LOVMOR 1-Tier 14"W x 18"D

LOVMOR 1-Tier Pull Out Cabinet Organizer (14"W x 18"D)  
Instruction Manual

Model: 1-Tier 14"W x 18"D | Brand: LOVMOR

INTRODUCTION

This manual provides detailed instructions for the installation, operation, and maintenance of your LOVMOR 1-Tier Pull Out Cabinet Organizer. Designed to enhance kitchen organization, this sliding shelf system allows for easy access to items stored within your cabinets.

SPECIFICATIONS

|                    |                      |
|--------------------|----------------------|
| Product Dimensions | 18"D x 14"W x 4"H    |
| Material           | Metal                |
| Finish Type        | Chrome               |
| Number of Tiers    | 1                    |
| Mounting Type      | Pull Out             |
| Assembly Required  | Yes                  |
| Item Weight        | 7.04 pounds (3.2 kg) |
| UPC                | 768486268733         |

SAFETY INFORMATION

- Read all instructions carefully before assembly and use.
- Ensure all components are securely fastened before placing items on the organizer.

- Do not overload the organizer.
- Keep small parts and packaging materials away from children to prevent choking hazards.
- Use appropriate tools for installation to avoid injury or damage to the product or cabinet.

## PACKAGE CONTENTS

---

Please verify that all components are present before beginning assembly.

- 1 x Pull Out Basket
- 1 x Set of 3-Section Ball Bearing Slide Rails
- Mounting Screws
- Installation Template

## SETUP AND INSTALLATION

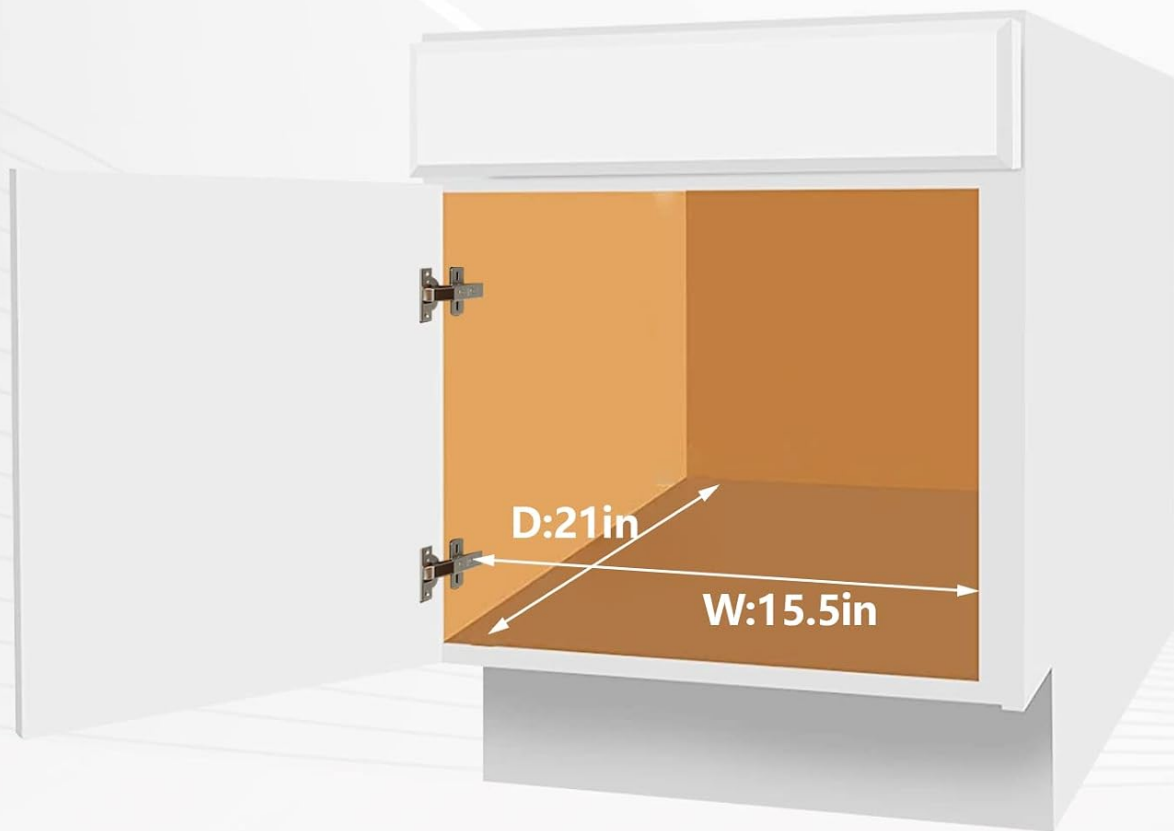

---

Follow these steps for proper installation of your LOVMOR Pull Out Cabinet Organizer. Installation can typically be completed in under 10 minutes.

### 1. Measure Your Cabinet

Before purchasing and installing, accurately measure your cabinet's internal dimensions. The organizer is 14 inches wide and 18 inches deep. Ensure your cabinet opening is at least **15.5 inches wide** and the internal depth is at least **21 inches**. Always measure from the obstacle (e.g., cabinet hinge) to ensure proper clearance.

# FIT CABINET SIZE

**Please make sure the cabinet opening, depth, height.  
Please start from the obstacle (hinge) when measuring.**

## 2. Prepare for Installation

Clear the cabinet of any items. Use the provided mounting template to mark the pilot hole locations on the cabinet floor. Pre-drill 4 holes (2.5mm diameter) at the marked positions.

## 2-Step Installation

Video: Demonstrates the installation process, including using the mounting template and pre-drilling holes.

### 3. Install the Slide Rails

Align the 3-section ball bearing slide rails with the pre-drilled holes. Secure them to the cabinet floor using the provided screws. Ensure the rails are parallel and firmly attached for smooth operation.

### 4. Attach the Basket

Once the slide rails are installed, gently place the pull-out basket onto the rails. The basket should snap securely into place. Test the sliding mechanism to ensure it moves smoothly and without obstruction.

## OPERATING INSTRUCTIONS

The LOVMOR Pull Out Cabinet Organizer is designed for simple and efficient use.

1. **Loading Items:** Place kitchen accessories, cleaning supplies, or other items directly into the wire basket. Distribute weight evenly to ensure smooth operation.
2. **Pulling Out:** Gently pull the front of the basket to slide it out of the cabinet. The 3-section ball bearing slide rails allow for full extension, providing complete access to items at the back.
3. **Pushing In:** To close, simply push the basket back into the cabinet until it is fully recessed.

## MAINTENANCE

To ensure the longevity and smooth operation of your LOVMOR Pull Out Cabinet Organizer, follow these simple maintenance guidelines:

- **Cleaning:** Wipe the metal surfaces and wire basket with a damp cloth. For stubborn stains, a mild soap solution can be used, followed by drying thoroughly. Avoid abrasive cleaners or harsh chemicals.
- **Lubrication:** Periodically check the slide rails for smooth movement. If they become stiff, a small amount of silicone-based lubricant can be applied to the ball bearings.
- **Inspection:** Regularly inspect all screws and connections to ensure they remain tight. Re-tighten if necessary.

## TROUBLESHOOTING

| Problem                               | Possible Cause                                                                                                                                                      | Solution                                                                                                                                                                                                                                             |
|---------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Organizer does not slide smoothly.    | <ul style="list-style-type: none"><li>◦ Rails are not parallel.</li><li>◦ Screws are loose.</li><li>◦ Debris in the rails.</li><li>◦ Lack of lubrication.</li></ul> | <ul style="list-style-type: none"><li>◦ Check rail alignment and adjust if necessary.</li><li>◦ Tighten all mounting screws.</li><li>◦ Clean the rails of any obstructions.</li><li>◦ Apply silicone-based lubricant to the ball bearings.</li></ul> |
