## Neodrain ZA3-60-T02-MB

# Neodrain 60-Inch Linear Shower Drain Instruction Manual

Model: ZA3-60-T02-MB

## 1. INTRODUCTION

Thank you for choosing the Neodrain 60-Inch Linear Shower Drain. This manual provides essential information for the proper installation, operation, and maintenance of your new linear shower drain. Please read these instructions carefully before beginning installation to ensure safe and efficient use. Keep this manual for future reference.

## 2. SAFETY INFORMATION

**WARNING: Improper installation can lead to water damage, leaks, or injury. If you are unsure about any step, consult a qualified professional plumber or installer.**

- Always wear appropriate personal protective equipment (PPE) during installation, including safety glasses and gloves.
- Ensure all local plumbing codes and regulations are followed.
- Verify that the subfloor and surrounding areas are properly waterproofed before and after installation.
- Handle all components with care to prevent damage or injury.
- Keep children and pets away from the installation area.

## 3. PACKAGE CONTENTS

Verify that all components listed below are included in your package. If any parts are missing or damaged, please contact Neodrain customer support.

- Linear Shower Drain Channel (Shiny Black)
- 2-in-1 Flat & Tile Insert Cover (Shiny Black)
- Adjustable Leveling Feet (2 sets)
- Hair Strainer Basket
- Lifting Hook
- Threaded Adapter
- Protective Fabric
- Plastic Clips (for tile insert)

- Installation Instructions and Accessories

## 4. SPECIFICATIONS

Feature	Description
Brand	Neodrain
Model Number	ZA3-60-T02-MB
Color	Shiny Black
Material	AISI 304 Grade Stainless Steel
Finish Type	Brushed

Feature	Description
Product Dimensions	60" Length, 2.75" Width, 2" Height
Outlet Size	2" Central Outlet
Flow Capability	42.5 L/min High Flow
Special Features	Adjustable Leveling Feet, Removable Grate, Deep Slope Design, 2-in-1 Cover
Certifications	WATERMARK & CUPC Certified
Compatibility	Fits US No-Hub coupling (2" Shower Drain Base sold separately: PVC for B06XSQF1VR, B07DNQFBM5; ABS for B07GYQLXVF). Not compatible with Schluter Kerdi Shower Kit.

## 5. SETUP AND INSTALLATION

The Neodrain Linear Shower Drain is designed for straightforward installation. For optimal performance and to prevent water pooling, ensure the shower floor is sloped towards the drain.

### 5.1. Pre-Installation Considerations

- Confirm the drain size matches your shower pan requirements.
- Ensure proper waterproofing of the shower area.
- Prepare the subfloor for the drain channel.

### 5.2. Installation Steps

1. **Positioning the Drain:** Place the linear drain channel in the desired location. It can be installed along the wall or in the center of the shower. For barrier-free access and efficient drainage, installation along the wall with a single slope is recommended.

2. **Connecting the Drain:** Connect the drain channel to your plumbing system using a compatible 2-inch No-Hub coupling. The threaded adapter can be used to adjust the height and thread into most 2" ABS, PVC, and Cast Iron Flanges.
3. **Leveling:** Use the adjustable leveling feet to support the drain channel body, ensuring it is perfectly level and at the correct height relative to your finished tile surface.
4. **Mortar Bed and Waterproofing:** Apply a mortar bed around the drain channel, ensuring a consistent slope towards the drain. Install your waterproofing membrane over the mortar bed, integrating it with the drain flange.
5. **Tiling:** Install your shower tiles, ensuring they are cut precisely to fit around the linear drain. For the tile insert cover, cut a piece of your shower tile to fit into the cover's recess.
6. **Installing the Cover:** Once tiling is complete and grout has cured, place the 2-in-1 cover (either flat or with the tile insert) into the drain channel. The tile tray clips help reduce noise and prevent scratching.

## 6. OPERATING INSTRUCTIONS

The Neodrain Linear Shower Drain operates passively, collecting and directing water to your plumbing system. Its deep slope design ensures efficient drainage, minimizing water pooling on the shower floor.

- Ensure the drain cover is properly seated in the channel before using the shower.
- The 2-in-1 cover allows you to choose between a flat grate appearance or a tile-insert look, blending seamlessly with your shower floor.
- The integrated hair strainer effectively catches debris and hair, preventing clogs in your plumbing.

## 7. MAINTENANCE

Regular cleaning of your Neodrain Linear Shower Drain is crucial to maintain optimal performance and prevent clogs. The

drain is designed for easy access and cleaning.

## 7.1. Cleaning the Drain

1. **Remove the Cover:** Use the provided lifting hook to carefully remove the 2-in-1 drain cover from the channel.
2. **Remove Hair Strainer:** Lift out the hair strainer basket from the drain channel.
3. **Clean Components:** Remove any accumulated hair and debris from the hair strainer. Rinse the strainer and the drain cover with warm water and mild soap.
4. **Clean Drain Channel:** Use a brush or cloth to clean the inside of the drain channel, ensuring all residue is removed. The deep 'V' profile aids in self-cleaning, but occasional manual cleaning is beneficial.
5. **Reassemble:** Place the clean hair strainer back into the drain channel, followed by the drain cover. Ensure the cover is securely seated.

For a demonstration on how to clean your linear drain, please refer to the video below:

Video: A step-by-step guide demonstrating the process of cleaning the Neodrain Linear Shower Drain, including removing the hair strainer and cleaning the channel.

## 8. TROUBLESHOOTING

If you encounter any issues with your Neodrain Linear Shower Drain, refer to the common problems and solutions below:

Problem	Possible Cause	Solution
Slow Drainage	Hair or debris accumulation in the strainer or channel.	Remove and clean the hair strainer and drain channel (refer to Maintenance section).
Water Pooling on Shower Floor	Improper slope of the shower floor towards the drain.	This is typically an installation issue. Consult a professional to assess and correct the floor slope.
Unpleasant Odor from Drain	Accumulated debris, dry P-trap, or plumbing issue.	Clean the drain thoroughly. Ensure the P-trap has water (run water for a few minutes). If odor persists, consult a plumber.
Drain Cover Not Seating Properly	Debris in the channel or improper installation.	Clear any debris from the channel. Ensure the drain channel is level and properly installed.

## 9. WARRANTY AND SUPPORT

Neodrain stands behind the quality of its products. For specific warranty information regarding your Neodrain Linear Shower Drain, please refer to the product listing on the retailer's website or contact Neodrain customer support directly. If you require further assistance, have questions about installation, or need to report a missing/damaged part, please contact Neodrain customer support through the official brand website or the platform where you purchased the product.
