Pssopp Universal Anti-Squirrel Baffle Instruction Manual

Brand: Pssopp | Model: Pssoppkgz5xqgm3n-12

1. PRODUCT OVERVIEW

The Pssopp Universal Anti-Squirrel Baffle is designed to protect bird feeders and birdhouses from squirrels and raccoons. Its wrap-around design creates a barrier, preventing pests from accessing bird food. Constructed from durable PVC and galvanized steel, this baffle is built to withstand various weather conditions.

Image 1.1: A squirrel baffle installed on a pole, effectively blocking a squirrel's access to a bird feeder above. The baffle is black and cone-shaped.

2. PACKAGE CONTENTS

Please verify that all components are present in your package. Contents may vary slightly based on the specific kit purchased.

Option 1:

- 2 x Squirrel Baffles
- 1 x Hook
- 8 x Screws
- 8 x Nuts

Option 2:

- 2 x Squirrel Baffles
- 2 x Fixing Clips
- 8 x Small Screws
- 12 x Nuts
- 4 x Large Screws

Image 2.1: The individual components of the squirrel baffle kit, showing the two halves of the baffle, various screws, and nuts required for assembly.

3. SETUP AND INSTALLATION

The wrap-around design of the baffle allows for convenient installation on existing bird feeder poles or shepherd's hooks.

1. **Assemble the Baffle:** If your baffle comes in two halves, align the edges and secure them together using the provided screws and nuts. Ensure a tight fit to prevent gaps.
2. **Position the Baffle:** Place the assembled baffle around the pole or shepherd's hook that supports your bird feeder. The baffle should be positioned below the feeder.
3. **Secure the Baffle:** Use the included clips or hook to firmly attach the baffle to the pole. The baffle should be

able to move freely if pushed from below, but not slide down the pole easily.

4. **Optimal Placement:** For maximum effectiveness, ensure the squirrel baffle is installed at least 8 to 10 feet away from any tree trunks, fences, or other platforms that squirrels could use to bypass the baffle. This distance prevents squirrels from jumping over or onto the baffle.

Image 3.1: A visual guide demonstrating the assembly process of the squirrel baffle and its function in deterring squirrels from climbing the pole.

Image 3.2: Comparison illustrating a bird feeder before and after the installation of the squirrel baffle. Before, a squirrel is on the feeder; after, the squirrel is blocked by the baffle.

Image 3.3: The squirrel baffle installed in an outdoor garden environment, emphasizing the recommendation to place it 8 to 10 feet away from other structures.

4. OPERATION

Once properly installed, the Pssopp Universal Anti-Squirrel Baffle operates passively by creating a physical barrier. When squirrels attempt to climb the pole towards the bird feeder, they encounter the smooth, wide surface of the baffle, which prevents them from gaining purchase and reaching the feeder. This design ensures that birds can feed undisturbed.

Image 4.1: An illustration depicting a squirrel attempting to bypass the baffle, showcasing the baffle's smooth, durable, and weather-

resistant material.

5. MAINTENANCE

The squirrel baffle requires minimal maintenance. Its smooth surface and durable materials make it easy to clean.

- **Cleaning:** Periodically wipe down the baffle with a damp cloth to remove dirt, dust, or any debris that may accumulate. For stubborn grime, a mild soap solution can be used, followed by rinsing with water.
- **Inspection:** Regularly check the baffle for any signs of damage or loose connections. Ensure all screws and clips remain secure.

6. TROUBLESHOOTING

If squirrels are still accessing your bird feeder despite the baffle's installation, consider the following:

- **Bypass Routes:** Verify that the bird feeder pole is sufficiently far from any trees, fences, or other structures (at least 8-10 feet) that squirrels could use to jump onto or over the baffle.
- **Baffle Height:** Ensure the baffle is installed at an appropriate height on the pole, typically at least 4-5 feet from the ground, to prevent squirrels from jumping directly onto the feeder from below.
- **Secure Installation:** Confirm that the baffle is securely attached to the pole and cannot be dislodged or tilted by squirrels.

7. SPECIFICATIONS

Feature	Detail
Item Model Number	Pssoppkgz5xqgm3n-12
Brand	Pssopp
Material	Polyvinyl Chloride (PVC), Galvanized Steel
Target Species	Bird
Mounting Method	Wrap-around for poles/shepherd's hooks
Package Dimensions	31.3 x 7.4 x 6.9 cm
Package Weight	150 grams
Country of Origin	China

Image 7.1: Detailed measurements of the squirrel baffle, indicating its width and height.

8. WARRANTY AND SUPPORT

For information regarding warranty coverage, returns, or technical support, please refer to the retailer's policy where the product was purchased or contact Pssoop customer service directly. Contact details are typically available on the product packaging or the official brand website.

ASK A QUESTION ABOUT THIS MANUAL

Ask about setup, troubleshooting, compatibility, parts, safety, or missing instructions. Manuals+ will review the question and use this page's manual context to help answer it.
