteries, no schedule set, manual override, water supply off.	Check/replace batteries. Verify schedule in app. Ensure manual watering is off. Check faucet.
App not connecting to timer/hub	Hub unplugged, out of Wi-Fi range, timer out of hub range, internet issue.	Ensure hub is plugged in and has power. Move hub closer to router. Move timer closer to hub. Check home internet connection.
Inaccurate watering duration	Incorrect settings in app, Weather Sense adjustments.	Review program settings in the B-hyve app. Understand that Weather Sense may adjust durations based on conditions.

PRODUCT SPECIFICATIONS

| Feature	Detail
Brand	Orbit
Model Name	B-hyve Smart Hose Faucet Timer
Material	Plastic (2 Pack configuration)
Number of Settings	3 (likely referring to programming modes)
UPC	840041554687
Manufacturer	ORBIT IRRIGATION
