| Problem                   | Solution                                                                                                                                            |
|---------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------|
| Headset does not power on | Ensure the headset is charged. Connect to a power source using the USB-C cable.                                                                     |
| Cannot pair via Bluetooth | Ensure the headset is in pairing mode (flashing blue/red LED). Turn off and on your device's Bluetooth. Move closer to the device.                  |
| No sound                  | Check headset and device volume levels. Ensure the headset is properly paired and selected as the audio output device.                              |
