ASSEMBLY (SETUP)

Assembly of the VINGLI Porch Swing is designed to be straightforward. All pieces are typically numbered or lettered for easy identification. It is recommended to have at least two adults for assembly.

Before You Begin:

- Clear a spacious, flat area for assembly.
- Unpack both boxes and lay out all components. Verify against the parts list in your specific manual.
- Ensure all pre-drilled holes are clear and align correctly. If any holes appear missing or misaligned, double-check the orientation of the parts.
- Keep children and pets away from the assembly area.

General Assembly Steps:

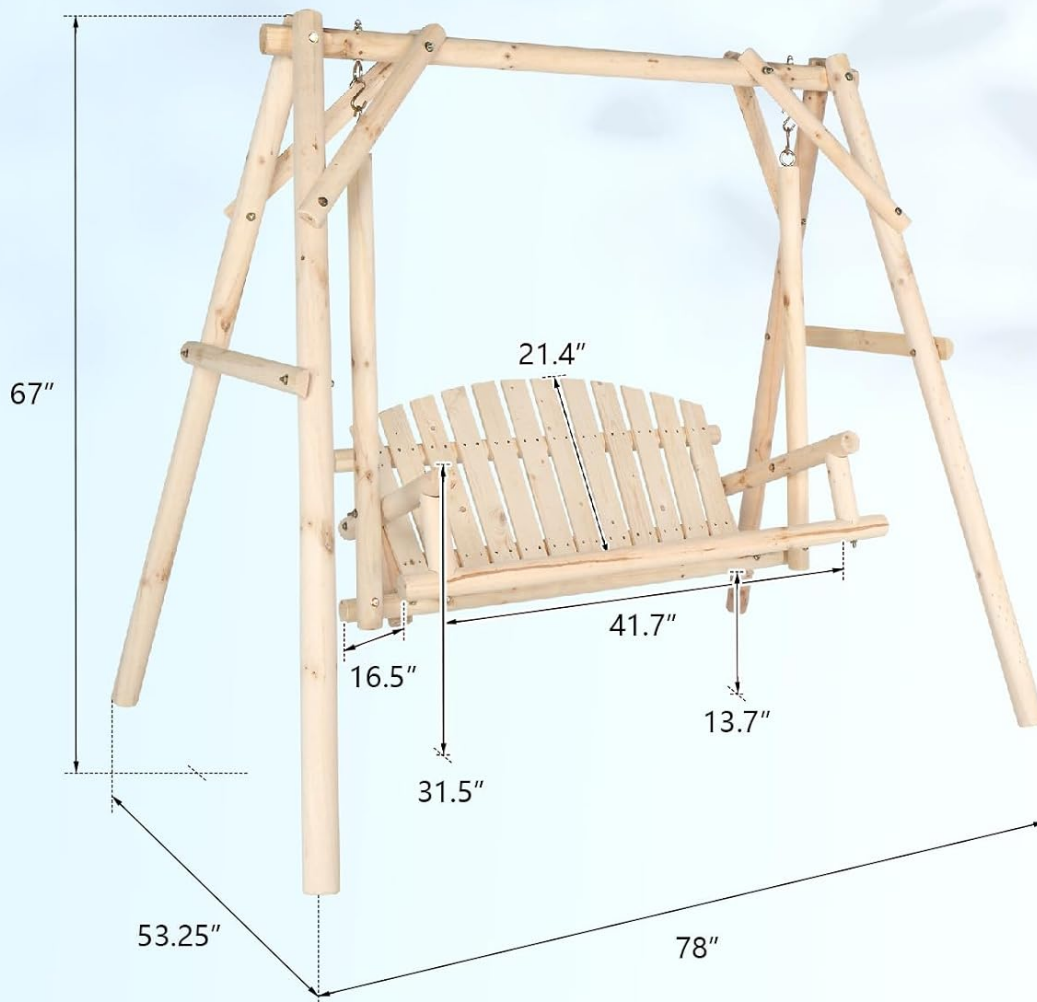

1. **Assemble the A-Frame Stand:** Connect the leg pieces and crossbeams according to the numbered/lettered instructions. Secure all connections with the provided hardware, but do not fully tighten until the frame is upright.
2. **Assemble the Swing Bench:** Attach the backrest to the seat and secure the armrests. Ensure all slats are firmly in place.
3. **Attach Hanging Hardware:** Secure the hanging chains or ropes to the swing bench and the top beam of the A-frame stand using the S-type hooks and other provided hardware.
4. **Final Tightening:** Once the entire structure is assembled and upright, carefully tighten all bolts and nuts. Do not overtighten, as this can damage the wood.
5. **Stability Check:** Gently rock the swing and stand to ensure stability. If any wobbling occurs, re-check all connections.

MAINTENANCE

Proper maintenance will extend the life and appearance of your VINGLI Wooden Porch Swing.

- **Cleaning:** Clean the wooden surfaces regularly with a soft cloth and mild soap solution. Rinse thoroughly and dry immediately to prevent water damage.
- **Wood Treatment:** The swing is made from high-quality solid fir wood, designed to resist various weather conditions. For enhanced protection and longevity, especially in harsh climates, consider applying a wood sealant or water-repellent finish annually.
- **Hardware Check:** Periodically inspect all bolts, nuts, and hanging hardware for tightness. Tighten any loose connections to ensure safety and structural integrity.
- **Wood Checking:** It is normal for natural wood products to develop small cracks or 'checking' as the wood dries and ages. This is a natural characteristic of real wood and typically does not affect the structural strength or durability of the swing.
- **Winter Storage:** In areas with severe winter weather, consider storing the swing indoors or covering it with a protective outdoor furniture cover to prevent damage from snow and ice.

TROUBLESHOOTING

Common Issues and Solutions:

- **Swing is Wobbly:**
Solution: Ensure the A-frame stand is on a completely level surface. Re-check all bolts and nuts on both the stand and the swing bench for tightness. Adjust as necessary.
- **Parts Don't Align / Missing Holes:**
Solution: Carefully review the assembly instructions to ensure all parts are oriented correctly. Sometimes a part may appear to have a missing hole if it's rotated incorrectly. If a part is genuinely defective or missing a pre-drilled hole, contact VINGLI customer support for assistance. Do not attempt to drill new holes unless explicitly instructed, as this may compromise the product's integrity.
- **Squeaking Noise During Use:**
Solution: Apply a small amount of lubricant (e.g., silicone spray or grease) to the pivot points of the hanging chains/hooks. Ensure all connections are secure.
