PRODUCT OVERVIEW AND BENEFITS

The Halsa Sauna Hat is crafted from 100% natural wool, offering a comfortable and breathable fit for both men and women. Its primary function is to shield your head from the intense heat of the sauna, allowing you to remain in the sauna for extended periods and maximize the therapeutic benefits.

- **Head Protection:** Helps keep your head cool in high temperatures, preventing overheating.
- **Hair Protection:** Safeguards hair from drying out and damage caused by extreme sauna heat, which can lead to brittle hair and split ends.
- **Extended Sauna Sessions:** By maintaining a cooler head, the hat enables longer, more comfortable sauna sessions, leading to increased sweating and deeper heat penetration.
- **Universal Fit:** Designed as one size fits most, eliminating the need for specific head measurements.

SETUP AND PREPARATION

The Halsa Sauna Hat requires minimal setup. It is ready for use directly out of the packaging.

1. **Unpack:** Remove the sauna hat from its packaging.
2. **Optional Cooling Enhancement:** For an increased cooling effect, you may soak the hat in cool water before entering the sauna. As the water evaporates from the hat during your session, it will create a cooling sensation on your head.

OPERATING INSTRUCTIONS

Using your Halsa Sauna Hat is straightforward and designed to enhance your sauna experience.

1. **Wear Before Entry:** Put on the sauna hat before entering the sauna or banya. Ensure it covers your head adequately.
2. **During Sauna Session:** The hat will work to shield your head from the rising heat, keeping your head cooler than the rest of your body. This allows you to tolerate higher temperatures and stay in the sauna for a longer duration.
3. **Post-Sauna:** Remove the hat after your sauna session.
