## 4. SETUP AND INSTALLATION

Proper measurement and installation are crucial for the functionality of your pull-out organizer. Please follow these steps carefully.

## 4.1 Cabinet Measurement Guide

Before purchasing or installing, measure your cabinet's interior dimensions. This organizer requires a minimum cabinet opening of 12.5 inches wide, 21 inches deep, and 15 inches high. Do not include cabinet door hinges in your width measurement.

## 4.2 Installation Steps

1. **Attach Slide Rails to Brackets:** Screw the four full-extension ball-bearing slide rails to the vertical support brackets. Ensure they are oriented correctly for smooth operation.
2. **Position Brackets in Cabinet:** Use the provided mounting template to mark the screw holes on the bottom of your cabinet. Align the assembled brackets with the marked holes.
3. **Secure Brackets:** Screw the brackets firmly into the cabinet base. Ensure the brackets are parallel and level for optimal performance.
4. **Install Baskets:** Carefully slide the wire baskets onto the installed slide rails. The baskets should click into place.
5. **Adjust Basket Height (Optional):** The upper and lower baskets have two height adjustment options on the stand. Adjust as needed by repositioning the baskets on the vertical supports.

## 5. OPERATING INSTRUCTIONS

The LOVMOR 2 Tier Pull Out Cabinet Organizer is designed for smooth and convenient access to your stored items.

### 5.1 Pull-Out Functionality

- Gently pull the front of either the upper or lower basket to extend it out of the cabinet. The full-extension ball-bearing system allows the baskets to slide out completely, providing full access to contents.
- To retract, push the basket back into the cabinet until it is fully seated.

### 5.2 Height Adjustment

The upper and lower baskets can be adjusted to two different heights to accommodate various item sizes. This adjustment is made during installation by selecting the appropriate holes on the vertical support brackets.

Pulling out the upper or lower baskets separately.

The upper and lower baskets are set with two holes to adjust the height.

3-stage slide system for smooth and heavy loads.

### 6. MAINTENANCE

To ensure the longevity and optimal performance of your LOVMOR cabinet organizer, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the metal surfaces with a damp cloth. For stubborn stains, a mild soap solution can be used, followed by drying thoroughly. Avoid abrasive cleaners or harsh chemicals that could damage the chrome finish.
- **Lubrication:** Periodically check the slide rails for smooth operation. If any resistance is felt, a small amount of silicone-based lubricant can be applied to the ball bearings.
- **Inspection:** Regularly inspect all screws and connections to ensure they remain tight. Tighten any loose fasteners as needed.

### 7. TROUBLESHOOTING

If you encounter any issues with your cabinet organizer, refer to the following common problems and solutions:

Problem	Possible Cause	Solution
Baskets do not slide smoothly.	Loose screws, debris in rails, lack of lubrication, uneven installation.	Check and tighten all screws. Clean rails of any debris. Apply silicone lubricant to ball bearings. Verify brackets are level.
Baskets are difficult to pull out or push in.	Overloaded basket, misaligned rails, items obstructing movement.	Reduce weight in the basket. Recheck rail alignment. Ensure no items are blocking the slide path.

Problem	Possible Cause	Solution
Organizer feels wobbly or unstable.	Loose mounting screws, improper installation.	Ensure all mounting screws are securely tightened to the cabinet base. Re-evaluate installation steps for proper alignment.
