

Tiong A4281

Tiong Men's A4281 Clear Cover Quartz Skeleton Watch User Manual

Model: A4281 | Brand: Tiong

INTRODUCTION

Thank you for choosing the Tiong Men's A4281 Clear Cover Quartz Skeleton Watch. This manual provides essential information for the proper setup, operation, and maintenance of your new timepiece. Designed with a unique transparent dial and durable stainless steel, this watch combines modern aesthetics with reliable quartz movement. Please read this manual thoroughly to ensure optimal performance and longevity of your watch.

PRODUCT FEATURES

- **Transparent Hologed-Out Design:** Features a clear cover and skeleton dial, allowing visibility of the internal quartz mechanism.
- **Durable Stainless Steel Band:** The watch band is crafted from stainless steel, offering breathability, smoothness, and adjustable length for a comfortable fit.
- **Accurate Quartz Movement:** Equipped with a precise quartz movement for accurate timekeeping, powered by a replaceable battery. An extra battery is included for convenience.
- **30M Water Resistance:** Suitable for daily use such as hand washing and swimming. **Note:** Do not press any buttons while the watch is submerged in water, and avoid prolonged underwater activities like diving.
- **Luminous Function:** Watch hands feature a luminous coating for improved visibility in low-light conditions.

LUMINOUS FUNCTION

The luminous hands of the Tiong A4281 watch glow in the dark for easy time viewing.

SETUP

1. Adjusting the Band Length

The stainless steel band can be adjusted to fit your wrist. Use the provided watch adjuster tool to remove or add links as needed. Ensure the clasp closes securely after adjustment.

2. Setting the Time

1. Gently pull out the crown (the small knob on the side of the watch case).
2. Rotate the crown to move the hands and set the desired time.
3. Once the time is set, push the crown back into its original position to start the watch and ensure water resistance.

Pull out and rotate the crown to adjust the time.

OPERATING INSTRUCTIONS

Your Tiong A4281 watch operates on a quartz movement, providing reliable and accurate timekeeping. Once the time is set and the crown is pushed in, the watch will continuously display the current time. The visible gears on the skeleton dial are part of the aesthetic design; the primary timekeeping function is managed by the internal quartz mechanism.

MAINTENANCE

Cleaning

To maintain the appearance of your watch, wipe it regularly with a soft, dry cloth. For the stainless steel band, a slightly damp cloth can be used, followed by drying. Avoid using harsh chemicals or abrasive materials.

Water Resistance

The watch is rated for 30 meters (3 ATM) water resistance, suitable for hand washing and brief immersion. To prevent water damage, ensure the crown is fully pushed in before any contact with water. Do not operate the crown or press any buttons while the watch is wet or submerged. Avoid hot water, steam, and prolonged exposure to water.

The Tiong A4281 watch is water-resistant up to 30 meters.

Battery Replacement

The quartz movement requires a battery (1 LR44, included). When the watch stops or its accuracy diminishes, it indicates the battery needs replacement. An extra battery is provided. It is recommended to have battery replacement performed by a qualified watch technician to ensure proper sealing and maintain water resistance.

TROUBLESHOOTING

- **Watch Not Running:** Check if the crown is fully pushed in. If it is, the battery may need replacement.

- **Time Inaccuracy:** While rare for quartz watches, if the time is consistently inaccurate, the battery may be low, or the movement may require inspection by a professional.
- **Band Clasp Issues:** If the clasp feels loose or does not secure properly, inspect it for any debris or damage. Ensure the links are correctly reassembled if you have adjusted the band.

SPECIFICATIONS

Case Thickness:	11mm
Strap Width:	18mm
Wearing Length:	160-200mm
Strap Material:	Stainless Steel
Waterproof Rating:	30M (3 ATM)
Dial Type:	Double-sided Skeleton Dial
