6600mAh Enormous Battery

Figure 3: Illustration of the SIM card tray showing slots for TF Card, Nano SIM, and another Nano SIM.

4. SETUP

4.1 Inserting SIM and TF Cards

1. Locate the SIM card tray on the side of the phone.
2. Use the provided SIM pick to eject the tray.
3. Carefully place your Nano SIM cards and/or TF card into the designated slots, ensuring correct orientation.
4. Gently push the tray back into the phone until it is flush with the device body.

4.2 Initial Power On

Press and hold the Power button (usually on the right side) until the Ulefone logo appears. Follow the on-screen prompts to complete the initial setup, including language selection, Wi-Fi connection, and Google account setup.

4.3 Battery Charging

Before first use, fully charge your device using the provided AC power charger and data cable. The Armor 15 features a 6600mAh battery for extended usage.

6. MAINTENANCE

6.1 Ruggedness and Cleaning

The Ulefone Armor 15 is IP68/IP69K and MIL-STD-810G certified, making it resistant to water, dust, and drops. After exposure to water, dust, or dirt, it is recommended to rinse the device with clean water and ensure all ports are dry before charging or using accessories.

6.2 Battery Care

To prolong the life of your 6600mAh battery, avoid extreme temperatures and do not leave the device fully charged or fully discharged for extended periods. Use only the original charger and cable.

7. TROUBLESHOOTING

If you encounter issues such as no data connection, no signal, or other operational problems, please refer to the following:

- **Network Issues:** Ensure your SIM card is properly inserted and your carrier supports the device's network bands. The Ulefone Armor 15 is not compatible with AT&T or Cricket networks.
- **General Performance:** Restarting the device can resolve many minor software glitches.
- **Contact Support:** For persistent issues, please contact Ulefone customer support.
