## OPERATING INSTRUCTIONS

The primary feature of this set is the Motion Brick, which allows for dynamic movement. Once the set is fully assembled, locate the red crank on the side of the mechanism.

- **Activating Motion:** Gently turn the red crank clockwise or counter-clockwise.
- As the crank is turned, Pichu will move towards the berry tree, simulating the action of picking berries.
- The motion is designed to be smooth and continuous as long as the crank is turned.
- This set can be connected to other MEGA Adventure Builder sets to create an expanded world with interconnected motion features. Refer to the instructions of other sets for compatibility.

## MAINTENANCE AND CARE

To ensure the longevity of your building set, follow these simple care guidelines:

- **Cleaning:** Use a soft, dry cloth to gently wipe dust from the pieces. For stubborn dirt, a slightly damp cloth can be used, but ensure pieces are thoroughly dried afterward. Do not submerge in water.
- **Storage:** Store the set in a cool, dry place away from direct sunlight to prevent discoloration or warping of plastic components.
- **Handling:** Avoid excessive force when assembling or disassembling pieces, as this can cause damage.
- **Motion Brick:** Do not apply lubricants or oils to the Motion Brick mechanism, as this can interfere with its operation.
