SETUP AND INSTALLATION

Installing your Kwikset SmartCode 270 is designed to be simple and can be completed with just a screwdriver. For detailed, step-by-step 3D interactive instructions with voice, text, and animation guidance, it is highly recommended to use the [BILT app](#).

General Installation Steps:

1. **Prepare the Door:** Ensure your door is properly drilled and aligned for a standard deadbolt.
2. **Install the Latch:** Insert the adjustable latch into the door edge and secure it with screws.
3. **Install the Exterior Assembly:** Place the exterior keypad assembly onto the door, ensuring the cable passes through the cross bore.
4. **Install the Mounting Plate:** Secure the interior mounting plate to the exterior assembly with screws.
5. **Install the Interior Assembly:** Connect the cable from the exterior assembly to the interior assembly. Secure the

interior assembly to the mounting plate.

6. **Install Batteries:** Insert 4 AA alkaline batteries (not included) into the battery pack.
7. **Perform Door Handing Process:** Follow the instructions in the BILT app or included guide to calibrate the lock to your door's orientation.

OPERATING INSTRUCTIONS

Keyless Entry

To unlock the door using the touchpad, simply tap the light-up touchpad to activate it, then enter your custom user code. The lock will disengage, allowing you to open the door. To lock the door, press the dedicated lock button on the keypad.

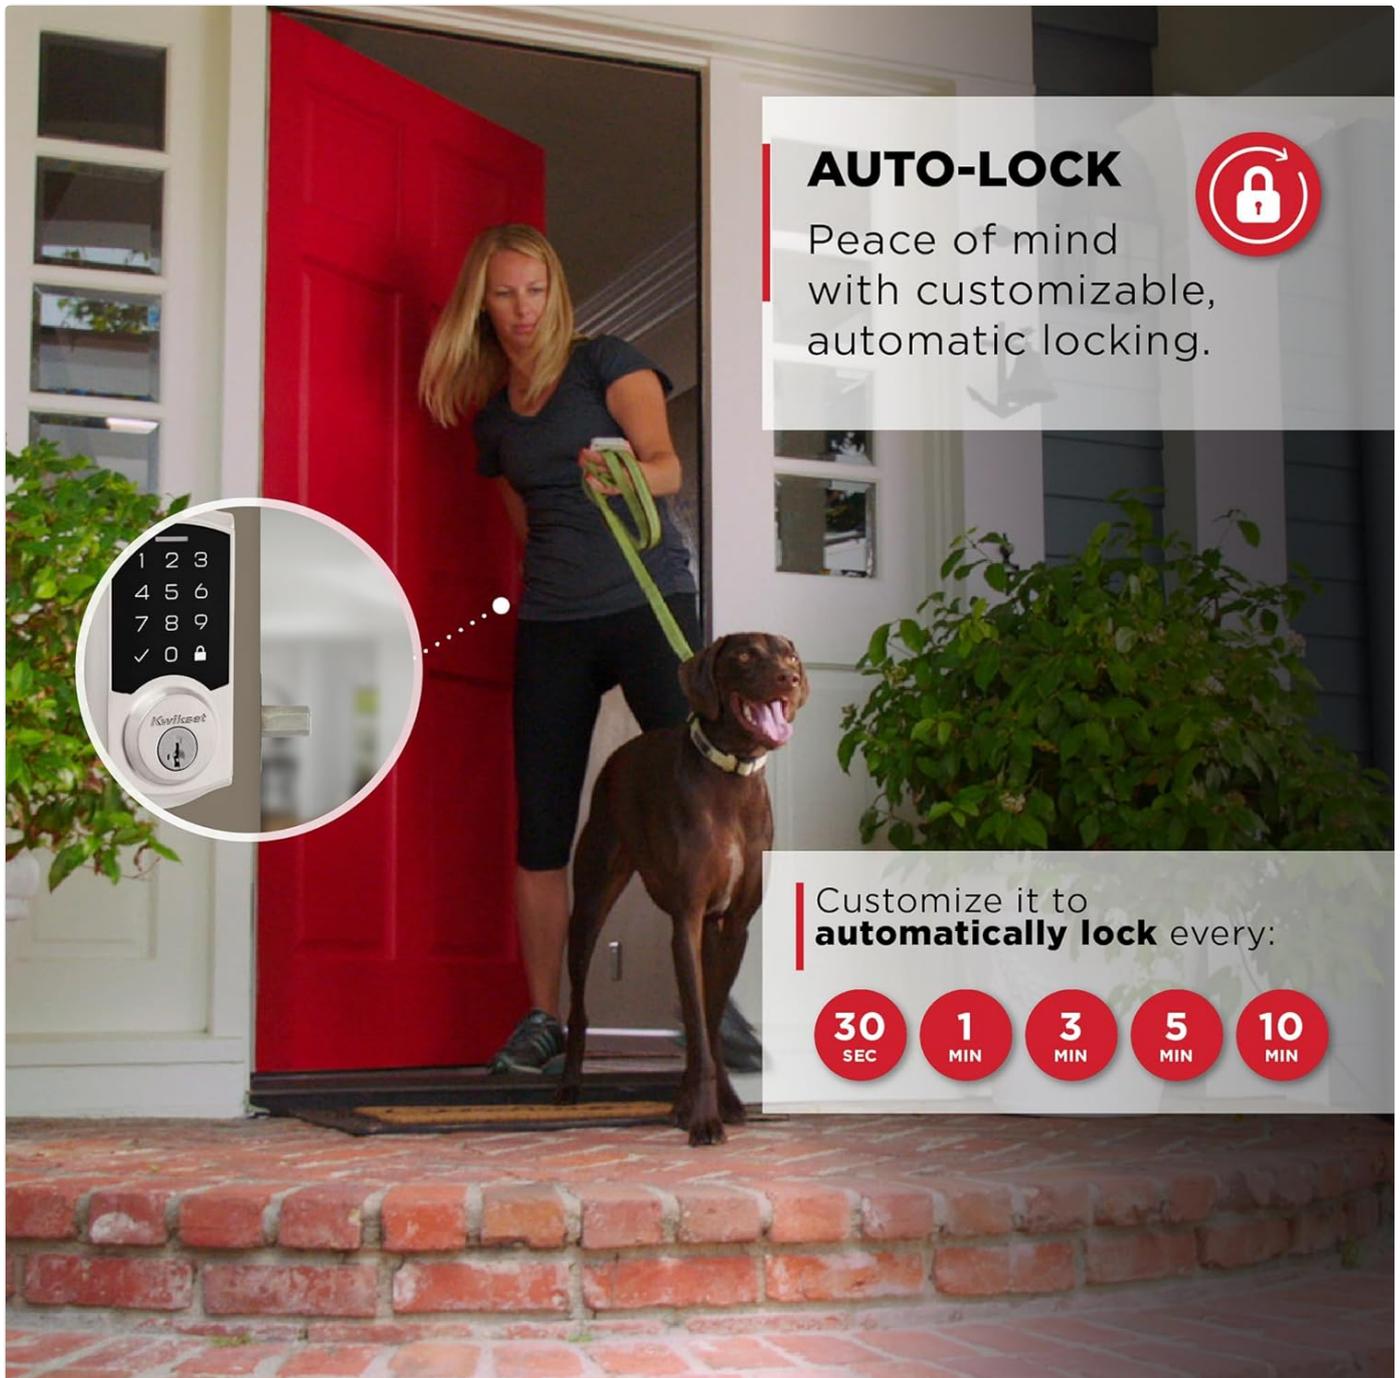

Keyless entry makes coming and going secure and convenient.

Auto-Lock Feature

For added security and peace of mind, the SmartCode 270 can be customized to automatically lock after a set period. You can configure the auto-lock to engage every 30 seconds, 1 minute, 3 minutes, 5 minutes, or 10 minutes after the door is

unlocked.

AUTO-LOCK 

Peace of mind with customizable, automatic locking.

Customize it to **automatically lock** every:

- 30** SEC
- 1** MIN
- 3** MIN
- 5** MIN
- 10** MIN

Customize the auto-lock feature to automatically secure your door after a chosen time interval.

Code Management

The lock allows for easy management of user codes. You can customize up to 50 unique user codes for regular access, 10 one-time user codes for temporary access (e.g., for service personnel), and 1 programming code to manage all other codes. Codes can be added, edited, or deleted as needed.

EASY CODE MANAGEMENT

50 user codes, 10 one-time user codes and 1 programming code.

Manage up to 50 user codes, 10 one-time codes, and a programming code for flexible access control.

Intrusion Alert

If three consecutive incorrect code entries are attempted, the lock will sound an alarm and temporarily disable the keypad for 1 minute to deter tampering and unauthorized access.

Vacation Mode

Activate Vacation Mode to temporarily disable the keypad. This feature ensures that no one can operate your door lock via code entry while you are away, providing enhanced security during extended absences.

Low Light Code Entry

The touchpad features bright LED lights that illuminate the keypad, making it easy to enter your user code even in low-light conditions or at night. Simply tap the keypad to activate the lights.

MAINTENANCE

Battery Replacement

The Kwikset SmartCode 270 operates on 4 AA alkaline batteries (not included), providing approximately 12 months of battery life. When the batteries are low, the lock will provide an indicator. To replace them, remove the interior cover, replace the old batteries with new ones, and reattach the cover.

Cleaning

To maintain the finish of your lock, wipe it with a soft, damp cloth. Avoid using abrasive cleaners, solvents, or harsh chemicals, as these can damage the finish and electronic components.

TROUBLESHOOTING

If you encounter issues with your Kwikset SmartCode 270, try the following common troubleshooting steps:

- **Lock Not Responding:** Check battery levels and replace if necessary. Ensure the door handing process was completed correctly.

- **Codes Not Working:** Verify that the correct user code is being entered. Ensure the lock is not in Vacation Mode. Re-program the user codes if needed.
- **Deadbolt Not Extending/Retracting Fully:** Check for any obstructions in the door frame or strike plate. Ensure the latch is properly aligned.
- **Keypad Not Lighting Up:** Tap the keypad to activate the backlight. If it still doesn't light up, check battery levels.

For more detailed troubleshooting or persistent issues, refer to the comprehensive guide in the BILT app or contact Kwikset customer support.
