## 6. TROUBLESHOOTING

If you encounter any issues with your Frestec refrigerator, please refer to the following common troubleshooting

tips before contacting support:

- **Refrigerator Not Cooling:** Ensure the power cord is securely plugged in. Check the temperature settings to make sure they are not set too high. Verify that the door is closing completely and the seal is intact. Avoid overloading the refrigerator, which can restrict airflow.
- **Unusual Noises:** A whisper-quiet compressor is a feature of this model. If you hear unusual loud noises, check if the refrigerator is level. Ensure nothing is vibrating against the back or sides of the unit.
- **Excessive Frost in Freezer:** While the unit is frost-free, ensure the freezer door is not left ajar. Check the door seal for any gaps.
- **Water Leakage:** Check if the drain pan is properly positioned and not overflowing. Ensure the refrigerator is level.

For more detailed troubleshooting steps or persistent issues, please consult the full user guide or contact customer support.
