Ewon Spool with Line Instruction Manual

For Worx String Trimmer Models: WG104E.1, WG105, WG106, WG108, WG109, WG112, WG113, WG115, WG116, WG117, WG118, WG119, WG124, WG168, WG184, WG184.9, WG190, WG191, WX100

INTRODUCTION

This manual provides essential instructions for the proper installation, use, and maintenance of your Ewon replacement spools with line. These spools are designed for compatibility with various Worx string trimmer and edger models. Please read this manual thoroughly before use to ensure safe and efficient operation.

Important: Always verify your trimmer model number and the part number before purchasing and installing replacement parts to ensure correct fitment.

PRODUCT COMPATIBILITY

These replacement spools are compatible with the following Worx String Trimmer and Edger models:

- WG104E.1
- WG105
- WG106
- WG108
- WG109
- WG112
- WG113
- WG115
- WG116
- WG117
- WG118

- WG119
- WG124
- WG168
- WG184
- WG184.9
- WG190
- WG191
- WX100

Compatible part numbers include WA0007, WA0014, and 50015534.

PACKAGE CONTENTS

Each package contains:

- 3 x Spool with pre-wound line

Image: Three Ewon replacement spools, each pre-wound with red trimmer line, shown from a top-down perspective. The spools are black plastic with clear plastic covers over the line.

SETUP AND INSTALLATION

1. **Safety First:** Before attempting any installation, ensure your string trimmer is turned off and disconnected from its power source (unplugged or battery removed).
2. **Remove Old Spool:** Locate the spool cap on your trimmer head. Depending on your model, you may need to press tabs, twist, or unscrew the cap to remove it. Carefully remove the old, empty, or damaged spool.

3. **Clean Trimmer Head:** While the spool is removed, take the opportunity to clean any debris, grass, or dirt from the trimmer head area.
4. **Prepare New Spool:** Take one of the new Ewon replacement spools. Ensure the line is properly secured in the small notch on the spool's edge.
5. **Insert New Spool:** Align the new spool with the trimmer head. There may be specific guides or slots to ensure correct orientation. Feed the end of the trimmer line through the eyelet on the trimmer head.
6. **Secure Spool Cap:** Replace the spool cap, ensuring it clicks into place or is securely fastened according to your trimmer's design. Gently pull on the line protruding from the eyelet to ensure it feeds freely and is not jammed.
7. **Trim Excess Line:** If the line is too long, use the trimmer's built-in line cutter (if available) or a pair of scissors to trim it to the appropriate length, typically extending just beyond the cutting guard.

Image: Three Ewon replacement spools with red trimmer line. Annotations indicate the line diameter as 1.65mm and line length as 4m, and the material as ABS plastic.

OPERATING INSTRUCTIONS

Once the new spool is installed, operate your Worx string trimmer according to its original manufacturer's instructions. The pre-wound line is designed for automatic feeding in compatible Worx models.

- **Line Feeding:** Most Worx trimmers feature an automatic line feed system. The line will advance as needed during

operation.

- **Avoid Overloading:** Do not force the trimmer into thick brush or attempt to cut materials beyond its intended capacity, as this can prematurely wear out the line or damage the trimmer.
- **Safety Gear:** Always wear appropriate personal protective equipment, including safety glasses, long pants, and sturdy footwear, when operating a string trimmer.

MAINTENANCE

- **Regular Inspection:** Periodically inspect the trimmer line for wear, fraying, or breakage. Replace the spool when the line is depleted or significantly damaged.
- **Cleanliness:** Keep the trimmer head and spool area free from grass clippings and debris to ensure proper line feeding and prevent blockages.
- **Storage:** Store unused spools in a cool, dry place away from direct sunlight to maintain line integrity.

TROUBLESHOOTING

If you encounter issues with your Ewon replacement spool, consider the following:

- **Line Not Feeding:**
 - Ensure the spool is correctly seated in the trimmer head.
 - Check for any tangled line or debris obstructing the feed mechanism.
 - Verify that the line is not fused together due to heat or improper storage.
 - Confirm the spool cap is securely attached.
- **Rapid Line Breakage:**
 - Avoid hitting hard surfaces like concrete, rocks, or fences.
 - Ensure the line is not too long, causing excessive strain.
 - Check if the trimmer head's line cutter is dull or damaged, which can fray the line.
- **Spool Not Fitting:**
 - Double-check your Worx trimmer model number against the compatibility list in this manual.
 - Ensure the spool is oriented correctly during installation.

SPECIFICATIONS

Feature	Detail
Product Type	Replacement Spool with Line
Brand	Ewon
Compatible Trimmer Models	Worx WG104E.1, WG105, WG106, WG108, WG109, WG112, WG113, WG115, WG116, WG117, WG118, WG119, WG124, WG168, WG184, WG184.9, WG190, WG191, WX100
Compatible Part Numbers	WA0007, WA0014, 50015534
Line Diameter	1.65 mm (0.065 inches)

Feature	Detail
Line Length per Spool	4 meters (13.1 feet)
Spool Material	ABS Plastic
Package Quantity	3 Spools
Product Dimensions (each spool)	Approximately 2.52 x 2.52 x 0.79 inches
Item Weight (package of 3)	4.2 ounces
