## 6. OPERATING INSTRUCTIONS

---

### 6.1 Power Management

- **Turning On:** Press the power button once.
- **Shutting Down:** Click the Start button in Windows, then Power > Shut down.
- **Restarting:** Click the Start button in Windows, then Power > Restart.
- **Sleep Mode:** Click the Start button in Windows, then Power > Sleep.

### 6.2 Display Configuration

To configure multiple displays or adjust display settings in Windows 11 Pro:

1. Right-click on an empty area of the desktop and select "Display settings."
2. In the Display settings window, you can detect, identify, and arrange your displays.
3. Adjust resolution, orientation, and scaling as needed for each monitor.

### 6.3 Network Connectivity

- **Wired Connection:** If an Ethernet cable is connected, the system should automatically establish a wired network connection.
- **Wireless Connection (Wi-Fi 6E):**
  - a. Click the Wi-Fi icon in the taskbar.

- b. Select your desired Wi-Fi network from the list.
  - c. Enter the network security key (password) if prompted, then click "Connect."
- **Bluetooth:** To pair Bluetooth devices, go to Settings > Bluetooth & devices, and ensure Bluetooth is turned on.

## 7. MAINTENANCE

---

Regular maintenance helps ensure the optimal performance and longevity of your Dell OptiPlex 7020 MFF:

- **Keep it Clean:** Regularly clean the exterior of the computer with a soft, dry cloth. Use compressed air to gently clear dust from vents to prevent overheating. Ensure the system is powered off and unplugged before cleaning.
- **Software Updates:** Keep your Windows operating system and drivers updated. Windows Update can be accessed via Settings > Windows Update. Dell also provides driver updates on its official support website.
- **Antivirus Protection:** Ensure your system has up-to-date antivirus software to protect against malware and viruses.
- **Data Backup:** Regularly back up important data to an external drive or cloud storage to prevent data loss.
- **Proper Ventilation:** Ensure the computer is placed in a location with adequate airflow and that its vents are not obstructed.

## 8. TROUBLESHOOTING

---

This section addresses common issues you might encounter:

### 8.1 No Power

- Ensure the power adapter is securely connected to both the computer and a working electrical outlet.
- Verify the power outlet is functional by plugging in another device.
- Check the power adapter for any visible damage.

### 8.2 No Display

- Ensure the monitor is powered on and the video cable (DisplayPort or HDMI) is securely connected to both the computer and the monitor.
- Try connecting the monitor to a different video port on the computer, if available.
- Test the monitor with another device or use a different cable if possible.

### 8.3 Network Connectivity Issues

- **Wired:** Check if the Ethernet cable is properly connected. Verify your router/modem is working correctly.
- **Wireless:** Ensure Wi-Fi is enabled in Windows settings. Confirm you are connected to the correct network and have entered the password correctly. Restart your router/modem.

### 8.4 System Slowdown

- Check Task Manager (Ctrl+Shift+Esc) for applications consuming excessive CPU or RAM.
- Ensure Windows and drivers are up to date.
- Run a disk cleanup and defragmentation (for HDDs, not necessary for SSDs).
- Scan for malware or viruses.
