4. Setup

4.1 Charging the Screwdriver

Before first use, fully charge the screwdriver. The charging port is located on the handle.

1. Connect the provided USB Charging Cord to the Micro-USB port on the screwdriver.
2. Connect the other end of the USB cable to a compatible USB power source (e.g., laptop, car charger, power bank).
3. The LED Charging Indicator will illuminate red during charging.
4. Once fully charged, the LED Charging Indicator will turn green.
5. **Important:** Do not charge for more than 5 hours to prevent battery damage.

4.2 Installing Bits

1. Select the appropriate screwdriver bit or drill bit for your task.
2. Insert the bit firmly into the durable chuck at the front of the screwdriver until it clicks into place.
3. To remove, pull the bit straight out from the chuck.

5. Operating Instructions

5.1 Adjusting Handle Position

1. To change the handle position from pistol grip to straight or vice-versa, press the button on top of the handle with your thumb.
2. Rotate the handle to the desired 90-degree position.
3. Release the button; the handle will lock into place.

5.2 Driving/Removing Screws

1. Ensure the correct bit is installed.
2. Use the forward/reverse button (typically a slider switch near the trigger) to select the desired rotation direction:

- Forward (clockwise) for driving screws.
- Reverse (counter-clockwise) for removing screws.

3. Place the bit onto the screw head.
4. Press the switch button (trigger) to activate the screwdriver. The front LED light will automatically turn on.
5. Apply gentle, steady pressure while operating.
