Modelones 48W UV/LED Nail Lamp with UV Protection Gloves Instruction Manual

Brand: modelones | Model: 2AUS-MOAS-00614

1. INTRODUCTION

This manual provides detailed instructions for the safe and effective use of your Modelones 48W UV/LED Nail Lamp and accompanying UV Protection Gloves. Designed for curing gel nail polish, this device offers convenience and professional results for at-home manicures and pedicures.

2. IMPORTANT SAFETY INFORMATION

Please read all safety instructions carefully before use to prevent injury or damage to the device.

- Always wear the provided UPF99+ UV Protection Gloves when using the nail lamp to shield your hands from UV exposure.
- Avoid looking directly into the UV/LED light source. Prolonged direct exposure may be harmful to eyes.
- Do not use the device near water or in damp environments.
- Keep out of reach of children.
- Unplug the device when not in use or before cleaning.
- If the device is damaged, do not operate it. Contact customer support for assistance.

3. WHAT'S INCLUDED

Your Modelones UV Light for Gel Nails package includes:

- 1 x Modelones 48W UV/LED Nail Lamp
- 1 x Pair of UPF99+ UV Protection Gloves
- 1 x Power Adapter

Figure 1: Modelones 48W UV/LED Nail Lamp and included UV Protection Gloves.

4. SETUP

1. **Unpack the Device:** Carefully remove the nail lamp and all accessories from the packaging.
2. **Connect Power:** Insert the power adapter into the DC input port on the back of the nail lamp. Plug the adapter into a standard electrical outlet.

Step into the world of Modelones, where we've been offering premium home manicure products since our establishment in Los Angeles in 2015.

We delve into the realm of nails, constantly exploring and developing premium products that surpass expectations, we aim to offer you an extraordinary nail art experience.

Figure 2: Connect the power adapter to the nail lamp and plug it into a power outlet.

3. **Initial Power-On:** Once connected, all indicator lights will briefly turn on for 2 seconds before turning off, indicating the nail dryer is ready for use.

5. OPERATING INSTRUCTIONS

5.1. Preparing for Manicure

1. Prepare your nails by cleaning, filing, and shaping them as desired.
2. Apply a thin layer of base coat to your nails.
3. Wear the Modelones Anti-UV Gloves to protect your hands from UV exposure.

PAINLESS MANICURE KIT

Reduce the burning sensation

High-power sunscreen with lasting protection that greatly reduces lamp damage to the skin.

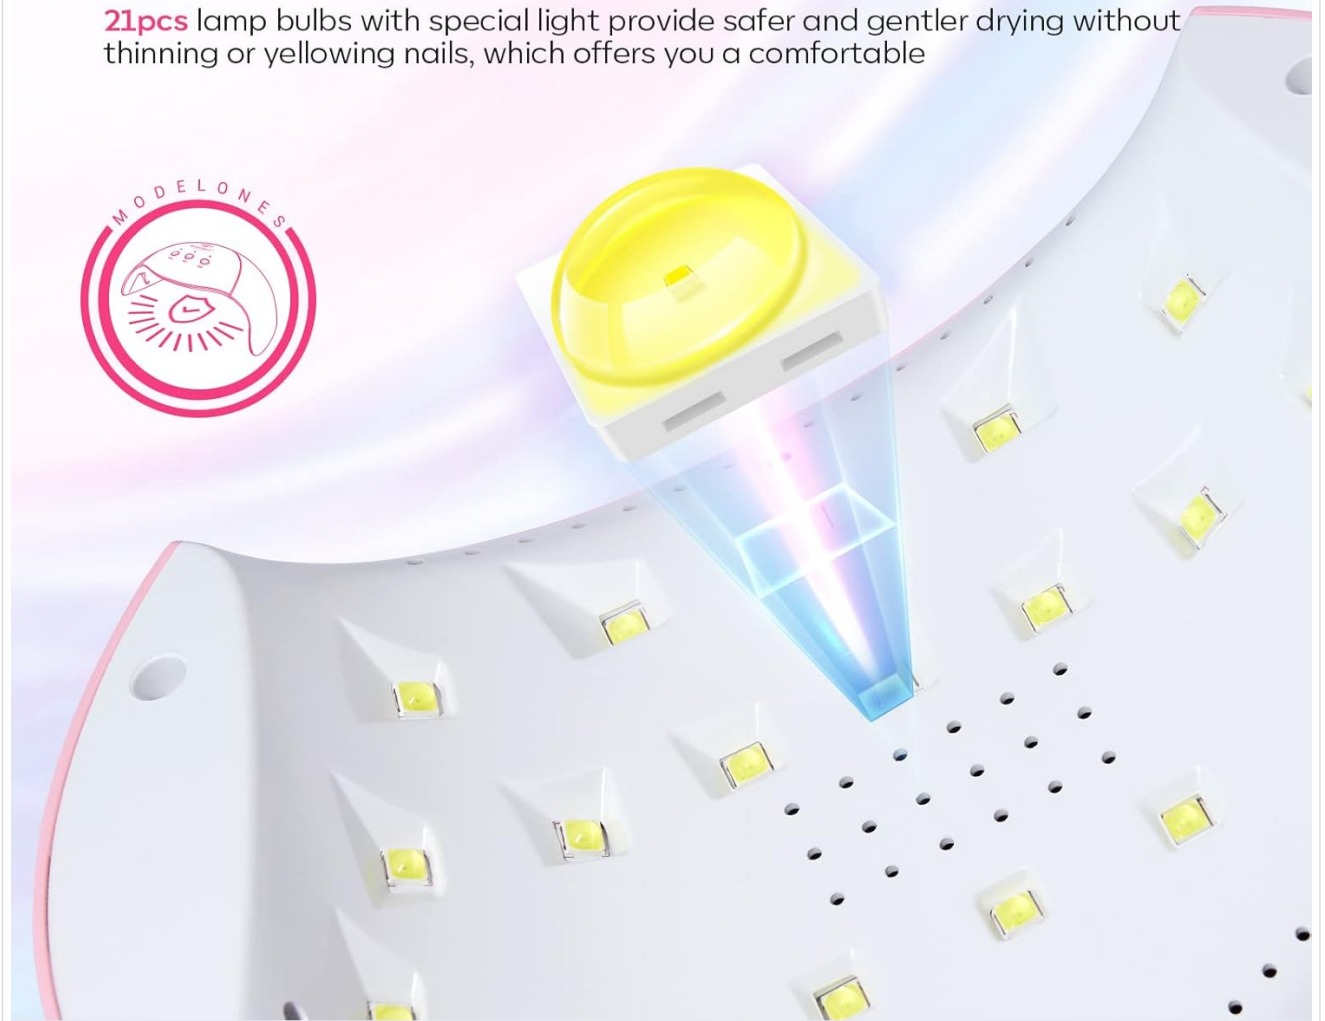

Figure 3: Always wear the provided UV protection gloves during the curing process.

5.2. Curing Gel Polish

1. **Apply Gel Polish:** Apply a thin, even layer of your chosen gel nail polish color.
2. **Select Timer Setting:** The nail lamp features three timer settings: 30s, 60s, and 90s. Select the appropriate time mode based on the specific gel polish instructions.

Safe-Wave Technology

21pcs lamp bulbs with special light provide safer and gentler drying without thinning or yellowing nails, which offers you a comfortable

50,000hours lifetime up to 5 years that no need to worry about changing bulbs

Figure 4: The nail lamp offers 30s, 60s, and 90s timer options for different curing needs.

3. **Automatic Sensor Function:** Alternatively, you can simply place your hand (or foot) into the lamp without pressing a timer button. The automatic sensor will detect your hand and turn on the light. The default time for automatic mode is 90 seconds. The light will turn off automatically when your hand is removed.

Smart Cure Senser

It automatically starts once you put it in your hands, making it easier to use and ensuring the best cure for the time you choose.

Figure 5: The smart sensor activates the lamp when hands are inserted and turns it off when removed.

- Repeat for Layers:** Repeat steps for additional color coats and finally for the top coat. A sticky layer after curing is normal; apply a top coat and cure again for optimal results.

6. MAINTENANCE

- **Cleaning:** Ensure the device is unplugged before cleaning. Wipe the surface with a soft, dry cloth. Do not use abrasive cleaners or solvents.
- **Storage:** Store the nail lamp in a cool, dry place away from direct sunlight when not in use.
- **Heat Dissipation:** The built-in heat dissipation holes prevent overheating and extend the lifespan of the UV/LED bulbs, which are designed for up to 50,000 hours of use.

7. TROUBLESHOOTING

Problem	Possible Cause	Solution
Nail lamp does not turn on.	Not properly plugged in; power outlet issue; device malfunction.	Check power connection. Try a different outlet. If problem persists, contact customer support.
Gel polish remains sticky after curing.	Insufficient curing time; gel polish type; thick application.	Increase curing time (e.g., use 60s or 90s setting). Apply thinner coats. Ensure top coat is applied and cured.
Nails are not fully cured.	Incorrect timer setting; uneven hand placement; old gel polish.	Ensure correct timer is selected. Place hand flat inside the lamp. Use fresh gel polish.

8. SPECIFICATIONS

- **Power:** 48W
- **Light Source:** UV and LED dual light sources (21 pcs)
- **Timer Settings:** 30s, 60s, 90s
- **Features:** Automatic sensor, heat dissipation holes
