To begin charging your smartwatch, follow these simple steps:

1. **Connect to Power:** Insert the USB-A end of the charging cable into a compatible USB power source. This can be a wall adapter (5V/1A recommended), a computer's USB port, or a power bank.

4. OPERATING INSTRUCTIONS

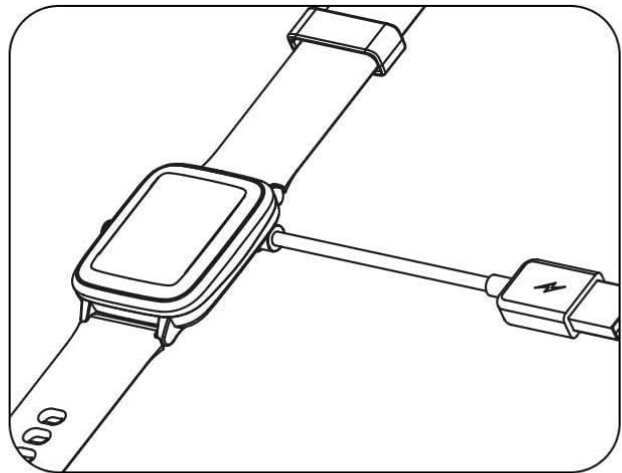

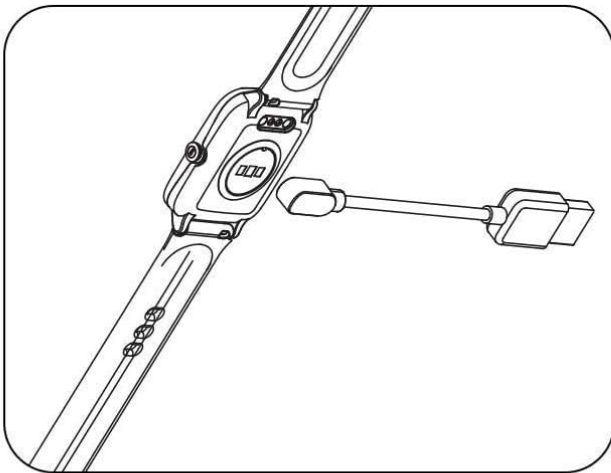

Charging your smartwatch is straightforward with the magnetic connector:

1. **Align Charger:** Bring the magnetic charging head close to the charging contacts on the back of your smartwatch. The magnets will automatically align and snap into place.
2. **Verify Connection:** Ensure the magnetic connection is firm. If the magnets repel, adjust the orientation of the charging head until it attracts to the smartwatch. An incorrect orientation will prevent charging.
3. **Monitor Charging:** Your smartwatch display should indicate that it is charging (e.g., a battery icon with a lightning bolt or a percentage increase).
4. **Charging Time:** Charging time may vary depending on the smartwatch model and its current battery level.

5. MAINTENANCE

Proper care will extend the life of your charging cable:

- **Cleaning:** Use a soft, dry cloth to gently wipe the charging contacts on both the cable and your smartwatch. Avoid using liquids or abrasive cleaners.
- **Storage:** When not in use, store the cable in a cool, dry place, away from direct sunlight and extreme temperatures. Avoid tightly coiling the cable to prevent damage.
- **Handling:** Do not pull the cable by the cord to disconnect it. Always grasp the USB-A plug or the magnetic charging head.

6. TROUBLESHOOTING

If you encounter issues with charging, please refer to the following:

- **Smartwatch Not Charging:**

- Ensure the USB-A end is securely plugged into a working power source.
- Check the magnetic connection to the smartwatch. If the magnets repel, rotate the charging head 180 degrees until it attracts firmly (refer to Image 4.2).
- Verify that the charging contacts on both the cable and smartwatch are clean and free of obstructions.
- Try a different USB power source or wall adapter.

- **Slow Charging:**

- Ensure your power source provides sufficient output (e.g., a 5V/1A adapter). Charging from a computer USB port may be slower.
- Check for any damage to the cable.
