6. MAINTENANCE

To ensure the longevity and optimal performance of your GameSir X2 Pro controller, follow these maintenance guidelines:

- Keep the controller clean by wiping it with a soft, dry cloth.
- Avoid exposing the controller to extreme temperatures, humidity, or direct sunlight.
- Store the controller in its protective case when not in use to prevent dust and damage.
- Do not attempt to disassemble or repair the controller yourself, as this may void the warranty.

7. TROUBLESHOOTING

7.1 Controller Not Responding

- Ensure your smartphone is securely connected to the Type-C port.
- Verify that your phone's USB debugging or OTG mode is enabled if required by your device.
- Check if the GameSir app (if applicable for your model) requires a firmware update. Some users have reported issues resolved by updating firmware.
- If the controller is unresponsive, try resetting it using a small pin in the reset hole (refer to the physical product for exact location).

7.2 Input Delay

- The direct Type-C connection minimizes input delay. If you experience significant delay, ensure no background apps are consuming excessive resources on your phone.
- For cloud gaming or remote play, ensure a stable and high-speed internet connection.

7.3 Phone Not Charging (Pass-Through)

- Ensure your phone model supports pass-through charging through the controller. Refer to the product specifications or manufacturer's website for a list of supported phones.
- Use a compatible charging cable and power adapter.
- Note that some phones may briefly disconnect and reconnect when a charger is plugged into the pass-through port.
