

Fossil BQ2665

Fossil BQ2665 Sullivan Men's Analog Quartz Watch User Manual

Model: BQ2665

INTRODUCTION

Thank you for choosing the Fossil BQ2665 Sullivan Men's Analog Quartz Watch. This manual provides essential information for the proper setup, operation, maintenance, and troubleshooting of your new timepiece. Please read these instructions carefully to ensure optimal performance and longevity of your watch.

SETUP

1. Initial Inspection

Upon unpacking, inspect your watch for any visible damage. Ensure all included components, such as the warranty card and original box, are present. The watch comes with a pre-installed lithium-metal battery.

2. Setting the Time

- Pull out the crown:** Gently pull the crown (the small knob on the side of the watch case) outwards to the time-setting position. You may feel a slight click.
- Adjust the time:** Rotate the crown clockwise or counter-clockwise until the hour and minute hands indicate the correct time.
- Push in the crown:** Once the time is set, push the crown back into its original position against the watch case. This will start the watch movement.

OPERATING INSTRUCTIONS

1. Basic Timekeeping

Your Fossil BQ2665 watch features an analog display powered by a precise quartz movement. The hour, minute, and second hands continuously move to indicate the current time. Ensure the crown is fully pushed in for accurate timekeeping.

2. Water Resistance (50 Meters)

This watch is water-resistant up to 50 meters (5 ATM). This means it is suitable for short periods of recreational swimming, showering, or washing hands. **It is not suitable for diving, snorkeling, or high-impact water sports.** Always ensure the crown is fully pushed in before any contact with water. Avoid operating the crown while the watch is wet.

MAINTENANCE

1. Cleaning

- **Case and Crystal:** Wipe the watch case and dial window (sapphire crystal or mineral glass) with a soft, damp cloth. For stubborn dirt, a mild soap solution can be used, followed by rinsing with clean water and drying thoroughly.
- **Leather Strap:** Avoid prolonged exposure of the leather strap to water, direct sunlight, or harsh chemicals.

Clean with a dry, soft cloth. If it gets wet, allow it to air dry naturally, away from direct heat.

2. Battery Care

The watch is powered by a lithium-metal battery. When the watch stops or the hands move erratically, it indicates that the battery needs replacement. Battery replacement should be performed by a qualified watch technician to maintain water resistance and prevent damage to the movement.

3. Storage

When not in use, store your watch in a cool, dry place, away from direct sunlight, extreme temperatures, and strong magnetic fields. The original box provides excellent protection.

TROUBLESHOOTING

Problem	Possible Cause	Solution
Watch not running	Crown not pushed in; depleted battery	Ensure crown is fully pushed in. If still not running, battery may need replacement.
Time is inaccurate	Time not set correctly; low battery; exposure to strong magnetic fields	Reset the time. If problem persists, consider battery replacement or demagnetization by a professional.
Condensation under crystal	Temperature change; water resistance compromised	If condensation is persistent, seek professional inspection immediately to prevent internal damage.

SPECIFICATIONS

Feature	Detail
Model Number	BQ2665
Model Name	Sullivan
Brand	Fossil
Display Type	Analog
Movement	Quartz

Feature	Detail
Power Source	Battery (1 Lithium-metal battery included)
Case Material	Stainless Steel
Case Diameter	44 Millimeters
